NCRMP:	NATIONAL CYCLONE RISK MITIGATION PROGRAMME

PREFACE

Disasters, whether natural or anthropogenic, can strike with minimal warning. While the occurrence of natural hazards cannot always be averted, the resultant loss of human life, property, and infrastructure can be significantly mitigated through meticulous planning, adequate capacity building, and an unwavering state of readiness. The foundation of modern disaster management lies in learning from past calamities and transitioning from a reactive, relief-centric approach to a proactive paradigm of preparedness and risk reduction.

Guided by the statutory framework of the Disaster Management Act, 2005, the Government of Gujarat has adopted a strategic and comprehensive perspective on disaster mitigation. The primary administrative intent is to shield the economic and social fabric of the State from the debilitating effects of calamities. Furthermore, it ensures that affected communities and vital infrastructure are restored to their pre disaster positions swiftly and effectively, minimizing disruption to daily life.

In alignment with this vision, the Gujarat State Disaster Management Authority (GSDMA) champions a holistic framework for disaster governance. This institutional approach transcends traditional post-disaster relief and restitution. It places paramount emphasis on advance preparation, continuous mitigation strategies, and robust response planning, which together form the bedrock of the district-level disaster response apparatus.

Accordingly, this District Disaster Management Plan (DDMP) for Rajkot has been meticulously formulated. It is the culmination of extensive inter-departmental coordination, integrating the operational reports, resource inventories, and contingency plans of all line departments across the district. This document is designed to serve as an actionable, unified blueprint. It ensures a synchronized administrative response, optimal resource mobilization, and the effective reduction of losses caused by any disaster striking the district.

Introduction

At the time of disaster, a person is between life and death , then every minute is precious. If there is no one to take the victim, it is a communication gap. An effective response to any disaster to reduce losses and facilitate recovery is expected to involve a variety of actors working in a number of sectors. Police , fire and emergency services , health services are the first responders. Disaster related activities such as search and rescue , traffic control , medical care and emergency transportation require adequate communication arrangements and control. Due to communication gap in essential operations, fruitful results cannot be obtained. The role of Emergency Operational Center is vital to maintain consistency in operations.

Before a disaster , the focus is on early warning communication management and assessment of the situation in the field. Communication systems remain vital during a disaster. They are the central point of all post-disaster communications for impact and recovery operations. These contingency operations are key to bringing people and resources together to deal with emergencies and disasters. There is a framework for handling specific operations related to specific disasters. Policy formulation for post disaster relief deals with matters like operations management , coordination of operations. The operation of the District Emergency Operational Center is essential in 24-hour search and rescue relief operations, restoration and rehabilitation operations.

Disaster can strike at any time. At this time preparedness and planning is required to minimize loss of life and property. Even in these earlier times we have faced calamities with more or less success. But if we look at the history, from the destruction of entire civilizations in the past, the modern mankind has saved everything from such calamities. Natural disasters can never be avoided completely. But the impact and damage caused by it can be minimized.

The roots of modern disaster management are derived from these kinds of experiences and lessons. Keeping this in mind, there is a need to create a disaster management policy and a suitable framework for identifying upcoming disasters and estimating their extent and effects with appropriate preparations. A strategic vision of disaster management has been developed to deal with the critical impact on the economic and social development of the state. The main objective of which is to prevent the loss of life and property due to the disaster and the goal of creating a recovery situation by reducing the effects caused by it is connected with this.

❖ National Disaster Management Authority (NDMA)

Disaster is woven with men in context of present time Indian government taking this subject matter very seriously in august 1999 formed one high powered committee and after Gujarat earthquake of 2001, disaster management plan was accepted as mitigation mechanism.

On 23rd December 2005, disaster management act.2005 was enacted by Indian government and form of national disaster management authority (NDMA) under chieftain of prime minister was done as per it and decision was taken of making for proper disaster management form of state disaster management authority under chieftain of chief minister for states various tacks are to be done for facing to disasters by NDMA in which risk reduction, rehabilitation like as matters are comprised above all necessary guidelines in regards to natural and men created calamities in national disaster management act 2005 have been given in.

❖ **Disaster Risk Reduction Post-2015**

Post 2015, there has been a significant shift from the approach of Managing Disasters to Managing Risk. The three landmark global agreements viz. the Sendai Framework for Disaster Risk Reduction 2015-30(SFDRR), Sustainable Development Goals (SDG) and the Paris Agreement (CoP21) set the stage for future global action on Disaster Risk Reduction (DRR), sustainable development and climate change.

❖ **Sendai Framework of Actions for Disaster Risk Reduction 2015-2030**

The Sendai Framework for Disaster Risk Reduction 2015-2030 (SFDRR) was adopted at the Third United Nations World Conference on Disaster Risk Reduction held in Sendai, Japan in March 2015. The SFDRR is a document that outlines four priorities for action to achieve 7 targets, which in turn would lead to one outcome which is-a substantial reduction of disaster risk and losses in lives, livelihoods, health, the economy of persons, businesses, communities and countries. India is a signatory to the Sendai Framework for a 15-year, voluntary, non-binding agreement that recognizes that the State has the primary role in reducing disaster risk, but that responsibility should be shared with other stake holder including local government, the private sector and other stake holders.

The Four priorities of action are: -

1. Understanding Disaster Risk
2. Strengthening Disaster Risk Governance to Manage Disaster Risk
3. Investing in Disaster Risk Reduction for Resilience
4. Enhancing Disaster Preparedness for Effective Response and to 'Build
5. Back Better' in Recovery, Rehabilitation and Reconstruction

The seven global targets are: -

- A. Substantially reduce global disaster mortality by 2030, aiming to lower the average per 100,000 global mortality rates in the decade 2020-2030 compared to the period 2005-2015
- B. Substantially reduce the number of affected people globally by 2030, aiming to lower the average global figure per 100,000 in the decade 2020-2030 compared to the period 2005-2015
- C. Reduce direct disaster economic loss in relation to global gross domestic product (GDP) by 2030

❖ **Sustainable Development Goals**

The Sustainable Development Goals (SDGs), also known as the Global Goals, were adopted by all United Nations Member States in September 2015 as a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030. The 17 SDGs are integrated – that is, they recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability. They recognize that ending poverty and other deprivations must go together with strategies that improve health and education, reduce inequality, and spur economic growth – all while tackling climate change and working to preserve our oceans and forests. To make the 2030 Agenda a reality, broad ownership of the SDGs must translate into a strong commitment by all stakeholders to implement the global goals.

❖ **Paris Agreement on Climate Change Action and Disaster Risk Reduction (CoP 21)**

The CoP 21 or the Paris Climate Conference held in December, 2015 led to a new international climate agreement, applicable to all countries, aiming at “holding the increase in the global average temperature to well below 2°C above Pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change”. The Paris Agreement recognized the need loss and damage associated with the effects of climate change. The agreement identified areas of cooperation central to DRR and called for investments to address the underlying risk drivers associated with rising greenhouse gas (GHG) emission levels and to inspire innovation and low-carbon growth.

The State Disaster Management Plan (SDMP) has tried to envisage coherence across the states. Efforts for DRR, sustainable development, and the actions in response to climate change.

Gujarat State Disaster Management Authority – GSDMA

Our state often becomes victim of disaster sometimes such disaster are terrible that local lives of people of state and total planning due to this disaster is disturbed this is experience of all of us policy above disaster management and restitution and rehabilitation have been determined by Gujarat state by passing Gujarat state disaster management act-2003 and 5th of month April of year 2003 was published in Gujarat gazette on 8th February 2001 form of Gujarat state management authority has been done vast project of multi-faceted reconstruction, restitution re-habitation for getting erected affected areas of earth quake after Kutch earth quake by taken in to account with help

by world bank, Asian development bank and international organizations, Indian government, state Government, voluntary institutions etc. and difficult tasks being raisable of all the world has been shown being completed in only period of two-three years.

Disaster risk management programme was handed by support of united nation development programme by GSDMA maximum group of people by programming like a disaster management plan, awareness, competence exceeding (Trainings) up to rural level under of it one being equipped against disasters.

❖ **SDRN Updation**

Preparation of state disaster resource network (S.D.R.N.) with Co-ordinate my with Bisag by GSDMA has been done all the details oriented to disaster management to VDMP, TRMP and CDMP on SPRN have been completed by mamlatdar, Talati, development officer and chief officer username and password are as below for usage of it.

GSDMA Structure

::CHAPTER 1::

1.1 What is a disaster?

A disaster is an event that disrupts the life of the people in that area and causes loss of life and property.

➤ The UN (United Nations) defines a disaster as follows.

A sudden, large-scale, unfortunate disaster that disrupts the basic structure and normal life of human society. According to the duration of the disaster, it can be divided into two categories as follows.

- A slow-moving disaster
- A sudden disaster.

➤ Gujarat State Disaster Management Act , 2003.

- Disaster means an actual or potential natural or other natural or other occurrence in any part of the State which causes or threatens to cause all or any of the following:
- Damage or loss to property both immovable and movable or
- Extensive loss of human life or injury or illness to persons: or

Damage or degradation of the environment and any of the effects specified in sub-sections (1) to (3) are beyond the ability of the affected community to cope with using its own resources and thereby disrupt the normal functioning of the community.

1.2 Reference to the Act.

Preparation of disaster management plan is mandatory under Gujarat Disaster Management Act - 2003 and National Disaster Management Act - 2005. In addition, the National Disaster Management Authority has given instructions and guidelines to each state for preparing a disaster management plan.

As per Gujarat Disaster Management Act - 2003 Chapter - 6 Section 15 Sub-section (1 , 2 and 3) has been given guidance and guidelines for disaster management plan and strategy in the work of the Authority.

According to the National Disaster Management Act - 2005, the state authorities have to make policies and plans for disaster management as per sub-section (1 , 2 and 3) of Article 18 of this Act. The District Disaster Management Plan shall take into account the technological perspective of all the villages , talukas , municipalities , municipalities and district and state authorities in the district and other acts and policies of the Government. The policies, rules which are changed from time to time should be reviewed and necessary amendments should be made.

1.3 Objectives of Disaster Management Plan.

- Disaster management activities , law and order controls.
- Risk monitoring and control.
- Dissemination of alert received.
- Coordination of disaster response.
- Guidance in relief and rescue operations.
- Reporting on information , decision making and its classification.
- Resource inventory in times of disaster as well as ease of access to required resources.
- To properly manage all the steps and operations taken to respond to the disaster and to obtain all the information about it efficiently.
- Coordinating disaster response measures and between concerned departments and seeking assistance and co-operation from outside agencies.
- Planned operations in times of disaster.
- To rescue the people caught in the calamity and give them full protection.
- Understanding the disaster and controlling it.
- To prevent damage to goods and to take measures to avoid damage to the surrounding environment.
- Rescue work , giving treatment to the injured.
- Evacuate the affected to a safe place.
- To identify the affected person , inform their families and help them as per their need.
- A record of the causes of the disaster , preservation of news and assistance to the investigator.

A comprehensive and effective disaster management plan containing basic information has been prepared so that all possible preventive measures can be taken quickly during natural calamities and the system and people can feel close at the time of crisis and the confidence of the people is increased and the atmosphere of fear is removed. In this plan, disaster profile of Rajkot district , resource inventory and departmental S.O.P. has been included.

1.4 Concept of Disaster Management Plan.

- Implementation and planning of disaster risk mitigation or mitigation measures.
- To minimize the destructiveness or consequences of a disaster.
- Preparedness for Contingencies and Disasters.
- Assessment of disaster impacts.
- Crisis relief , rescue and disaster rehabilitation and reconstruction.

Disaster management is a continuous process , with all types of risk management and authority thinking about disaster management , planning and efforts.

All forms of risk management involve planning, considering and taking steps to avoid or mitigate all potential risks affecting the district . Empowerment means empowering citizens with education , training and support. Such an authority does not transfer the entire responsibility of disaster

preparedness to any individual but is a last ditch effort to ensure that each individual has the necessary tools and assistance to mitigate or limit the impact of the disaster.

Situational stabilization is complemented by measures and capacity-building to reduce the extent or potential effects of a disaster, as well as approaches that make the recovery process faster and less expensive.

1.5 Disaster Management Approach.

- The Government of Gujarat has a holistic approach towards disaster management. Disaster mitigation is divided into two broad areas.
- Relief and rehabilitation focusing on the planning and action needed to mitigate the effects of an immediate disaster or to accelerate the response during the slow onset of a disaster.
- Preparedness and prevention focus on plans or measures to prevent or eliminate the effects of hazards or impending disasters.
- The overall approach to disaster management is based on 6 (six) steps.
- Accurate assessment of risk and sensitivity.
- Planning and adequate allocation of resources.
- Capacity building and training.
- Provision of adequate toilets.
- Assignment of disaster management roles and responsibilities.

❖ Evolution of the Plan

The District Administration prepares a plan using guidelines & ensures that these are constantly reviewed and updated. The Rajkot District prepared in advance, designated evacuation areas for use in emergencies and defined plans for providing essential services to those areas, when in use.

While preparing a District Disaster Management Plan for Rajkot District, the data collected at various levels were collated and on top of that was added with the Line department data. All this is made available with the in-house developed IT system 'State Disaster Resource Network [SDRN]'. It gives information access to all the officials at Taluka, District and state Secretariat level.

❖ How to use the plan

The District Disaster Management Plan has included all functions pertaining to disaster prevention, mitigation, preparedness, response, relief, recovery and rehabilitation. This Plan can apply to disaster management administration for all possible hazards that the district is prone to.

1.6 Mitigation , Preparedness and Prevention.

- Mitigation , preparedness and prevention measures are to be taken in advance of a disaster to reduce the likelihood of a disaster (risk minimization) or to reduce the extent of expected losses from a potential disaster (susceptibility reduction). Desensitization is given more priority than hazard minimization. A district can have up to four systems (1 or 4) to reduce risk and vulnerability.

- Long term planning for mitigation , preparedness and prevention in the district.
- Regulations particularly enforcement of construction and safety regulations and land use plans.
- Activities to review and evaluate development plans and identify ways to mitigate threats and vulnerabilities.
- Capacity building and identification of threats and vulnerabilities at community level, including provision of warning , relief and contingency assistance.
- Responsible for development plans and activities related to mitigation , preparedness and prevention using the system mentioned above with the assistance of Collector and District Development Officer .
- Based on the interim assessment of risk and vulnerability , the district will focus on the following areas for mitigation , preparedness and prevention.
- Re-establishing the supply system of life essentials. (Water , Electricity and Communication)
- health care , facilities , schools and roads.
- Alleviation of sensitivity in predisposed areas.
- Reduce sensitivity to cyclones.
- Improvement of disaster preparedness near industrial sites.

1.7 Plan Preparation and Revision.

- The District Collector is responsible for preparing and revising the District Disaster Management Plan in coordination with all the offices in the district and with other organizations in the district.
- When there is a significant change in the nature of a risk.
- Based on experience after a major disaster.
- Such plan should be reviewed and updated annually when there is a significant change in the organizations described in the plan or a change in the responsibilities of the primary members of the task force.
- As per Gujarat State Disaster Management Act-2003 framed by Gujarat State Disaster Management Authority for all the District offices under the guidance of District Collector Shri.
- District Collector and other government authorities are responsible for disaster management. Gujarat State Disaster Management Authority , Relief Commissioner Shri , all government and private collaborators are responsible as per law as part of which planning is made.

The District Collector prepares the District Level Disaster Management Plan in coordination with other responders of the district. It is updated twice a year and reviewed once a year.

1.8 Financial Planning.

Financial grant/assistance is given to the District Collector as per requirement of Gujarat State Disaster Management Authority or State Government.

1.8.1 State Government Budget.

Financial provision has been made in the budget of the state government for various functions of disaster management. For efficient execution of the District Disaster Management Plan, the Plan has been organized as per following four stages of the Disaster Cycle. (1) In Non disaster stage: Activities include disaster mitigation, leading to prevention & risk reduction. (2) In Before disaster stage: Activities include preparedness to face likely disasters, dissemination of early warnings. (3) In During disaster stage: Activities include quick response, relief, mobilization of search & rescue, damage assessment. (4) In After disaster stage: Activities include recovery & rehabilitation programs in disaster affected areas.

The District Disaster Management Plan can be utilized but not limited for:

1. To integrate disaster risk reduction into sustainable development policies and planning.
2. To develop and strengthen institutional mechanisms and capacities to build resilience to hazards.
3. To systematically incorporate all international, regional, national and local disaster risk reduction strategies and approaches into the implementation of emergency preparedness, response and recovery.
4. To achieve a comprehensive, all hazard, all agencies approach by achieving the right balance of prevention, preparedness, mitigation, response and recovery.
5. Prepare communities to ensure that they are fully equipped to anticipate and respond to disaster events.
6. To promote a transparent, systematic and consistent approach to disaster risk assessment and management.
7. A multi-stakeholder participatory approach including community participation at all levels
8. Develop a database and information exchange system at regional level.

❖ Authority for the plan

The Gujarat State Disaster Management Act of 2003 authorizes the collector to secure cooperation and assistance from other parties in efforts to avoid or reduce the impact of disasters.

The Collector (Specifically) and Government authorities (generally) are responsible for managing hazards and disasters which affect a district, with support from GSDMA, the relief commissioner and other public and private parties as may be needed.

❖ Stakeholders and their responsibilities

The roles, responsibilities and obligations of the Collector and other Stakeholders are set out in detail in the Act and are considered as part of this plan.

Clause 26 of Chapter X. (THE GUJARAT STATE DISASTER MANAGEMENT ACT, 2003)

- (1) Each department of the Government in a district shall prepare a disaster management plan for the district and the Collector shall ensure that such plans are integrated into the disaster management plan for the whole of the district.
- (3) A department of the Government shall subject to the supervision of the Collector -
 - (a) prepare a disaster management plan setting out the following, namely: -
 - (i) the way the concept and principles of disaster management are to be applied in the district.
 - (ii) role and responsibilities of the department of Government in terms of the disaster management plan of the State.
 - (iii) role and responsibilities of the department of Government regarding emergency relief and post disaster recovery and rehabilitation.
 - (iv) capacity of the department of Government to fulfil its roles and responsibilities.

(v) particulars of disaster management strategies; and

(vi) contingency strategies and emergency procedures in the event of a disaster, including measures to finance the strategies.

❖ **Approval of the Plan**

The Line Departments and other Stake Holders of District submit a copy of its disaster management plan, and of any amendment thereto to the Collector for Approval of that Plan.

The Collector shall submit a copy of the district disaster management plan, and of any amendment thereto to the State Disaster Management Authority and the Relief Commissioner for Approval of the Plan.

❖ **Plan review and updation**

The Line Departments and other Stake Holders of the district should: regularly review and update the Plan and submit a copy of its disaster management plan, and of any amendment thereto to the Collector. The Same Compiled DDMP document should: regularly update and submits updated copy to the Disaster Management Authority and State Relief Commissioner for Review.

Normally, The District Disaster Management Plan of District is updated twice a year for Review and Updation. It is likely to be prepared in the Pre-Monsoon phase in the month of May and it is updated in the Post Monsoon phase likely to be in the month of November every year.

1.9 Hon'ble Prime Minister's 10 Point Agenda towards Disaster Risk Reduction

The Prime Minister, Shri Narendra Modi, listed a Ten -Point Agenda in his inaugural speech at the Asian Ministerial Conference on Disaster Risk Reduction 2016, held in New Delhi in November 2016 (AMCDRR), which has also been incorporated in the SDMP. The ten key elements consist of the following:

1. All development sectors to imbibe principles of Disaster Risk Management
2. Work towards risk coverage for all-starting from poor households to small and medium enterprises to multi-national corporations to nation states.
3. Encourage greater involvement and leadership of women in disaster risk management
4. Invest in risk mapping globally related to hazards such as earthquakes based on widely accepted standards and parameters.
5. Leverage technology to enhance the efficiency of disaster risk management efforts.
6. Develop a network of universities to work on disaster issues.
7. Utilise the opportunities provided by social media and mobile technologies.
8. Build on local capacity and initiative. Response agencies need to interact with communities and make them familiar with the essential drill of disaster response.
9. Ensuring that disaster learning is well documented.
10. Bring about greater cohesion in international response to disasters.

::CHAPTER – 2::

::Hazard Vulnerability and Risk Assessment::

Hazard , Risk , Vulnerability and Capacity (HRVC) assessment consists of an integrated assessment of vulnerability and vulnerability for various hazards. This information contains a lot of interesting analysis. Where are the risks , potential locations and structures, and who are the people potentially at risk ? Also which people are able to cope with the complex. Helplessness assessment includes economic , social , housing, unsafe housing of helplessness , environmental helplessness etc. The hazard , risk , Vulnerability and capacity (HRVC) assessment contains details of resources , pre-preparedness arrangements , communication arrangements , public distribution arrangements , godowns , transport , health , fire stations , storm shelters , besides making emergency spones effective Voluntary Organizations functioning And there is a list of self-servants.

Tool and methodology used for HRVA

List of hazards with probability (frequency and magnitude)

Probability of Occurrence of disaster												
Type of Hazard	Time period											
	Jan	Feb	Mar	Apr	May	June	Jul	Aug	Sep	Oct	Nov	Dec
Earthquake												
Flood												
Fire												

Hazard assessment

2.1 Earthquake.

Rajkot district is prone to various natural as well as man-made disasters. Out of 11 taluks, only one taluk of Rajkot district falls in Paddhari earthquake zone 4, while Rajkot, Lodhika, Kotdasangani, Jasdan, Vichinya, Gondal Jamkandorana, Jetpur, Upaleta and Dhoraji taluk falls in earthquake zone three

On 26th January 2001, an earthquake of magnitude 6.9 was experienced in the state of Gujarat, as a result of which the residents of 417 villages and 417 villages of Rajkot district along with other districts of Gujarat were affected by the earthquake.

Very High (1X to XD)	-Rajkot
High (VII to VIID)	-Gondal, Jetpur
Moderate (VID to VI)	-Jasdan, Upaleta
Take (III to IVD)	-Dhoraji, Jamkandorana
Very low (I to IID)	-Consists of Lodhika Taluka.

2.2 Flood

There are 6 main rivers in Rajkot district. 1. Demi, 2. Dodi, 3. Aaji, 4. Bhadar, 5. Moj and 6. Nyari. There are no major dams in Rajkot district. 30 are located in Minor Dem, which is owned by the Irrigation Department of the State Government. Apart from this, there are 68 minor dams under the control of Panchayat Department.

No	Name of the river	Length (km)	Talukas in the area
1	Dodi	40	Lodhika , Rajkot , Paddhari
2	Aaji	90	Rajkot , Paddhari
3	Demi	80	Rajkot
4	Bhadar	170	Jasdan , Gondal , Kotdasangani , Jetpur , Dhoraji , Upleta
5	Moj	60	Upleta
6	Nyari	50	Lodhika , Rajkot , Paddhari

2.3 District's Major Dams

No	Name of the scheme	Place			Latitude	Longitude
		Village	Taluka	River		
Major Scheme (CCA over 1000 Hectares)						
1	Bhadar	Lilakha	Gondal	Bhadar	21°50'00"	70°46'00"
Medium Scheme (CCA 2000 to 10000 hectares)						
1	Moj	Mojira	Upleta	Moj	21.49°00"	70.18°00"
2	Aaji - 3	Khajuradi	Padadhari	Aaji	22.34°00"	70.34°00"
3	Venu -2	Gadhethad	Upleta	Venu	21.41°00"	70.11°00"

2.13 Storm.

- A hurricane is a swirling cloud of smoke and high-velocity air that rises over land from the sea. Due to low pressure in the atmosphere, these cyclonic winds, formed in the Arabian Sea or the Bay of Bengal, generally move in the north-west direction and strike the land from the sea. Heavy to very heavy rains can also occur under the influence of storms.
- A massive heat wave in north-west India is a factor in generating cyclones.
- As air warms, it becomes lighter or rises, creating an area of low pressure. To fill this space another wind rises on this side.

In this way, a huge mass of clouds with steam from the Arabian Sea moves forward and rises towards the pressure zone over the coast.

Cyclone rotates in the direction opposite to that of the cyclone. It is 8 to 12 km above the sea level. Can be up to height. The width of the storm is 20 to 50 km. can be of The center of calm in the center of the storm is called the front of the storm. The circle inside the eye and the outer circle are part of the storm itself. Based on the speed and direction of the wind, the weather forecaster gives a warning (hurricane bulletin) by calculating when and where a storm is likely to hit the land surface.

Cyclone in Gujarat mostly comes from Arabian Sea and moves in North, North-West direction. It mostly affects the coastal areas and bay areas region including Kutch, Morbi, Jamnagar, Porbandar, Junagadh, Amreli, Bhavnagar, Bharuch, Surat, Valsad district are included.

A storm has no specific duration. In Gujarat, there is a high chance of a storm coming before or after the monsoon. That is, from the month of May to the month of October, the danger of storms is high. It usually moves at a speed of 15-25 kmph. Speed is less at sea. When it comes to the ground, the speed increases. But many times there are cases of the couple staying at one place for a long time. In

this regard it is imperative to follow the weather forecast. Locally precise predictions cannot be made. The wind direction changes from one side to the other in the areas passing through the center of the cyclone and the wind calms down in the intervening period , so extra care is required.

2.14 Industrial - Chemical.

About 29630 small, 69 medium and large industrial units in Rajkot district. A large number of industrial units have developed in Jetpur , Gondal , Upleta , Dhoraji and Rajkot talukas of Rajkot district. Engineer , Forging , Casting , Solvent Plant , Paper Mill, Dairy , Electronic, Petroleum , Handicraft , Oil Engine , Electronic Items , Generating Mill , Electronics , Ceramic and Pharmaceutical etc industries in the district has developed . Rajkot has achieved great success in the business of diesel engine and its parts and furniture.

Various industrial units

No	Type of Industrial Unit	the number
1	Food Products	1953
2	Cotton/tax tiles	4378
3	Furniture	400
4	Paper and Printing	613
5	Leather Products	321
6	Rubber and plastic	933
7	chemical	703
8	Non metallic mineral products	1726
9	BASIC METAL INDUSTRIES	1232
10	Metal Products	1783
11	Machinery Parts	5225
12	Electrical Machinery Parts	558
13	Transport Equipment Part	367
14	Other industries	9094

Along with this, M.A.H. in the district. The unit is located as well as the crude oil pipelines of Crane India and Salaya Mathura Pipeline passing through various villages of Paddhari District and Rajkot Rural Taluka. Indian Oil Corporation's bulk storage and LPG bottling plant is located. CNG/PNG by GSPL Co. An industrial accident cannot be ruled out as the gas supply is also routed through Rajkot city as well as through the villages of various talukas.

2.15 Crude Oil Pipeline.

Crude pipe lines of IOCL and Crane India pass through the district.

No	Company Name	Name of Taluka	The name of the village through which the pipe lan passes
1	Crane India	Paddhari	Adbalka , Ukarda , Movia , Bodi Dhodi , Visaman , Chanol Navi , Fatepar , Khokhri

2.17 Need to identify disadvantaged groups.

Persons with disabilities are more vulnerable during a disaster , so individuals and groups with special needs should be identified and their needs prioritized in action plans, having difficulty speaking, hearing, remembering may have difficulty during a disaster. Special arrangements should be made for quick assistance to such individuals and groups. Some disabilities are directly visible , while some are difficult to detect and understand, such as heart disease , mental pain , asthma and arthritis , allergies , asthma , respiratory problems due to adverse effects of chemicals , vision and hearing problems and brain problems, etc.

2.18 Persons with disabilities and those who are hindered in performing certain tasks.

- Difficulty walking or using steps (joint pain , people using mobility aids - wheelchairs , blind walking with sticks , using crutches or hand crutches) , feeling tired , short of breath , feeling weak Have (temporary and permanent status)
- Heart disease , asthma , lung problems or any other symptoms that cause shortness of breath due to stress , fatigue and movement.
- Mental, intellectual , thinking and understanding problems.
- Can't see.

2.19 Fire (May-2024)

Fire is a chemical process in which a fuel and an oxidizing agent react, yielding carbon dioxide and water. This process, known as a combustion reaction, does not proceed directly and involves intermediates.

On the evening of 25 May, a fire started on the ground floor of the two-story building. The fire was reportedly caused when some welding work was being carried out and quickly spread into surrounding areas due to the already high temperature in the areas. Furthermore, there was only one exit on the first floor. Nearly 2,000 litres of diesel was stored at the TRP Game Zone for generators, while 1,000 to 1,500 litres of petrol was stored for go-kart racing, which made the fire almost uncontrollable. There were around 70 to 80 people at the time of fire.

2.20 Workshop on Stampede Avoidance and Crowded Management

❖ Purpose of Workshop

In Rajkot district, more than 10 lakh people come from all over Saurashtra to enjoy the fair and when the Lok Mela is a means of employment for more than 500 people, the collector and district magistrate Dr. Om prakash suggested that the district administration Also the associated employees who are on duty in the fair should be trained on "Crowd Management and Stampede Avoidance" so that there is no disaster in the fair and people can enjoy the fun of the fair. The workshop was implemented by the disaster team under the guidance of the Collector.

❖ Key Points of Workshop

There is Lots of examples sue to crowed and stampede, so this session Provide information about the new methods and management principles for managing crowd disasters

1. Improve the capacity of professionals by making them informed
2. This would not only strengthen the stakeholders with tools of crowd management but also enable the professionals to minimize the risk of stampedes at any event of mass gathering.
3. For the crowed management as administrative person we must watch on movement of crowded
4. We must be aware of people foe gathering, the need of the hour is to include this safety concern with other such concerns which are taught to the public.
5. For crowed management we take help from media partners who can also play a significant role in public education by promoting special features, programs, and public service announcements relating to crowd safety

3.2 District Disaster Management Committee

The District Collector will be responsible for coordinating all disaster management activities at the district level. There shall be a District Disaster Management Authority headed by Collector. The District Disaster Management Authority shall approve a district disaster management planning and review all measures relating to preparedness and response to various hazards. The District Disaster Management Committee comprises members from Jilla Panchayat, different line departments, NGOs and others to be notified by the Department of Disaster Management from time to time. In times of disasters, Dist. Collector shall constitute a District Relief Committee to oversee management of relief. Following member should ne club at district level committee.

Sr. No.	Designation	Position in DCM
1	Collector/District Magistrate	Chairmen
2	District Development officer	Member
3	District Superintend Police	Member
4	District Additional Collector	Member
5	District Supply Officer	Member
6	Exe. Engineer- R&B State	Member
7	Exe. Engineer - R&B Panchayat	Member
8	Exe. Engineer -R&B State Irrigation	Member
9	Superintending Engineer-PGVCL	Member
10	District Home guard commandant	Member
11	Superintendent Civil Hospital	Member
12	Port Officer	Member
13	District forest Officer(west)	Member
14	District forest Officer(east)	Member
15	Dy. Director -Information Department	Member
16	District Municipality Officer	Member
17	Regional Officer-GPCB	Member
18	District Agriculture Officer	Member
19	All SDM	Member
20	Regional Transport officer	Member
21	Divisional Controller- State transport	Member
22	Dy. Controller– Civil Defense	Member
23	District Education Officer	Member
24	District Primary Education officer	Member
25	NGO Member	Member
26	Media Person	Member

3.3 D.M. organizational structure in the district.

The DM structure in the district is as per the Gujarat State Disaster Management Act –2003. The district has existing institutional arrangements in place for addressing the roles / responsibilities envisaged through the provisions.

The District Collector is responsible for coordinating all disaster management activities at the district level. The Collector shall approve district disaster management planning and view all measures relating to preparedness and response to various hazards. In time's of disasters, the District Collector may constitute a District Relief Committee to oversee management of relief.

DM organizational structure at district level

3.4 District Crisis Management Group (Task Force).

Districts Responsible for assuring specific operations according to objective and plans to address the immediate impacts of the incident. District Crisis Management Group (Taskforces) will deal with specific functional tasks, such as search and rescue, the provision of water or shelter. The composition and size of these taskforces depend on the nature of the incident.

The district administration of Rajkot has identified 16 expected task forces for key response operation functions that are described below. Additional taskforces can be added under the operations section as needed by the circumstances of a disaster. Each Taskforce is led by one organization and supported by other organizations

Emergency Operation Task Force	Functions
1.Coordination and Planning	Coordinate early warning, Response & Recovery Operations
2.Administration and Protocol	Support Disaster Operations by efficiently completing the paperwork and other administrative tasks needed to ensure effective and timely relief assistance
3.Warning	Collection and dissemination of warnings of Potential disasters
4.Law and Order	Assure the execution of all laws and Maintenance of order in the area Effected by the incident.
5. Search and Rescue (including Evacuation)	Provide human and material resources needed to support local evacuation, search and rescue efforts.
6.Public Works	Provide the personnel and resources needed to support local efforts to reestablish normally operating infrastructure.
7.Water	Assure the provision of sufficient potable water for human and animal consumption (priority), and water for industrial and agricultural uses as appropriate.
8. Food and Relief Supplies	Assure the provision of basic food and other Relief need in the effected communities.
9.Power	Provide the resources to reestablish normal power supplies and systems in affected communities.
10. Public Health and sanitation (including First aid and all medical care)	Provide personnel and resources to address pressing public health problems and re- establish normal health care systems.
11. Animal Health And Welfare	Provision of health and other care to animals Affected by a disaster.
12. Shelter	Provide materials and supplies to ensure temporary shelter for disaster-affected populations
13.Logistics	Provide Air, water and Land transport for evacuation and for the storage and delivery of relief supplies in coordination with another task Forces and competent authorities.
14.Survey (Damage Assessment)	Collect and analyses data on the impact of disaster, develop estimates of resource needs and relief plans, and compile reports on the disaster as required for District and

	State Authorities and other parties as appropriate.
15.Telecommunications	Coordinate and ensure operation of all communication systems (e.g., Radio, TV, Telephones, Wireless) required to support early warning or post disaster operations.
16.Media (Public Information)	Provide liaison with and assistance to print and electronic media on early warning and post-disaster reporting concerning the disaster.

The specific response roles and responsibilities of the taskforces indicated above is that these roles and responsibilities will be executed and coordinated through the ICS/GS system. For example, in floods, search & rescue would come under the Operations section, Transport would come under the Logistics Section and Public Information under the Public Information Unit.

The District CRISIS Management Group & COMPOSITION of the TASK FORCES:

No.	Task Force	Taskforce Leader	Supporting members/ Organizations
1.	Planning and Coordination	Collector	DDO, SP, Chief Officer, RAC and Mamlatdar
2.	Administration & Protocol	Collector	DDO, SP, Chief Officer, RAC and Mamlatdar
3	Damage Survey/ Assessment	Collector	DIC, Dy. DDO, Ex. Engr., R&B, DAO, Fisheries
4	Warning	RAC	Disaster Mamlatdar, Control Room, District Information Officer (DIO)
5	Communications	RAC	Dy. Mamlatdars, Mobile Operators, TV, Radio, Port Office, GMB, Police, Forests
6	Media	District Information Officer	Information Department Print, Media, TV, Journalists, NGOs
7	Logistics	DDO	RTO, DSO, FPS, Private & Public sector, Municipal water supply board, Mamlatdar, Dist. Supply Mamlatdar
8	Law & Order	SP	Dy. SP, Home Guards Commandant, NGOs, Para-military and Armed Forces
9	Search & Rescue	Dy. Collector Civil Defense	Mamlatdar, TDO, Police, Executive Engr., Fire Brigade, RTO, State Transport, Health Dept.
10	Public Works	Ex. Engr. R&B (State)	Irrigation, Ex. Engr., Panchayat, NGOs, Water Supply Board, Municipalities, Home Guards, Police
11	Shelter	Dist. Primary Edu. Officer	School Principal, Teachers, Health, PHC, State Transport, Water Supply, RTO, Mamlatdar, TDO.
12	Water Supply	Ex. Eng. GWSDB & Water Works	Dy. Ex. Engr., Talati, Mamlatdar, TDO, Health, Dy. Engineer
13	Food & Relief Supplies	Dist. Supply Officer	FPS, PDS, Mamlatdar, NGO, RTO, State Transport, Municipality, DRDA, Police, Home guard
14	Power	Supt. Engr. GEB	Ex. Engr., Dy. Engr. Technical, GEB, Transport
15	Public Health & Sanitation	Chief District Health Officer (CDHO)	Supt. Govt. Hospital, Municipality, PHCs, CHCS, Red Cross, Fire Brigade, Civil Defense, R&B, NGOs, Doctors, TDO, Mamlatdar
16	Animal Health & Welfare	Dy. Director Animal Husbandry	Veterinary Inspector, NGOs

EMERGENCY ORGANIZATION OF THE DISTRICT CRISIS GROUP (DCG).

EMERGENCY ORGANIZATION OF THE AREA LOCAL CRISIS GROUP (LCG).

3.5 Incident Response System in the State

In any disaster response, the initial efforts would always be taken by the District Administration. However, when Districts are overwhelmed in any situation, the support necessarily must come from the State level. There is a formal Incident Response System in the State. The GSDM Act 2003 empowers the Commissioner of Relief to be the Incident Commander in the State and District Collector in the respective districts. The details on the Incident response structure of the State are mentioned in Para 3.1 in chapter 3.

3.6 Incident Response System in the District.

The District Magistrate is the chairman of the DDMA as per the Act. The roles and responsibilities of the members of the DDMA have been decided in advance in consultation with the members concerned. The roles of other line departments also have clearly described in DDMP and circulated the copy of same to all.

The IRS, however, depends on the nature of the disaster. In case of floods and earthquakes reaching the affected area, rescuing the affected people and providing relief to them is the main task of the responders. People must leave their home in a hurry, and they are not able to take away their valuables. These abandoned houses become vulnerable. The relief materials while being transported also become prone to loot. In such cases, Police and the Armed Forces are the best suited to handle and lead the operations section. In case of fire at Corporation and Nagarpalika level, it has the Fire Officer who is an appropriate officer to handle the situation. In case of health-related disaster, it would be the District Chief Medical Officer and so on.

Some of the natural hazards have a well-established early warning system. The district also has a functional 24 x 7 EOC / Control Room. On receipt of information regarding the impending disaster, the EOC informs the District Collector, who in turn will activate the required IRT and mobilize resources. The scale of their deployment will depend on the magnitude of the incident.

In the case of Sub-Division, Taluka, the respective heads, i.e. TDO, Mamlatdar and BHO will function as the IC in their respective IRTs. During the pre-disaster period, the Collector has ensured capacity building of IRT members in their respective roles and responsibilities.

In case when central teams (NDRF, Armed Forces) are deployed, the DM will ensure resolution of all conflicts. For this purpose, he may attach a representative of such agencies to the DEOC where all conflicts can easily be resolved at the highest level. The DM works in close coordination with DEOC and reports to State Relief Commissioner and CEO-GSDMA.

3.7 EOC setup and facilities available with the location

The District Control Room (DEOC) is located at the District Collector's Office. It is also the central point for information gathering processing and decision making more specifically to combat the disaster. Most of the strategic decisions are taken in this control room regarding the management of disaster based on the information gathered and processed. The Incident Commander takes charge of the District Control Room and commands the emergency operations as per the Incident Command System organizational chart.

➤ Facilities at District Control Room

The District Control Room (DEOC) is equipped with but not limited to the following items:

- 3 Telephones Lines
- 2 Walkey Talky Sets
- Satellite Nera phone
- Three PCs with GSWAN based e-mail, web site facilities and Printers

District Disaster Management Plan and District's Communication Plan

- 2 TVs for updated News telecasts.
- Projector with Screen and 2 Portable Emergency Lightning Systems.

➤ Alternate EOC if available and its location

The Taluka Level Control Rooms are located at the Office of Mamlatdar. The Liaison Officers of the respective Talukas take charge of the Control Room in any emergency. The respective Liaison Officers coordinate between the task group members working at disaster sites and TEOC for mobilization of resources and dissemination of instructions received from DEOC.

➤ Public and private emergency service facilities available in the district

The following Public and Private Emergency Services Facilities are available in Rajkot:

➤ 108 EMRI Ambulance have their Spot in every Taluka Hq. and all City.

1. Rajkot Municipal Corporation has their Equipped Fire and Emergency Service.
2. All Nagarpalika have their Fire Fighting Equipment and Staff.
3. R&B, S.T., Forest, Health, Irrigation and Police Department have their limited Emergency Services to co-ordinate during Emergency Situation in District.

(GSDMA) has also provided fire & emergency equipment to Municipal Corporations, Municipalities and the Emergency Response Centers to respond immediately after a disaster.

3.8 Forecasting and warning agencies

The meteorological department undertakes observations, communications, forecasting and weather services. During the cyclone and flood seasons, the State Government keeps close contact with the IMD – Ahmedabad office for weather related forecasts.

Earthquakes occurring in the State which are of magnitude 3.0 and above on Richter scale are also reported by the IMD and ISR to the District Authority immediately.

Initially the District Control Room based at DEOC plays an active role on dissemination of Forecast and Warnings to line departments, Taluka-City level Rooms and ensures reach with widely spread mass public through Local Media.

DEOC Personnel are well trained in observing IMD weather Satellite images, animated movement of Clouds, Weather Predications, and Hourly Predictions and Costal advisories on daily basis. If certain critical warning is issued by the metrology department, then it is immediate forwarded to SDMs, Mamlatdars, TDOs and COs for further actions.

Alternatively, Rajkot Agriculture University has their own Forecasting and Warning department who shares their advisories and warnings by e-mail periodically Warning in urban areas.

forecasting and weather services. During the cyclone and flood seasons, the State Government keeps close contact with the IMD – Ahmedabad office for weather related forecasts.

District Disaster Response Incident Command.

Communication Flow Chart during Disaster Management.

::CHAPTER – 4 Prevention and Mitigation Measures::

4.1 Prevention Measures in Development Plans and Programmes:

Individual and Community Level:

Preventive actions must be taken before a disaster to reduce the likelihood of a disaster (risk reduction) or the level of damage (vulnerability reduction) expected from a possible disaster. Vulnerability reduction is given priority over risk reduction. The district can avail itself of four mechanisms (singularly or together) to reduce risk and vulnerability.

- Long term planning for mitigation, preparedness and prevention investments in district,
- Enforcement of regulations, particularly building and safety codes and land use plans,
- Review and evaluation of development plans and activities to identify ways to reduce risks and vulnerability, and,
- Capacity building, including warning, the provision of relief and recovery assistance and community-level identification of risk and vulnerability.

The Collector, assisted by the District Development Officer, is responsible for developing plans and activities to affect mitigation, preparedness and prevention using the mechanism noted above. Based on the interim assessment of risk and vulnerabilities, the Rajkot District will focus on the following areas for mitigation, preparedness and prevention.

- Resilience of lifeline systems (water, power and communications)
- Reduction in disaster impact on health care facilities, schools and roads
- Vulnerability reduction in flood-prone areas
- Vulnerability reduction to high winds
- Improvement of off-site Preparedness near Industrial sites.

4.2 Special projects proposed for preventing the disasters

Disaster Risk Management Program (DRM) has taken strong roots at various levels of administration in Gujarat. The Department of Revenue & Disaster Management is the nodal Department in Government of Gujarat that handles the subject with GSDMA.

Disaster Management Committees are formed at various levels and are assigned the task of implementing the program. Representation for these committees are drawn from elected representatives, officials of line departments, professional bodies, Civil Defense, NGO and CBO representatives and local opinion leaders.

Major Activities are being carried out under DRM program are Plan Development at Various Levels, Emergency Resources Database maintain through SDRN / IDRN, Capacity Building through Trainings & Resource Mobilization, Disaster Awareness through Orientations, Campaigning, Media Management and IEC distribution. Coordinate District Administration for all Disaster Management Activities with expertise knowledge, logistics and fund allocation.

4.3 **Hazard-wise Mitigation Measures**

In the face of the increasing menace of hazards, mitigation would remain the key and the most effective strategy to reduce the risks of these hazards. The district has its own mitigation strategy according to its own risks, resources and capabilities. In District Rajkot, there shall be two approaches in disaster mitigation viz. structural mitigation and non-structural mitigation.

Structural mitigation measures generally refer to capital investment on physical constructions or other development works, which include engineering measures and construction of hazard resistant and protective structures and other protective infrastructure.

There are several mitigation activities which will be common for all natural hazards (as discussed in the previous chapter). The same are described below.

i) Town Planning Acts and their related provisions:

The Department of Disaster Management, being a member of all regulatory bodies, will coordinate with the Town & Country Planning Board and constitute a committee of experts to evaluate the provisions of the State Town Planning Act in place. The Committee will consist of experts from the fields of disaster management, town and country planning and legal experts and will be chaired by the State Relief Commissioner.

ii) Government-sponsored programmes and schemes:

The State Planning Department will prepare a report on the government sponsored programs and schemes running in the State and how far each program/scheme addresses the issue of disaster management and submits to the government. The Disaster Management Group which is constituted under the chairmanship of the Chief Secretary with Secretaries of the Departments of Disaster Management, Urban Development, Rural Development, Health, Home, Finance, Science & Technology, Transport, and Agriculture to evaluate and suggest disaster mitigation measures to be incorporated.

iii) Building Byelaws and their implementation:

Proper conceptualization, risk evaluation, proper designing, construction and maintenance of houses and building are all disaster reduction measures. Compliance with building guidelines and codes covering all aspects of disasters needs to be addressed by building codes and byelaws and these need to be uniform as far as possible. The situation warrants a high degree of coordination between the organizations involved in the formulation of the building codes. The State Urban Development Department/Urban Local Bodies will put in place appropriate techno legal regime and take steps to enhance the capacity of Urban Local Bodies to enforce the compliance of techno-legal regimes. The Urban Local Bodies will ensure stringent implementation of BIS codes and disaster resistant construction practices. Disaster resistant codes and standards will be made as part of the building byelaws and regulations and enforced by the ULBs. The Department of Urban Development will identify a competent authority to certify the disaster resistant components in public buildings.

4.4 **Hazard-Wise Non-Structural Mitigation Measures**

The nonstructural mitigation is basically framed in such a way that the population of the district will be sensitized to disaster management and their capacity is developed to cope with a hazardous situation. District Rajkot has specific plans for non-structural mitigation measures which is an ongoing process in various spheres of life.

Non-structural measures refer to awareness and education, policies technical legal systems and practices, training, capacity development etc. The technical guidelines, design and training manuals should incorporate suitable disaster risk mitigation measures. There are several non-structural mitigation activities which will be common for all natural hazards.

i) Capacity Building for Mitigation:

Recognizing the importance of human resource development and capacity building for effective disaster mitigation, the State will take appropriate steps to develop training curriculum for officials in all sectors at all levels. The SPIPA, in collaboration with the Gujarat Institute of Disaster Management and training institutes in related sectors like health etc. will develop the required modules and capsules for conducting training at all levels. Efforts will be made by the state government to effectively train engineers, architects, masons etc. on disaster mitigation and create a pool of master trainers for training the DMC's and DMTs in the state. The District Level Training Institutes, DEOC, BRCs, CHCs etc. will be utilized for training of district, taluka and village level officials in disaster management.

ii) Awareness generation on disaster mitigation:

Creating awareness among the community through disaster education, training and information dissemination and thus empowering them to cope with hazards are all mitigation strategies. The Disaster Management Cell will develop a Mass Media Campaign for taking up large-scale awareness generation bringing out specific do's and don'ts through audio, video and print media as well as publicity through pamphlets, posters, and bus back panels at all levels. The District Project Officer will ensure that all these publicity materials are prominently displayed at buildings like PHCs, Community Centers, Schools and such other common places where villagers normally congregate for community activities.

iii) Role of local self-governments in mitigation:

Local self-government institutions like PRIs and ULBs will be the focal points for mitigation at the village and city levels. Members of the PRIs and ULBs will be involved in all preparedness and mitigation measures. Members of the PRIs and ULBs will coordinate the functioning of the DMCs and the DMTs in DM plan preparation, preparation and maintenance of resource inventory, conducting mock drills etc. During disasters also, they will coordinate with the district and taluka administration for evacuation, response, relief distribution etc.

4.5 **Specific projects for vulnerable groups**

❖ NCRMP:

Gujarat being prone to cyclones, it is the topmost priority of the State Government to reduce the effect of cyclones and minimize the loss to property and lives in the coastal regions of the State through creation of suitable infrastructure. Gujarat has therefore been included in the NCRMP initiated by the National Disaster Management Authority and funded by the World Bank.

❖ Gujarat School Safety Initiative:

With the view of building capacities for disaster resilience, Gujarat School Safety Program is a capacity building program which aims at strengthening the capacity of the school community, and it further builds a disaster safety culture among the most vulnerable sections of society, that is, children. Under this program, Gujarat School Safety Week is celebrated for enervating awareness among school children. Gujarat State Disaster Management Authority has successfully celebrated Gujarat School Safety Week 2019 in all the Government Primary School.

::CHAPTER–5 Preparedness Measures::

5.1 Identification of Stake Holders Involved in Disaster Response

Preparedness measures go hand in hand for vulnerability reduction and rapid professional response to disasters. Experience has shown that destruction from natural hazards can be minimized by the presence of a well-functioning warning system, combined with preparedness on the part of the vulnerable community. A community that is prepared to face disasters, receives and understands warnings of impending hazards and has taken precautionary and mitigation measures will be able to cope better and resume their normal life sooner. The State will make concerted efforts to put in place a mechanism focused on preparedness at all levels, for all disasters that the State is vulnerable to. The effort will be to reduce loss of lives, livelihood and property to the extent possible in the event of a disaster.

❖ State Level:

At the state level, Search & Rescue teams will be constituted by the State Police and will be provided with state-of-the-art equipment for immediate response. The State Home Department will designate the units for conversion into Specialist Response Teams (SRTs). The State will also designate training centers for training the SRTs and nominate key personnel within the Police Training Colleges and Fire Training Institutes as trainers and train them at the national level. These trainers will then impart training to the SRTs.

❖ District Level:

Subsequently, Specialized Response Teams at the district level will be designated from the district level Police and Fire Service personnel and equipped for immediate response in any disaster within the district. In the event of a request from a neighboring district the teams will be authorized to operate under the direction of the Collector of that district.

❖ On-site teams:

Disaster Management Teams (DMTs) at the village level will operate as Incident Management Teams and will be trained to perform immediate rescue and first-aid operations in a disaster situation. A systematic approach should be evolved to ensure proper coordination between the SRTs and DMTs.

5.2 Formation of persons and training for-

Rajkot District administration has identified several stake holders from line departments, corporate sectors, NGOs and volunteers in disaster risk management activities. Students, teachers, home guards, police personnel, NCC and NSS students were also involved in training. District officers and community were also oriented to the iServices so that they can give their service at the time of any emergency.

(i) Search & Rescue:

It is the duty of the DDMA to provide specialized lifesaving assistance to district and local authorities. In the event of a major disaster or emergency its operational activities include locating, extricating and providing on site medical treatment to victims trapped in collapsed structures. In the event of any disaster the Home Guards, along with the support of the Police dept., form teams to locate the injured and dead and try to rescue the ones in need. They reared their bodies too that help these departments in this work, like the PWD, Health dept, Fire dept and the people that voluntarily formed as teams to help the ones in need. Proper training in search and rescue processes needs to be undertaken to minimize the time taken in rescuing someone. Also, proper methodology and resources are needed to carry out a search & rescue mission.

(ii) Early Warning:

The early warning systems for different disasters should be in place so that the concerned administrative machinery and the communities can initiate appropriate actions to minimize loss of life and property. These should give an indication of the level of magnitude of the mobilization required by the responders. The goal of any warning system is to maximize the number of people who take appropriate and timely action for the safety of life and property. All warning systems start with the detection of the event and with their timely evacuation. Warning systems should encompass three equally important elements viz detection and warning, dissemination of warning down to the community level and the subsequent quick response.

The State acknowledges the crucial importance of quick dissemination of early warnings of impending disasters and every possible measure will be taken to utilize the lead-time provided for preparedness measures. As soon as the warning of an impending calamity is received, the EOCs at the State, District and Taluka levels will be on a state of alert. The Incident Commander will take charge of the EOC and oversee the dissemination of warning to the community. The District Collector will inform the District Disaster Management Committees who will alert the block and Village level DMCs and DMTs to disseminate the warning to the community. In situations of emergency, the District Collector will use his own discretion on the preparedness measures for facing the impending disaster.

(iii) Evacuation:

Evacuation is a risk management strategy, which may be used as a means of mitigating the effects of an emergency or disaster on a community. It involves the movement of people to a safer location. However, to be effective, it must be correctly planned and executed. The process of evacuation is usually considered to include the return of the affected community.

Based on assessment of the severity of the disaster, the State Relief Commissioner (Incident Commander) shall issue appropriate instructions on actions to be taken including evacuation to the District Collector, who will then supervise evacuation. At the village level, members of the VDMC and DMTs or village level will coordinate the evacuation procedures to the pre-designated relief centers, taking special care of the vulnerable groups of women, children, old people etc. according to the plans laid down earlier.

(iv) Damage & Loss Assessment:

Immediately after the disaster there is an urgent need for damage assessment in terms of loss of life, injury and loss of property. The objectives of damage assessment are to mobilize resources for better squander relief, to have detailed information on damage

extent and severity of disaster and to develop strategies for reconstruction and restoration facilities.

Immediately after a disaster event, damage assessment will be conducted in 2 phases viz. Rapid Damage Assessment and Detailed Damage Assessment.

(iv) Rapid Damage Assessment (RDA):

Rapid Damage Assessment shall emphasize a rapid appraisal of the situation and extent of damage to provide resources for effective relief and rescue. Rapid Damage Assessment (RDA) will be conducted at the local level where the disaster has occurred. The RDA team will be headed by the local Incident Commander and will comprise of the Talti, CMO of the Sub- Division Hospital, Junior Engineer PWD, and some prominent local people may be involved at the discretion of the local Incident Commander. The RDA team will report to the District Collector its assessment of the damage. The RDA will be conducted according to a proforma/format developed by the State Disaster Management Authority.

(v) Detailed Damage Assessment (DDA):

Detailed Damage Assessment will be done at the district level during the recovery stage involving skilled personnel. The aim of this assessment is to estimate economic and financial aspects of damage, detailed building damage, agricultural damage, and property damage and propose of Ettinger string theming. The DDA team will be headed by the District Collector and will comprise of the District Relief Officer, Executive Engineer PWD, Chief Medical Officer of the affected district, members of prominent NGOs working in the district and any other expert at the discretion of the District Collector. The DDA team will also have two external observers from the State Disaster Management Authority and DMC Cell of the State ATI respectively. The team will assess the damage based on the format developed in advance by the State Disaster Management Authority in consultation with the DMC Cell of the State ATI and eminent experts in the field.

5.3 Training need analysis

Training Analysis is most often used as a part of the system development process. Due to the close tie between the design of the system and the training required, in most cases it runs alongside the development to capture the training requirements.

GIDM has analyzed education, training and information needs through interviews and conversations with stakeholders in different parts of Gujarat.

The training need analysis is done considering variable factors of intensity, affected population and severity of damage need to be quickly assessed based on which government and non-government agencies can allocate and deploy relief. All the government line departments who have a stake in different phases of the disaster management will have to identify the ironies and carry out training need analysis of their personnel.

5.4 Arrangements for Training and Capacity Building

Training on search and rescue, rehearsals, evaluation and inventory updating for response activities will be carried out during normal time. The district collector will ensure that all the DDMC members acquire knowledge and skills to perform their assigned role through regular refresher training. Basic and detailed training modules in disaster preparedness have been incorporated along with training methodologies for trainers, for community preparedness and manuals for training at district, block, panchayat and village levels.

For capacity building several Search & Rescue and First aid trainings organized for beneficiaries, disaster management teams and committee members to be trained at village, city, and taluka and district level.

Activity	Responsibility
1. Training civil defense personnel in various aspects of disaster management 2. Training to home Guards personal in various aspect of disaster management including Search and rescue	Home Dept. Commandant General Home Guards Director Civil defense GSDMA/GIDM
3. Training NCC and NSS personnel in various aspects of disaster management	Education Dep. Director NCC GIDM
4. Training in education and training institutions personal in various aspects of disaster management	NIDM GSDMA/GIDM
5. Training civil society, CBOs and corporate entities in various aspects of disaster management	NIDM GSDMA/GIDM NGOs
6. Training fire and emergency service personnel in various aspects of disaster management	NIDM UDD Municipal Corporation GSDMA/GIDM
7. Training police and traffic personnel in various aspects of disaster management	NIDM GSDMA/GIDM Home Dept. Police training Institute
8. Training in the State Disaster Response Force (SDRF) Teams in various aspects of disaster management	NIDM/NDRF Home Dept. Addl. DGP(Arms) Addl. DGP(Training) GSDMA/GIDM
9. Training the media in various aspects of disaster management	NIDM Information Dept. Information Training Centre GSDMA/GIDM
10. Training to govt. officials in various aspects of disaster management	NIDM GSDMA/GIDM Departmental Training Institutes

11. Training engineers, architects, structural engineers, builders and masons in various aspects of disaster management	Departmental Training Institutes under R & B and Irrigation Dept. NIDM GSDMA/GIDM
---	---

5.5 **Activation of Incident Response System in the district**

There is a formal Incident Response System in the State. The GSDMA Act 2003 empowers Commissioner of Relief to be the Incident Commander in the State and District Collector in the respective districts. The detail on the disaster response structure is mentioned in Para 9 in chapter 1.

The NDMA guidelines provide for emergency organizations where different departments, agencies and even private resources (e.g. industries) team polarity align the priorities with the emergency response objective under a unified command. This system is called Incident Response System (IRS) and discussed in the intertext. Unimportant to recognize that organization under the IRS and the existing structure of the LCG and DCG are not in conflictual thought here can be differences in terminologies for some positions in the emergency organization. The IRS gives an emergency organization structure called Incident Response Teams (IRTs) that are pre-designated as per the identified emergency scenarios. While there is a general structure, IRTs are not prescriptive about who must fulfill what position or role instead the decision rests with the local or district level authorities. Therefore, the organizations and people are given specific roles as per existing LCG and DCG structure can be given similar roles or positions in the IRT structure and a coordination between IRTs as per IRS and those as per existing LCG/DCG structures is achieved. The IRS provides additional advantages of being scalable by including additional and higher levels of response in the same unified command structure being flexible by transferring command and other sections of IRS to qualified people as scale and nature of emergency changes, and with a unified command so that there is one authorized, and accountable (technically qualified) incident commander and the command can be transferred up as the scale of emergency increases. The IRS also requires documentation of decisions, actions, and learning so that not only continuous improvement can be achieved but also accountability is fixed.

A traditional command structure exists in the administrative hierarchy which manages disasters in India. It has been planned to strengthen and professionalize the same by drawing upon the principles of the ICS with suitable modifications. The ICS is essentially a management system to organize various emergency functions in a standardized manner while responding to any disaster. It will provide special incident management teams within incident commander and officers trained in different aspects of incident management, such as logistics, operations, planning, safety, media management, etc. It also aims to put in place such teams in each district by imparting training in different facets of incident management to district level functionaries. The emphasis will be on the use of technologies and contemporary systems of planning and execution with connectivity to the joint operations room at all levels.

5.6 Protocol for Seeking Help From Other Agencies...

(State Government, Govt. of India, NDRF, SDRF, Army, Navy and Air Force etc...)

For management and control of the adverse consequences of any disaster will require coordinated, prompt and effective response systems at the central and state government levels, especially at the district and the community levels.

There are various agencies / organizations / departments and authorities that constitute a network for implementing various disaster management related functions / activities. It also includes academic, scientific and technical organizations which have an important role to play in various facets of disaster management. These agencies (State Government, Govt. of India, NDRF, SDRF, Army, Navy and Air Force) shall be called upon to assist the civil administration only when the situation is beyond the coping capability of the State Government.

5.7 Checking and Certification of Logistics, Equipment and Stores

Certification of logistics: the process of response includes personnel, equipment, vehicles, facilities...etc., all of which will depend upon the acquisition, transport, and distribution of resources, the provision of food and water, and proper medical attention. The Logistic section is responsible for all tasks and functions related to the provision of material and other resources needed for operations and the physical and material support and operation of the incident management team. This section includes a transportation task force established to support disaster operations. Logistics tasks are done through the following units: 1. storage and supply, 2. Facilities, 3. staff support, 4. communications, 5. transportation (include ground, air water).

5.8 Operational Check-up of Warning System

The goal of any warning system is to maximize the number of people who take appropriate and timely action for the safety of life and property. All warning systems start with the detection of the event and with their timely evacuation. Warning systems should encompass pass three equally important elements viz detection and warning, dissemination of warning down to the community level and the subsequent quick response. Experience has shown that destruction from natural hazards can be minimized by the presence of a well-functioning warning system. Operational check-ups of warning systems in district have been done annually by concerned departments and during mock drills initiated during monsoon.

5.9 Operational Check-up for Emergency Operation Centre

Apart from Disaster Management developments, District has its Emergency Operation Centre (DEOC) has been started functioning in the Sardar Baug campus, Near to Collector Office of Rajkot with all sophisticated equipment and most modern technologies for disaster management. The Additional Collector of District Rajkot is empowered as a Nodal Officer of DEOC and is responsible for Operational check-up for Emergency Operation Centre that includes...,

1. Ensure that all equipment in the EOC is in working condition.

2. Collection data on routine basis from line departments for disaster management
3. Develop status reports of preparedness and mitigation activities in the district.
4. Ensure appropriate implementation of District Disaster Management Plan
5. Maintenance of data bank with regular updating
6. Activate the trigger mechanism on receipt of disaster warning/occurrence of disaster

5.10 Seasonal Inspection of Facilities and Critical Infrastructure

The above all responsible Departments / Personnel shall have to carry out periodic inspection of such facilities through their respective control rooms at the frequency set by them and maintain records on the same.

Normally as a pre-monsoon drive in the month of April-May, an instruction passed to all departments to carry out seasonal inspections and submit report to DEOC before the pre-monsoon meeting held at collector office chaired by District Collector. Based on reports received from agencies, a compiled and consolidated report of all Facilities and Critical infrastructure has been submitted to State EOC every year.

5.11 Commanded Coordination–Identification of Quick Response Teams

Command and coordination of quick response teams establishes the framework within which a single leader or committee can manage the overall disaster response effort. A single Incident Commander is responsible for the successful management of the response during operational period in an area. If the incident grows and extends throughout many jurisdictions, multiple incident commanders can be use full with an area command authority that may be established to coordinate among the incidents. Incident Commander requires the following Command Staffs to support him, which are as followings,

- Public Information Officer–the single media point of contact
- Safety Officer–Responsible for identifying safety issues and fixing them, has the authority to halt an operation if needed.
- Liaison Officer–Point of contact for agency-to-agency issues.
- If the local authorities do not have the capacity to play an efficient role at local level to identify quick response teams and the requirements for field information and coordination. The DEOC will therefore need to send its own field teams and through them establish an Incident Command System. The system will comprise:
Field command
- Field information collection
- Inter-agency coordination at field level
- Management of field operations, planning, logistics, finance and administration

5.12 NGOs and Other Stakeholders’ Coordination–Activate NGO Coordination Cell

Local community groups and voluntary agencies, including NGOs, should actively assist in prevention and mitigation activities under the overall direction and supervision of the Collector. They should actively participate in all training activities

as maybe organized and should familiarize themselves with their role in disaster management.

It is the duty of every citizen, NGOs and stakeholders to assist the Collector or such other person entrusted with or engaged in disaster management whenever his aid is demanded generally for the purpose of disaster management.

NGOs of the District are working on targeted community or limited to certain specific areas. They are coordinating with district EOC only on direct approach or on allocation of specific tasks.

5.13 Seasonal Preparedness for Seasonal Disasters Like Flood and Cyclone

While analyzing past experiences pertaining to various natural disasters, communities develop the seasonality calendar based on the occurrence of disaster events. In the calendar below prepared by the community show the month of the disaster occurrence & month for preparedness.

Month	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
Flood							√	√	√			
Cyclone					√	√	√	√	√	√	√	

Main Seasonal Preparedness Strategies:

1. Mapping of the flood prone areas is a primary step involved in reducing the risk of the region. Historical records give the indication of the flood inundation areas and the period of occurrence and the extent of the coverage. Warning can be issued looking into the earlier mark edh eights of the water levels in case of potential threat.
2. The onset of cyclones is extensive and often very destructive. A hazard map will illustrate the areas vulnerable to the cyclone in any given year.
3. The map is prepared with data inputs off past climatologically records, history of wind speed, frequency of flooding etc.
4. Land use control will reduce the danger of life and property when waters inundate the flood plains. In areas where people already have built their settlements, measures should be taken to relocate to better sites to reduce vulnerability. No major development should be permitted in the areas which are subjected to high flooding. Important facilities should be built in safe areas.
5. Construction of engineered structures in the flood plains and strengthening of structures to withstand flood forces and seepage. The buildings should be constructed on an elevated area. If necessary, build on stilts or platform. They should be wind and water resistant. Protect river embankments. Communication lines should be installed underground. Provide strong halls for community shelter in vulnerable locations.
6. Flood Control aims to reduce flood damage. Measures such as reforestation, protection of vegetation, clearing of debris, conservation of ponds and lakes, etc.
7. Structural measures include storage reservoirs, flood embankments, drainage channels, anti- erosion works, detention basins, etc. and non-structural measures include flood forecasting, flood proofing, disaster preparedness, etc.

5.14 Community Awareness, Education and Preparedness

Community is the first and last to face the disaster. Equipping them, educating them and preparing them for recurring disasters are of vital importance. The most vulnerable areas are to be identified, and periodic awareness programs are to provide

the Ward level, Panchayat level, Educational Institutions, Social Organizations etc. It is essential to examine the various methods in which the community can be effectively involved in planning for disaster management. A community which is aware and well equipped to handle disasters will boldly face them.

Community awareness will be raised regarding do's and don'ts with the involvement of Panchayati Raj institutions and CBOs. The revenue department will be the nodal agency for this activity. Increasing community awareness about the mitigation measures that can protect the lives and properties from hazards.

Community Awareness on Various Disasters can be classified in 1. Construction of Earthquake Resistant Structures, 2. Retrofitting the weak structures, 3. House insurance, 4. Construction of embankments for flood control, 5. Rehabilitation of people in safe lands, 6. Development of plans for shifting people from vulnerable area to safer area etc. The Community awareness task can be performed by, Advertisement, hoarding, booklets, leaflets, banners, shake-table, demonstration, folk dancing and music, jokes, street play, exhibition, TV Spot, radio spot, audio-visual documentary and school campaign.

5.15 Community warning system

It is often observed that communities living in remote and isolated locations do not receive timely and reliable warnings about impending disasters. Hence, it is necessary to have robust and effective early warning systems, which can play a crucial role in saving lives and limiting the extent of damage to assets and services. Outreach and reliability of warnings are key factors for planning and implement in response measures. Post disaster advisories like information on rescue, relief and other services are important to ensure law, order, and safety of citizens. A community that is prepared to face disasters receives and understands warnings of impending hazards and can be able to cope better and resume their normal life sooner.

Type of Action	Flood	Cyclone	Chemical and industrial accidents	Tsunami
Existing EWS	Irrigation department dam authority/ IMD ↓ Collector ↓ Mamlatdar /TDO ↓ Villages	IMD ↓ Collector ↓ Mamlatdar/ TDO ↓ Villages	Industrial Association/industries ↓ DCG ↓ LCG ↓ Mamlatdar ↓ Villages	IMD ↓ Collector ↓ Mamlatdar ↓ /TDO ↓ Villages
Responsible Agency for warning dissemination	DDMC Mamlatdar office/TDO VDMC	DDMC Mamlatdar office/TDO VDMC	DDMC Mamlatdar office/TDO VDMC	DDMC Mamlatdar office/TDO VDMC
Trained personnel and operators available				
Villages covered	All risk prone villages			

Villages/habitation not covered or difficult to access	Communities' inner mote locations (fisher folk, saltpan workers, etc.) VDMC
Measures required to improve timeliness and outreach (For example, voice Enabled SMS)	Contact of communities in remote locations (fisherfolk, saltpan workers etc.)

❖ During and Post Disaster Advisory Action Plan

Type of Hazard	Flood	Cyclone	Earthquake	Drought	Chemical and industrial Accidents
Responsible Agency	DDMC, Mamlatdar office & TDO				
Villages covered	All risk prone villages				
Villages/habitation not covered or difficult to access	Communities in remote locations (fisher folk, saltpan workers etc.)				
Measures required for outreach	Contact of communities in remote locations (fisher folk, salt pan workers etc.)				

5.16 **Procurement Various Resources**

(Tents, blankets, tarpaulins, equipment etc.)

Facilitating procurement related to disaster management of materials, equipment and services in connection with the disaster management and ensuring their quality is lies with the State authority. At present District has no funds or any instructions to procure such things locally. State authorities have the power to authorize the departments or authorities concerned, to make emergency procurement of provisions or materials for rescue and relief in a threatening disaster situation or disaster or alternatively can arrange for centralized procurement of additional relief material required for relief operations (based on need assessment).

5.17 **IDRN/SDRN updating**

❖ SDRN (State Disaster Resource Network):

The State Disaster Resource Network (SDRN) system has three layers namely Village, Municipality and Taluka. The level specific data is collected in the standard disaster management plan format and uploaded into the system either at taluka or district level. The centrally stored database in the server located at GSDMA, Gandhinagar can be accessed through internet portal (http://117.239.205.164/SDRN_NEW/Login.aspx) and GSDMA Web Site (www.gsdma.org).

Each user of all Talukas of the State has been given unique username and password through which they can perform data entry, data updating on SDRN for their Village, Taluka or City. Status reports area also generated showing the status that how many forms, records are entered on SDRN. The Village level officers should be contacted to know the status of the shelters with the capacity of the shelter and other available facilities at the site.

❖ **IDRN (India Disaster Resource Network):**

IDRN is a web-based information system, is a platform for managing the inventory of equipment, skilled human resources and critical supplies for emergency response. The primary focus is to enable the decision makers to find answers on the availability of equipment and human resources required to combat any emergency.

It is a nationwide district level resource database. Each user of all districts of the state has been given unique username and password through which they can perform data entry, data updating on IDRN for resources available in their district.

The IDRN network has functionality of generating multiple query options based on the specific equipment, skilled human resources and critical supplies with their location and contact details.

IDRN Online Status

STATE NAME	DISTRICT NAME	Records uploaded	No. of Items identified
Gujarat	Rajkot	Total Records = 515	85
Last Update Month 02/2026			

5.18 Protocol and Arrangements for VIP Visits

It is important to immediately inform VIPs and VVIPs on impending disasters and current situation during and after disasters. Appeals by VIPs can help in controlling rumors and chaos during the disaster. Visits by VIPs can lift the morale of those affected by the disaster as well as those who are involved in the response. Care should be taken that VIP visited on interrupt rescue and lifesaving work. Security of VIPs will be an additional responsibility of local police and Special Forces. It would be desirable to restrict media coverage of such visits, in which case the police will liaise with the government press officer to keep their number to a minimum.

5.19 Media Management Information Dissemination

Media management utilized to ensure precise communication of the impact of disaster and relief measures being taken and generate goodwill among community and other stakeholders. Ensure that the information about the progress of rescue and relief is provided to media/public in an organized manner at least twice a day. Establish help lines for facilitating communication between the victim sand their relative residing outside the affected areas. Establish Information Centers at strategic locations for providing information about people evacuated to the relief centers/ hospitals. Establish Media/Press Centre for media management and information dissemination. Ensure that the information to media/public about the response of the State Government is released in an organized manner along with the following points

- Broadcast programs to raise people's awareness of disaster prevention measures
- Develop news sources in emergency
- Publicize station frequency
- Broadcast public planning meetings
- Compile local knowledge on signs of impending disaster and share it with community
- Broadcast emergency evacuation announcements
- All announcements broadcast in areas during and calm manner

5.20 Documentation

Documentation of all response/relief and recovery measures should be done with—

- Documentation of disasters and to make it available in easily accessible format
- Undertake research studies and application of outcomes in disaster management practices
- Documenting field data, experience and indigenous technological knowledge from local community
- Development of plan by using available resources like SDRN, IDRN, etc.
- Assimilate all reports and transaction of information during the disaster for easy documentation

::CHAPTER–6::

::Response Measures (multi - Hazard)::

Response measures are those which are taken instantly prior to, and following, a disaster aimed at limiting injuries, loss of life and damage to property and the environment and rescuing those who are affected or likely to be affected by disaster. The response process begins as soon as it becomes apparent that a disastrous event is imminent and lasts until it is declared to be over.

Since response is conducted during periods of high stress in a highly time-constrained environment and with limited information and resources (in majority of cases), it is by far the most complex of four functions of disaster management.

Response includes not only those activities that directly address the immediate needs, such as search and rescue, first aid and shelters, but also includes systems developed to coordinate and support such efforts. For effective response, all the stakeholders need to have a clear vision about hazards, its consequences and actions that need to be taken in the event of it.

Multi-Hazard Risk Management is...

1.

Comprehensive

Take a big-picture view of your situation to understand your true risk profile and needs.

2.

Data-driven

Ingest intelligence that's highly relevant and tells a story about what action needs to be taken.

3.

Collaborative

Unite stakeholders with a common language, toolkit, and purpose. Break down the silos!

6.1 Response Flow Chart

The Revenue Department of the State is the Nodal Department for controlling, monitoring and directing measures for organizing rescue, relief and rehabilitation. All other line departments concerned should extend full cooperation in all matters pertaining to their spouse management of the disaster whenever it occurs. The State EOC, ERC sand other control rooms at the State level as well as district control rooms should be activated with full strength. The State Government may publish a notification in the official gazette, declaring such an area to be disaster- affected area under GSDMA Act (Section 32 (2) (a).

6.2 Warning and Alert Dissemination

On the receipt of warning or alert from any such agency which is competent to issue such a warning or based on reports from District Collector of the occurrence of a disaster, the response structure of the State Government will be put into operation. The Chief Secretary/Relief Commissioner will assume the role of the Chief of Operations during the emergency.

The details of agencies competent enough for issuing warnings or alert pertaining to various types of disasters are given below.

Disaster	Agencies
Earthquakes	IMD, ISR
Floods	IMD, Irrigation Department
Cyclones	IMD
Tsunami	IMD, ISR, INCOIS
Drought	Agriculture Department
Epidemics	Health & Family Welfare Department
Industrial & Chemical Accidents	Industry, Labor & Employment Department, DISH
Fire	Fire & Emergency Services

6.3 District CMG Meeting

The Collector & DM is responsible for holding regular CMG meetings on disaster management including government, NGOs and private sectors. The CMG Committee held various meetings and had detailed interaction with members and management of Crisis. The Rajkot District Level Pre-Monsoon and CMG Meeting for all District level departmental heads along with Mamlatdars, Chief Officers and TDOs was called, chaired by Collector-Rajkot, DDO-Rajkot and Resident Additional Collector-Rajkot.

6.4 Activation of EOC

The disaster response is led by the District Emergency Operation Centre (EOC) under the command and control of the District Collector. It is also the central point for information gathering, processing and decision making, more specifically to combat disaster. Most of the strategic decisions are taken in this control room about the management of disasters based on the information gathered and processed. The Incident Commander takes charge of the District Control Room and commands the emergency operations as per the Incident Command System organizational chart.

Emergency Operation Centre (EOC) of District is operational at Collector Office, Rajkot and is operational on 24x7 round the clock for 365 days in 3 shifts of 8hrs. with the help of staff deputed from local government offices. Control rooms of line departments and Taluka EOCs (located at the Office of Mamlatdar) are active from 1 st June 2024 for Monsoon Season and will be operational till 31st November 2024. The Liaison Officers of the respective Talukas shall take charge of the Control Room. The respective Liaison Officers shall coordinate between the task group members working at disaster sites and TEOC for mobilization of resources and dissemination of instructions received from TEOC/DEOC.

- **Response planning, preparedness, assumption – Quick assessment of damages /need**

- **Response planning:**

Response planning can help mitigate the destructive effects of a disaster by ensuring timely and effective provisions of humanitarian aid to those most in need. “Time spent in disaster response planning equals time save when a disaster occurs”. Effective response planning requires realistic identification of likely response functions, assignment of specific tasks to individual response agencies, identification of equipment, supplies and personnel required by the response agencies for performing the assigned tasks.

Considering all these points, this response plan has been developed. For the first time Incident Command System (ICS) has also been introduced in response plan along with the resource inventory that is directly linked to the website. In fact, during disaster the ICS management tool will be more effective to handle the situation in proper way within limited time. The plan incorporates multi-level institutional as well as Response plan mechanism at district level.

- **Preparedness:**

Preparedness measures go hand in hand for vulnerability reduction and rapid professional response to disasters and assist all the government departments to plan and prioritize preparedness activities while ensuring active community participation. Preparedness actions are to be taken before a disaster to reduce the probability of a disaster (risk reduction) or the level of damage (vulnerability reduction) expected from a possible disaster. Vulnerability reduction is given priority over a risk reduction that is preparedness.

The main objectives of various preparedness measures are:-

- Minimizing the loss of human lives.
- Minimizing the loss of livestock.
- Minimizing the loss to property and infrastructure.
- Minimizing ill effects on the health of affected population.
- Bringing the human activities in the locality to normal condition soon after.

In situations of emergency, the District Collector will use his own discretion on the preparedness measures for facing the impending disaster.

- **Situation Assumptions:**

- There would be a congestion in the network because of increased calls to control rooms due to panic created in the community.
- The initial reports on damage may not give a clear picture of the extent of damage to communication network.
- The affected site may cut off from the state control rooms and the officials on site and find difficulty in communicating to the District/State EOC.
- Police wireless network will only be there liable communication network till the other communication networks are fully restored.
- Local community task forces will initiate search and rescue at residential level.
- Spontaneous Volunteers and QRT will require coordination
- Access to affected area will be limited
- Some site may be accessible only through air route

- Most of the buildings would be damaged and would not remain safe for citizens.
- Many structures would be damaged and there would be an urgent need to evacuate.
- There would be panic, and people will gather at a place.
- The crowds may go out of control or Riots may also take place.
- Emergency Medical services will be required by affected population.
- Likely outbreaks of epidemic diseases after the disaster.
- Hospital services would be affected.
- Existing water storage bodies will be damaged and unusable.
- There would be an urgent need of water to assist victims in rescue operation.
- Breakdown of sanitation system.
- Contamination of water due to outflow from sewers or due to breakage of water pipelines.
- The communication with affected area may be partially impaired.
- The movement of relief supplies will create congestion in the transportation services.

➤ **Quick Assessment of Damages and Need:**

Various spatial data with socio-economic, housing, infrastructure and other variables that can provide a quick assessment of the risks and vulnerabilities of disasters based on which appropriate mitigation strategies can be developed. Based on primary data...

- IC will call and activate the District Quick Response Team. Will done Quick Assessment of the S& R operations through Aerial surveys.
- The Nodal Officer from Police will activate the Quick Response teams and will done Quick assessment of law-and-order situation in affected areas.
- GWSSB nodal officer will activate their quick response teams for Quick assessment of water line damage and Quick assessment of water contamination levels and taking steps to restore clean drinking water.
- Chief Officers, TDOs and Taluka Mamlatdars will do Quick assessment of damaged areas and areas that can be used for relief camps for the displaced population. Coordinate with the Government agencies for quick assessment of evacuation needs such as the number of people to be evacuated and mode of evacuation
- DDO of district will make a quick assessment of the damages and losses caused by the disaster in the affected area as regards the population, agriculture, infrastructure, livelihoods and environment.
- DEOC will Instruct Quick Assessment Task Force to submit preliminary need and loss assessment report of the affected areas.

6.5 Warning Dissemination

The dissemination of warning is the most critical function to give early warning to the community. It must be fast to give a reasonable amount of time to communities to prepare for any eventuality consideration must be given to the points mentioned below before sending across the information.

- Warning dissemination will be done to all the important stakeholders (as given below in the information dissemination format) at the Panchayat level in rural areas and Nagarpalika level in urban areas for early warning communication.

- Making use of the fastest means to communicate the message in the most lucid manner to prevent spread of rumour and panic among the masses. Bulk Voice SMS Service is the best means of communication to large masses without any effort and within no time. A voice recorded message from the District Magistrate from official number shall be sent to the database of numbers identified for information dissemination with the help of Mobile service providers & Telephone department.
- DEOC will incorporate to arrange dissemination of information through various means of communication such as Radio, TV, Cable Network, and SMS about warnings to districts/areas which are likely to be hit by disasters.
- Dist. Collector and Information Dept. Will Ensure dissemination of information to remote areas by local means. They will also ensure that local TEOC help lines are opened and effectively managed for public information, guidance and rumour control.

As soon as the warning of an impending calamity is received, the EOCs at the State, District and Block levels will be on a state of alert. The Incident Commander will take charge of the EOC and oversee the dissemination of warning to the community. The District Collector will inform the District Disaster Management Committees who will alert the block and Village level DMCs and DMTs to disseminate the warning to the community.

6.6 Resource Mobilization

Taluka authority will try their best to contain the situation with the available local resources. However, if they find that the situation is beyond their control and the district level resource mobilization is required, they will seek the help of their superiors or call the meeting of Disaster Management Committee.

Through online SDRN and IDRN computerized and web-based IT solutions can be used for resource mobilization and deployment of trained members. This decentralized system presents many advantages such as the easy availability of the resources and plans at all levels, minimum duplication and time saving and finally the visual data reports generation that assists in gap analysis and resource mobilization.

6.7 Seeking External Help for Assistance

TEOC will inform DEOC if external help/resources are needed. The District Collector will decide if any external help (out of district) is required for immediate priorities. If required, liaise with the state, national and international agencies for mobilization of additional resources and will make arrangement to avail the external helps to manage to disaster.

6.8 First Assessment Report

DEOC instructs Quick Assessment Task Force to submit preliminary need and loss assessment report of the affected areas. Quick assessment Team will submit First Assessment Report to District Collector duly signed by Taluka Liaison Officer. DEOC will collect preliminary first assessment report from the onsite EOCs and submits district's compiled report to State EOC.

To make a first assessment report of damage, the assessment report will contain the following basic elements or activities...

- Human and material damage
- Resource availability and local response capacity
- Options for relief assistance and recovery
- Needs for national / international assistance

6.9 Media Management /Coordination/ Information

➤ Dissemination Media Management:

The role of media (print & electronic), in informing the people and the authorities during emergencies becomes critical, especially the ways in which media can play a vital role in public awareness and preparedness through educating the public about disasters; warning of hazards; gathering and transmitting information about affected areas; alerting government officials, helping relief organizations and the public towards specific needs; and even in facilitating discussions about disaster preparedness and response. During any emergency, people seek up-to-date, reliable and detailed information. Collector office Rajkot has established an effective system of collaborating with the media during emergencies. Both print and electronic media are regularly briefed at predetermined time intervals about the events as they occur and the prevailing situation on ground. A similar set up is also active at the Taluka Control room at Mamlatdar office.

Information dissemination and Coordination:

Dissemination of information is the prime duty of the information department in coordination with DEOC, Revenue and District Panchayat offices during any emergency. Functions of information department during Emergency are...

- Collect correct information from authorities onsite.
- Keep the list of persons rescued with full details.
- Keep the list of persons missing.
- Keep the no. of dead bodies and the locations they have been kept.
- Keep a track of which team is positioned with location.
- Make use of the public address system to call anyone.
- Schedule working in short duration Evacuation & Shelter.
- Establish Press Centre for media management and information dissemination
- Ensure that the information to media/public about the response of the State Government is released in an organized manner.
- Organize media briefing twice a day at predetermined intervals.

6.10 Emergency Response Functions:

(Evacuation, Search and Rescue, Cordoning the area, Traffic control, Law & order and safety measures, Dead body disposal, Carcass disposal)

Effective response planning requires realistic identification of likely response functions, assignment of specific tasks to individual response agencies, identification of equipment, supplies and personnel required by the response agencies for performing the assigned tasks. Response functions essentially outline the strategy, resources needed, evacuation, search & rescue, etc.

➤ **Evacuation:**

In many emergencies, local authorities would set up public shelters in schools, municipal buildings and places of worship. While they often provide water, food, medicine and basic sanitary facilities.

➤ **Search and Rescue:**

At district level, whatever help is required during disaster that will be immediately informed to the various departments by the district collector and possible support NGOs and other line agencies in the district would be tapped up. If the District Collector thinks that it cannot cope with the disaster, then he can ask for help from the defense and paramilitary force.

➤ **Cordoning the area:**

The SDM and Police department will be cordoning affected areas for restricting entries of rail or road traffic and instructing cordon affected areas and setting up check posts to control entry and exit. The DSP will send instructions for the cordoning from the area. People should not be allowed access anywhere close to the site of the disaster.

➤ **Traffic control:**

The Superintendent of Police will co-ordinate the work of Traffic control and Traffic arrangements towards the disaster affected areas. Traffic cells also have responsibility for the ground transportation of personnel, supplies, and equipment and make alternate arrangements to open the roads to traffic at the earliest.

➤ **Law & order and safety measures:**

Collectorate and SP office are responsible for assuring the execution of all laws and maintenance of order in the area affected by the incident. The law-and-order section incorporates law and order taskforce which may be created to deal with a disaster with sufficient safety measures. It will arrange law and order against theft in the disaster affected area and co-ordinate with the search and rescue operations. It will also arrange for security at the relief camps/relief material storage. It is also responsible to maintain law and order at the time of distribution of relief material.

➤ **Dead body disposal:**

The health department will immediately start the procedure for postmortem of dead people as per the rules. Disposal of dead bodies is to be carried out to prevent the outbreak of epidemics. Arrangement should be made to issue death certificates of the deceased to the relatives.

➤ **Carcass disposal:**

The animal husbandry departments with necessary equipment in case of cattle death are there in the affected areas for the disposal of carcass with a view to restoration of public life and result oriented work.

6.11 Humanitarian Relief and Assistance:

[Food, Drinking Water, Medicines, Trauma care, Clothing, Other essential needs, Shelter Management, Providing helpline, Repairs and restoration of basic amenities (e.g. water, power, transport etc.), Management of VIP visits]

The Indian government uses the terms “humanitarian assistance” or “disaster relief” to refer to activities that address human suffering caused by natural

disasters like cyclones, droughts, earthquakes or floods. Humanitarianism lies at the heart of Indian spiritual and cultural values. Hinduism, Buddhism, Islam and Sikhism all espouse solidarity with the suffering and giving without expectations for return. The Hindu term path for example, emphasizes the self-less nature of giving. In fact, the sacred Hindu scripture Bhagavad Gita preaches that “there should be no motive in charity and there should be no aim, direct or indirect”. These spiritual traditions influence the humanitarian impulses of Indian decision makers. India conceives humanitarian assistance as “extending sympathy” to the disaster affected. Because of India’s deep cultural tradition of giving, the population generally endorses relief efforts by the government.

UN agencies and international NGOs operating in the country at the time of the disaster event will be allowed to provide humanitarian assistance to people in the affected area in coordination with the concerned Ministries/Departments and the State Government under existing protocol in place. Guidelines of the IFRC on international humanitarian assistance will be the guiding factor in facilitating external assistance. External assistance will be provided in a responsible and coordinated manner to minimize its impact on local resources as well as ensure good quality and accountability standards.

In case of large-scale emergency collector will establish relief coordination center at the airport, railway station, etc. for arrival of Search & Rescue and Medical Teams coming for humanitarian aid.

6.12 Reporting:

The occurrence of disaster may be reported by the concern monitoring authority to the District Collector by the fastest means. Based on reports from the District Collector of the occurrence of a disaster, the response structure of the State Government will be put into operation.

➤ Information management:

Control room is a nodal center in terms of disaster Management which performs the function of collecting and transmitting information to the appropriate places and people. Therefore, the Control room must be equipped with the latest telecom communication facilities. All the important information about the district administration in case of emergency is also available in the control rooms. The control room relates to all the line departments, collectorate, NGOs, police control room, and block control room which is connected to village task force and irrigation control room. Collector controls all the information flow through the control room in the district and with the state authority.

➤ Situation reports:

All the situation reports of area, village, city or taluka received at the SDM or DEOC will be communicated to the Nodal officer, who based on the available information, if it seems fit, will activate DEOC in the emergency mode.

Resident Additional Collector will report the occurrence of emergencies to Collector, Relief Commissioner, GSDMA and SEOC. By receiving through Taluka Control rooms, DEOC will constantly report pre and post disaster work to SEOC and GSDMA.

Village Talatis are responsible for submitting the situation/action report immediately to Mamlatdar and TDO. Mamlatdars, TDOs and Chief Officers are responsible for communicating the immediate emergency as well as updated situations to Liaison officers, SDMs and Resident Additional Collector and detail reports should submit to DEOC in time manner.

Death, Casualty, Emergency & Primary reports should submit immediate with Top Priority in Primary Situation Report format developed by SEOC. ABCD, MHA, Detail Emergency update reports should submit on Daily Basis by Taluka Mamlatdar and District Panchayat to DEOC and the same compiled report should be reached to SEOC.

➤ **Media Release:**

The State Government has established an effective system of collaborating with the media during emergencies. At the State Emergency Operation Centre (SEOC), a special media cell has the nature of giving. In fact, the sacred Hindu scripture Bhagavad Gita preaches that “there should be no motive in charity and there should be no aim, direct or indirect”. These spiritual traditions influence the humanitarian impulses of Indian decision makers. India conceives humanitarian assistance as “extending sympathy” to the disaster affected. Because of India’s deep cultural tradition of giving, the population generally endorses relief efforts by the government.

UN agencies and international NGOs operating in the country at the time of the disaster event will be allowed to provide humanitarian assistance to people in the affected area in coordination with the concerned Ministries/Departments and the State Government under existing protocol in place. Guidelines of the IFRC on international humanitarian assistance will be the guiding factor in facilitating external assistance. External assistance will be provided in as possible and coordinated manner to minimize its impact on local resources as well as ensure good quality and accountability standards.

In case of large-scale emergency collectors establish relief coordination centers at the airport, railway station, etc. for arrival of Search & Rescue and Medical Teams coming for humanitarian aid.

6.13 Demobilization and Winding up:

An emergency plan is not complete without specific demobilization and post-incident winding up review procedures. Specific demobilization guidelines provide organized and agreed- to procedures to help facilitate and more organized and expedited return to normal operating conditions and help to minimize costs by standing down response resources in timely manner.

Issues to consider for demobilization include: 1. Do not release or demobilize response resources unless approved by the On-Scene Incident Commander, 2. Assign personnel to identify surplus resources and probable resource release times, 3. Establish demobilization priorities, 4. If necessary, develop a Disposal Plan for the disposal of hazardous materials or wastes, as necessary and 5. Plan for equipment repair and maintenance services, as necessary.

(i) Documentation:

Documentation of an emergency incident is a critical part of an emergency plan. The documentation must be specific to the incident. However, the following topics can provide guidance as to necessary documented information: 1. When/where did an incident take place, 2. Was an evacuation called for, and if so, how much time was required to evacuate all personnel? 3. Were communication methods effective? 4. Did on-site equipment satisfy equipment needs? If not, what additional equipment was brought to the site? 5. Did local jurisdictions assist in the emergency response? If so, did they offer suggestions for improvement?

(ii) Success stories:

Developing a success story requires the right questions, through the eyes of an

individual or several individuals, of positive impact. The key questions and steps are as follows. 1. Provide Background Information, 2. Describe the activity, 3. Give Details of What Happened in the Activity, 4. Give the Results Achieved because of the Activity, 5. Give a Quote from the Participant, 6. Labeling Pictures and Writing Captions.

(iii) Lessons for future

Each organization will provide activities undertaken and lessons learned report during any disaster response operations. The lessons learnt from the past will be utilized while updating the plan, formulating DM strategy, for future references and for training purposes.

::CHAPTER-7::

::Recovery Measures:

Recovery is defined as decisions and actions taken after a disaster with a view to “restoring or improving life and assets of the stricken community, while encouraging and facilitating necessary adjustments to reduce disaster risk. Recovery and reconstruction (R&R) or comprehensive rehabilitation is the last step in cycle of disaster management. In addition, this is the phase of the new cycle, where the opportunity to reconstruct and rehabilitate should be utilized for building a better and more safe and resilient society.

7.1 General Policy Guidelines:

A plan for recovery will help better coordination between various development agencies. Damage Assessment and Needs Assessment shall be the basis of recovery planning. Various Sectors for recovery process may be -

- Essential Services- Power, Water, Communication, Transport, Sanitation, Health
- Infrastructural: Housing, Public Building and Roads
- Livelihood: Employment, Agriculture, Cottage Industry, Shops and Establishments

Basic services such as power, water supply, sanitation, wastewater disposal etc. should be restored in the shortest possible time. Alternate arrangement of water supply, temporary sanitation facilities can be sought with the help of special agencies. Special arrangements for the provision of essential services should be ensured. It can include creating temporary infrastructure for storage and distribution of water supply, running tankers, and power supply and sanitation facilities.

The approach to re-construction and recovery is guided by the National Disaster Management Policy 2009 of which salient clauses / sections are stated in the following para.

Section 9.1.1 of the NPDM states that - the approach to the reconstruction process must be comprehensive to convert adversity into opportunity. Incorporating disaster resilient features to 'build back better' will be the guiding principle. The appropriate choice of technology and project impact assessment needs to be carried out to establish that the projects contemplated do not create any side effects on the physical, socio-cultural or economic environment of the communities in the affected areas or in their neighborhood. Systems for providing psycho-social support and trauma counseling need to be developed for implementation during reconstruction and recovery phase.

Section 9.2.1 of NPDM states that - Reconstruction plans and designing of houses need to be a participatory process involving the government, affected community, NGOs and the corporate sector. After the planning process is over, while owner driven construction is a preferred option, contribution of the NGOs and corporate sector will be encouraged. The reconstruction program will be within the confines and qualitative specifications laid down by the Government.

Section 9.3.1 states - Essential services, social infrastructure and intermediate shelters/camps will be established in the shortest possible time. For permanent reconstruction, ideally, the work including the construction of houses must be completed within two to three years. Concerned, Central Ministries/Departments and the State Governments should create dedicated project teams to speed up the reconstruction process.

Section 9.3.2 of NDMP states - that - Contingency plans for reconstruction

in highly disaster-prone areas need to be drawn out during the period of normalcy, which may include architectural and structural designs in consultation with the various stakeholders.

As per the section 9.5.1 of NPDM – the State governments will have to lay emphasis on the restoration of permanent livelihood of those affected by disasters and special attention to the needs of women-headed households, artisans, farmers and people belonging to marginalized and vulnerable sections.

7.2 Detailed damage and loss assessment

The moment an emergency condition subsides, rapid and thorough Detailed damage and loss assessment is to be conducted to know the overall damage to critical public facilities, homes, businesses and other services within the affected area(s); and to determine whether those damages are sufficient to warrant emergency assistance.

A detailed assessment must be conducted before commencing reconstruction and rehabilitation activities. The relevant Government departments and local authorities shall initiate detailed assessment at their respective level for damage sustained in housing, industry/services, and infrastructure, agriculture, health / education assets in the affected regions. Immediate recovery can continue from a day to two months, depending upon the extent of damage.

The assessment teams are to report the following information to the Disaster Management Department in the Office of Collectorate for further action.

- | | |
|---|---|
| ☐ Boundaries of the disaster(s). | ☐ Access point(s) to the disaster area(s). |
| ☐ Status of the transportation system. | ☐ Status of communication system |
| ☐ Disaster casualty information | ☐ Status of medical systems |
| ☐ Shelter / mass care information | ☐ Damage to utility system |
| ☐ Status of critical facilities | ☐ Status of security within the affected area(s) |
| ☐ Information on the humanitarian organisations within the area(s) | |

Conducting Detailed damage and loss assessment in the aftermath of severe incident includes Individual damage assessment as well as Public Damage assessment which includes (but not limited to) 1. Damage to road, streets and bridges, 2. Damage to water control facilities such as drainage system, water channel etc., 3. Damage to public buildings and equipment, 4. Damage to public utilities, 5. Damage to parks and recreational sites and 6. Managing Debris.

Recovery has two phases, i.e. short term and long-term Recovery. Class I officers from various line departments are deputed as Liaison Officers for each Taluka, and they are responsible for monitoring and working with the local administration in both phases of recovery operations under the guidance of the District Collector.

7.3 Short-term Recovery Programme:

The short-term recovery phase starts during the first hours and days after an emergency event. The principal objectives are to restore the necessary structural [facilities, critical systems/ infrastructure, roadways and grounds] and non-structural, (power, water, sanitation, telecommunications).

The Short-term recovery with urgent measures to be undertaken includes the following:

- a) Roads and Bridges: This covers construction of all critical roads and bridges necessary to provide connectivity with immediate effect.
- b) Drinking Water Supply: Restoration of Drinking Water supply must be done

by setting up of new hand pumps, tube wells or setting up of piped water supply in areas with no access to potable water. In case of floods, setting up of raised hand pumps is required.

- c) Electricity: Restoration of power supply is also critical to immediate recovery.
- d) Communication Network: After disasters, communication networks may be disrupted. The networks of mobile services providers must be put back in operation at the earliest to make search and rescue easier, as well as to expedite coordinated response measures.
- e) Reconstruction & Repair of Lifeline Buildings: Lifeline buildings are those necessary to keep the administrative machinery functioning despite the damage by disaster must be repaired on priority.
- f) Rehabilitation: In case there is a major damage from earthquake or flooding, a large segment of the population may have to be rehabilitated to new locations on a temporary basis. Communities will have to be supported with relief shelter.
- g) Mass Care/Sheltering and Housing: The management of relief shelters is continued from the response phase to the immediate recovery phase. During this period, the number of victims must be identified for whom construction of houses under Indira Aawas Yojna & Sardar Awas Yojna shall be sanctioned.
- h) Food: Supply of food in relief phase is more important. It becomes important to elicit support from various NGOs, Grain merchants and volunteers.
- i) Debris Removal and Disposal of Dead Bodies: Removal of debris or trees from transportation routes for effective rescue and relief measures.
- j) Drainage and Sewage: Drainage and sewage systems will have to be quickly re-established to decrease inundation from floods, spread of diseases and epidemics and maintaining hygiene.
- k) Health Care: First Aid and Emergency Health care must be provided at the earliest. In case the health care centres are affected by the disaster, temporary medical relief camps need to be installed while the building is retrofitted or reconstructed. Mobile Medical Units must be pushed into action for immediately health care close to the community.

7.4 Long-term Recovery Programme:

Long-term recovery efforts must focus on redeveloping and restoring the socio-economic viability of the disaster area(s). The reconstruction phase requires a substantial commitment of time and resources by government and non-governmental organizations. It is important to note here that much of this commitment would be beyond the scope of traditional emergency management activity programs. The activities involved would most often be the result of a catastrophic event that has caused substantial, long-term damage over a very large area. These efforts include:

1. Long term reconstruction of public infrastructures and social services damaged by the disaster.
2. Re-establishment of adequate housing to replace that which has been destroyed.
3. Restoration of jobs that was lost.
4. Restoration of the economic base of the disaster area.

::CHAPTER–8::

::Financial Arrangements::

To ensure the long-term sustenance and permanency of the organization funds would be generated and deployed on an ongoing basis. There are different ways to raise funds in the State as described below.

8.1 Financial Resources for Implementation of Plan:

(According to ACT No. 53 of 2005 – the Disaster Management Act, 2005, Chapter IX, Finance, Account and Audit.) 48-Establishment of funds by the State Government:

The State Government shall immediately after notifications issued for constituting the State Authority and the District Authorities, establish for the purposes of this Act the following funds, namely: -

- a) the fund to be called the Disaster Response Fund.
- b) the fund to be called the Disaster Mitigation Fund.

(i) National, State and District Disaster Response Fund:

- * The Ministry of Finance has allocated funds for strengthening Disaster Management Institutions for capacity building and response mechanisms, as per the recommendation of 14th Finance Commission.
- * To carry out Emergency Response & Relief activities after any disaster the State Disaster Response Fund is made available to Commissioner of Relief, Revenue Department under which the Central Government will share 75% and the Govt. of Gujarat must share 25%.
- * To provide for relief for famine, drought, floods and other natural calamities, Response Fund are provided in the state budget under the head “2245-Relief on account of Natural Calamities”. Besides establishment charges, funds are provided for the grant of gratuitous relief in the shape of concessional supply of food, cash payment to indigent persons, cash doles to disabled supply of seed, fodder, medicines, prevention of epidemics, provision for drinking water, transport facilities for goods and test relief works as at District level.

(ii) National, State and District Disaster Mitigation Fund:

- * At the National level, Prime Minister’s Relief Fund was created shortly after Independence with public contribution to provide immediate relief to people in distress for Disaster Mitigation:
 - a. Immediate financial assistance to victims and next of kin.
 - b. Assist search and rescue.
 - c. Provide Health care to the victims.
 - d. Provide Shelter, food, drinking water and sanitation.
 - e. Temporary restoration of roads, bridges, communication facility and transportation.
 - f. Immediate restoration of education and health facilities.
- * At the state level, provisions have been made to provide immediate support to the distressed people affected by natural calamities and road, air and

railways accidents under the Chief Minister's Relief Fund for Disaster Mitigation.

(iii) Financial sources available for different components of disaster management

Name	Purpose	Financial Arrangements	Activities	Nodal Agency
NDRF(NCCF)	Relief Assistance	100%Central Government	Cash and kind relief	Revenue Department
SDRF (CRF	Relief Assistance	75% Centre, 25% State	Cash and kind relief	Revenue Department
Planning Commission (14thFinance Commission)	Capacity Building	100%Centre	Training, Awareness Generation, IEC Material, Mock drills.	Revenue Department
State Fund	Capacity Building	100%State	Training, Awareness Generation, IEC Material, Mock drills.	GSDMA
Line Department Funds	Preparedness and Mitigation	Budgetary Allocation	Activities falling in purview of departments for DRR, Preparedness and Mitigation	Line Departments
District Planning Fund	Any Public works	MP and MLA aid and grants	Preparedness, Mitigation capacity building, recovery	Local Bodies, Line Departments
External Institutional Funding	Projects on DRR, Recovery, Mitigation and Preparedness	Total external or bilateral or multilateral arrangements	Infrastructure up-gradation Technological interventions and technical studies DRR projects.	Revenue Department
Donor	Any	Total Donation in cash and kind	Any	DDMA/ GSDMA
CSR	Corporate	2%ofProfit	Any	Charity Commissioner And Corporate
Appeal	Immediate Relief	Fully or partially external funds	Immediate relief, reconstruction	DDMA/ GSDMA

(iv) **Disaster Insurance:**

The Insurance Regulatory and Development Authority (IRDA), India has framed micro insurance regulations that allow distribution of micro insurance products in the state. The regulations cover insurance for personal accidents, health care for individuals and family and assets like houses, livestock, tools and others. In states, various Ministries/ Department have their insurance schemes related to health, crops, livestock, and other which can be utilize in case of disaster. There is a need to further promote more locally customized and farmer/trader friendly weather-based crop / agri-business insurance packages. Besides, insurance policies on behalf of the in-risk population, likely by municipal agencies, institutions/establishments or other premises, can be thought of according to the Public Liability Insurance Act 1991 (i.e., for hazardous industries).

::CHAPTER-9 ::

::Maintenance of Plan::

Plan maintenance is a dynamic process of updating the plan on a periodic basis. The backbone of maintaining the plan is carrying out mock drills and updating the plan based on lessons learnt thereof. This is a method of identifying the gaps and putting in place a system to fill the same. Regular updating of stakeholder details, contact numbers and resource inventory is another inherent and essential function of plan maintenance.

9.1 Authority for Maintaining and Reviewing the Plan:

(According to ACT No. 31 of 2005 – The Disaster Management Act, 2003, Chapter IV, District Plan.) the District Plan. -

- There shall be a plan for disaster management for every district of the State.
- The District Plan shall be prepared by the District Authority, after consultation with the local authorities and having regard to the National Plan and the State Plan, to be approved by the State Authority.
- The District Plan shall be reviewed and updated annually.
- The copies of the District Plan referred to in sub-sections (2) and (4) shall be made available to the Departments of the Government in the district.
- The District Authority shall send a copy of the District Plan to the State Authority which shall forward it to the State Government.
- The District Authority shall, review from time to time, the implementation of the Plan and issue such instructions to different departments of the Government in the district as it may deem necessary for the implementation thereof.

The Plan should be maintained and reviewed regularly, based on input as under:

- (a) Drills and Rehearsals
- (b) Recommendations from all Depts. in their Annual DM Report
- (c) Lessons learnt from Disasters in other Districts, States and countries
- (d) Directions from GSDMA, Ministry of Home Affairs, NDMA, Government etc...

(i) Schedule for Updation & Revision of Plan,

DDMC shall compile its learning and propose new mechanisms for improvement in updation of plan for the capacity to deal with disasters.

Schedule for updation of plan: Every year as a part of pre monsoon, DDMC will update plan in the month of May-June and will revise in the month of October-November every year.

(ii) Schedule for Mock Drills

The district police department, home guards, Civil Defense personnel, Fire Service officials, SRTs, QRTs, DMCs and DMTs will undergo periodic mock drills for different disasters, coordinated by the District Collector at the district level and by the Relief Commissioner at the State level. It is mandatory to have mock-drills at least twice a year for fire and earthquake.

Major Learning based on experience of last disasters and mock drills (on planning/implementation/compliance)	Revisions adopted/proposed	Remarks
Flood	May-June	Highly affected area of the district
Chemical disaster	Jan, Feb	Due to MAH unit (Under Factory act-1947)

Certified/ Approved by _____ Collector, Rajkot.

::CHAPTER–10::

::GUIDANCE FOR MASS RESCUE OPERATIONS::

Introduction The Incident Response System (IRS) is a system of management by objectives through the Incident Action Plan (IAP). It takes care of any expanding incident through an organizational structure of Command Staff, Sections, Branches, Divisions, Groups, Units, resources and span of control, called Incident Response Team (IRT).

As per NDMA's IRS guidelines, IRT at District, Sub-Division, Tehsil and Block level should be constituted under the written directives of District Magistrate (DM). These teams will include experienced officers / employees at all levels and respond to all natural and man-made disasters. The lowest administrative unit (Sub-Division, Tehsil or Block) will be the first responder. IRT at all levels will have the same structure, i.e. IC supported with Operations, Planning and Logistics Sections. The IRTs are to be pre-designated at all levels.

1 A mass rescue operation (MRO) is one that involves the need for immediate assistance to large numbers of persons in distress such that capabilities normally available to search and rescue (SAR) authorities are inadequate.

2 Fortunately, MROs are relatively rare compared to normal SAR operations, but major incidents leading to the need for MROs have not been infrequent on a world-wide basis and can occur anywhere at any time. Since the nature of such operations may be poorly understood due to limited chances to gain experience with major incidents involving MROs, this Guidance begins with a general discussion of MROs and related matters.

3 Flooding, earthquakes, terrorism, casualties in the offshore oil industry, accidents involving releases of hazardous materials and major aircraft or ship incidents are examples which, because of their magnitude, may need to use the same resources as would be needed to carry out mass maritime aeronautical rescue operations.

4 The sequence of priority in major multi-mission incidents must be lifesaving first, generally followed by environmental protection, and then protection of property.

5 Moral and legal obligations, as well as public and political expectations, drive the need to be prepared to carry out MROs safely and effectively should they become necessary. Since the need for MROs is relatively rare, it is difficult to gain practical experience to help deal with them. While the types of potential MRO scenarios, as well as the organizations, emergency response structures and circumstances vary from place to place, there are certain general principles, common actions and examples that can be followed based on lessons of history, which this Guidance is intended to convey.

6 MROs are relatively low-probability high-consequence events. Effective response to such major incidents typically requires immediate, well-planned and closely co-ordinated large- scale actions and use of resources from multiple organizations. Intense and sustained high priority lifesaving efforts may need to be carried out at the same time and place as major efforts to save the environment and property. Huge amounts of selected information will need to be readily available at the right times and the right places not only to support the response efforts, but to meet the needs of the media, public and families of the persons in distress, which may number in the hundreds or thousands. Many means of communications will need to be available and interlinked amongst organizations at various levels to handle huge amounts of information reliably for the duration of the response. A surge in the numbers of competent staffing in all key organizations must be available immediately and be sustainable for up to weeks at a time. Equipment and logistics demands will jump to unprecedented levels. Successful MROs depend on the advance provision of flexible and all- level contingency plans. Intense integrated planning and operational efforts must also be carried out in real time throughout actual rescue efforts.

7 All who will be involved in the overall multi-agency, multi-jurisdiction, multi-mission and possibly international response to a major incident will need clearly understand who is in charge, how to work with who is in charge, the respective roles of all involved, and how to interact with each other. SAR authorities may be responsible for all, or part, of the MRO responsibilities of the major incident response, and will be able to co-ordinate their efforts seamlessly with other incident responders under overall direction of another authority within or outside their agency. The broader response environment may involve hazards mitigation, damage control and salvage operations, pollution control, complex traffic management, large-scale logistics efforts, medical and coroner functions, accident-incident investigation, intense public and political attention, etc. MRO plans need to be part of and compatible with overall response plans for major incidents. Plans must typically allow for command, control and communications structures that can accommodate simultaneous air, sea and land operations.

8 Potential disastrous consequences of poor preparations for MROs in terms of loss of life and other adverse results are enormous. Major incidents may involve hundreds or thousands of persons in distress in remote and hostile environments. A large passenger ship collision, a downed aircraft, or a terrorist incident could, for example, call for the immediate rescue of large numbers of passengers and crew in poor environmental conditions, with many of the survivors having little ability to help themselves, and the dire results of failure are evident.

9 Preparedness to mount an extraordinarily large and rapid response is critical to preventing large-scale loss of lives. Such preparedness often depends on strong and visionary leadership and unusual levels of co-operation to achieve. There will often be strong resistance to paying the inherently high price in terms of time, effort and funding that preparedness for major incidents entails, particularly as they are rare events. The required levels of co-operation, co-ordination, planning, resources and exercises, required for preparedness are challenging and do not happen without the requisite commitment of SAR authorities, regulatory authorities, transportation companies, sources of military and commercial assistance and others.

10 SAR authorities should co-ordinate MRO plans with companies that operate ships and aircraft designed to carry large numbers of persons. Such companies should share in preparations to minimize the chances that MROs will be needed, and to ensure success if they are.

11 MRO planning, preparations and exercises are essential since opportunities to handle actual incidents involving mass rescues are rare. Therefore, the exercising of MRO plans is particularly important. Appendix 1 provides guidance on planning and conducting such exercises.

12 The provisions of this document are intended to provide general guidance to authorities and organizations responsible for ensuring that MROs, should they be necessary, are successful.

13 For a situation involving large numbers or persons in distress, on scene responsibilities for the safety of passengers and crew will be shared by the OSC and the aircraft pilot in command or ship master, with the pilot or master assuming as much of this responsibility as possible before or after the aircraft or ship is abandoned.

14 Pilots and masters are responsible for manoeuvring the aircraft or ship as feasible and appropriate. They also have overall responsibility for safety, medical care, communications, fire and damage control, maintaining order and providing general direction.

15 Unless a ship appears to be in imminent danger of sinking, it is usually advisable for passengers and crew to remain on board if it is safe to do so.

16 In the case of a downed aircraft, whether passengers would be safer on board should be assessed for each situation. Usually, they should promptly evacuate the aircraft at sea. On land this decision must account for the conditions of the aircraft and the environment, expected time to rescue or aircraft repair, and whether required passenger care can be best provided inside the aircraft.

17 The OSC will normally be designated by an SMC. An OSC may be able to handle certain communications on scene and with appropriate remote authorities to help free the pilot or master to retain the integrity of his or her craft. However, these persons are themselves in need of assistance, and anything the OSC can do to help them should be considered, bearing in mind that the OSC's main duty is co-ordinating SAR facilities and rescue efforts under the SMC's general direction.

18 It is important to minimize unnecessary communications with the master of a ship or pilot in command of an aircraft in distress, and this should be considered in advance planning. Exchanges of information during joint planning by use of SAR Plans of Co-operation (see MSC/Circ.1000 or its superseding circulars) and other means will reduce the need to ask the pilot or master for this information one or more times during a crisis. People or organizations that want this information should be directed to a source ashore or on the ground that is prepared to handle what could be many requests.

19 High priority should be given to tracking and accounting for all persons on board and all lifeboats and rafts, and efforts to keep them together will help in this regard. Availability of accurate manifests and accounting is critical. The need to relocate survival craft and check for persons in them can waste valuable resources. One option is to sink survival craft once the persons in them have been rescued; however, the potential that other survivors may find and need the craft should be considered.

20 Navy ships are often better equipped than commercial vessels for retrieving people who have abandoned a ship or aircraft, and use of any such ships should be considered.

21 Helicopter capabilities should be employed if available, especially for retrieval of weak or immobile survivors. Lifeboat crews should be trained in helicopter hoist operations. Lowering a rescue person from the helicopter to assist survivors may be viable.

22 Ship companies should be encouraged to equip large passenger ships and possibly other types of vessels with helicopter landing areas, clearly marked hoist-winch areas, and onboard helicopters to facilitate more direct transfers of numerous persons.

23 If a ship with a large freeboard cannot safely retrieve survivors from the water or survival craft, it may be possible to first retrieve them onto small vessels and then transfer them to progressively larger ones.

24 Depending on the circumstances, it may be safer to tow survival craft to shore without removing the occupants at sea. Lifeboats could be designed to support passengers for longer periods of time, and to be able to reach shores on their own from longer distances offshore.

25 To the extent practicable, MROs should be co-ordinated by an SMC in an RCC. However, depending on the magnitude, nature and complexity of a mass rescue incident, the rescue efforts may be better co-ordinated by an appropriate operations centre higher within the SAR agency or a government. Considerations in this decision might include, among others:

- extensive rescue support by organizations other than those commonly used for SAR.
- need for heavy international diplomatic support; and
- serious problems in addition to potential loss of lives, such as environmental threats, terrorist actions, or national security issues.

26 The following factors should be considered in MRO planning:

- use the Incident Command System (ICS) or other effective means of handling multi-agency, multi-jurisdiction, multi-mission scenarios.
- identify situations within the SRR that could potentially lead to the need for MROs, including scenarios that might involve cascading casualties or outages.
- mobilisation and co-ordination of necessary SAR facilities, including those not normally available for SAR services.
- ability to activate plans immediately.
- call up procedures for needed personnel.

- need for supplemental communications capabilities, possibly including the need for interpreters.
- dispatching of liaison officers.
- activation of additional staff to augment, replace or sustain needed staffing levels.
- recovery and transport of large numbers of survivors (and bodies, if necessary), accounting for survivors potentially having injuries and lack of training, age limitation, hypothermia, etc.
- a means of reliably accounting for everyone involved, including responders, survivors, crew, etc.
- care, assistance and further transfer of survivors once delivered to a place of safety, and further transfer of bodies beyond their initial delivery point.
- activation of plans for notifying, managing and assisting the media and families in large numbers.
- control of access to the RCC and other sensitive facilities and locations.
- RCC backup and relocation plans, as appropriate; and
- ready availability to all potential users of plans, checklists and flowcharts.

27 At some point the ability of an RCC to continue to effectively co-ordinate the MRO and still handle its other SAR responsibilities might be overwhelmed, and another RCC or a higher authority may need to assume responsibility for the MRO.

28 With these possibilities in mind, MRO plans may provide for various degrees of response, along with criteria for determining which amount of response will be implemented. For example, as local SAR resources are exhausted, or from the outset, SAR resources may need to be obtained from distant national or international sources.

29 Experiences in responding to major incidents have resulted in other practical advice such as the following:

- plan and exercise how any agency receiving notification of an actual or potential mass rescue event can immediately alert and conference call other authorities that will potentially be involved, brief them, and enable immediate actions to be taken by all concerned (this will require identification of contacts in each agency that can be contacted on a 24-hour basis, and that have authority to immediately initiate actions and commit resources);
- co-ordinate all rescue operations effectively from the very beginning.

- begin quickly with a high level of effort stand down as appropriate rather than being too late with too little effort.
- use more capable resources like cruise ships for taking large numbers of survivors onboard.
- ensure that MRO emergency plans address communications interoperability or inter-linking.
- retrieve and protect debris as evidence for follow on investigation.
- put security plans in place to limit access to the RCC.
- arrange in advance to involve the Red Cross, chaplains, critical incident stress experts and other such support for human needs.
- identify senior agency spokespersons to protect the time of workers directly involved in the response and designated a senior official to provide information to families.
- clearly identify the point at which the SAR response (lifesaving) has ended, and the focus shifts to investigation and recovery.
- be prepared to use an ICS when appropriate.
- ensure that air traffic and air space can be and is controlled on scene.
- the SMC can often benefit from assigning additional liaison personnel on scene.
- anticipate development and needs and act early.
- ensure that the scopes of SAR plans and other emergencies or disaster response plans are co-ordinated to reduce gaps, overlaps and confusion about who is in charge and what procedures will be followed at various times and places.
- control access to the scene, including access by the media.
- work out in advance how private resources can be appropriately used to supplement other SAR resources.
- ensure that SAR plans provide for logistics support for large numbers of rescuers and survivors, including pre-arranged accommodations, if possible, and availability of food, medical care and transportation.

- consider requesting assistance from airlines and shipping companies other than the one whose aircraft or ship is involved in the incident and know the types of assistance that such organizations might provide.
- bar coded bracelets can be an effective means of identifying children before, during and after the emergency.
- attempt to reduce the burden on a pilot or master and crews.
- if safe and appropriate to do so, place a marine casualty officer on board to assist the master and SAR personnel.
- share capabilities, expertise and assets among government and industry to take maximum advantage of the strengths of each.

10.1 Communications

Communication plans must provide for a heavy volume of communication use, as a major incident will normally involve many responding organizations that need to communicate effectively with each other from the beginning. As necessary, advance arrangements should be made to link means of interagency communications that are not inherently interoperable. Interagency communications must be based on terminology that all involved understand.

Major incident co-ordination

1 Regardless of the magnitude and priority of the lifesaving efforts involved in responding to a major incident, if any other functions are being carried out concurrently on scene by other than SAR personnel, the overall response involving SAR and the other functions, e.g., firefighting, should be well co-ordinated.

2 If certain basic concepts and terms are recognized and understood by all emergency responders, they will be much better prepared to co-ordinate joint efforts.

3 Standard SAR procedures should typically be followed for the SAR part of the response, but these procedures will be largely independent of other efforts. Companies or authorities handling other aspects of the response will follow command, control and communication procedures developed for their respective organizations and duties.

4 The SAR system can function in its normal manner or use modified SAR procedures established to account for special demands of mass rescues, but it should be appropriately linked and subjected to a scheme for management of the overall incident response.

30 For major incidents, crisis management for the overall response may also be needed. The **Incident Command System (ICS)** is one simple and effective means of meeting this need. The ICS works best with some advance familiarization and exercising. Since SAR and transportation authorities are likely to encounter use of the ICS within emergency response communities, Appendix 3 provides general information for

familiarization with the ICS. The ICS is an example of an effective system used for emergency management and is a tool that can be used where no equivalent means of overall incident management is in place.

10.2 Industry planning and response

31 SAR authorities should co-ordinate MRO plans with companies that operate aircraft and ships designed to carry large numbers of persons. Such companies should share in preparations to minimize the chances that MROs will be needed and to ensure success if they are. Appendix 2 provides guidance on industry roles and discusses how companies could arrange for use of company field teams and emergency response centres as possible means of carrying out their MRO responsibilities. For passenger ships, SAR Plans of Co-operation are part of MRO plans.

10.3 Public and media relations

32 What the media reports may matter more than what SAR services do for shaping of public opinion about MROs. Importantly, the role of the media may be critical in shaping the actions of the public and those directly involved in the distress situation in a way that contributes to safety, success and panic control. There should be no unwarranted delays in providing information to the media. Information should be readily available, clear, accurate, consistent and freely exchanged among emergency responders and others concerned, such as the public and families of persons on board.

33 Identify spokespersons and outline what they will say, staying factual. If SAR services do not provide a public spokesperson for a major incident, the media will. Spokespersons should be cautious about speculating on causes of accidents and should inform the media that current operations are focused on saving lives.

34 Ensure that the media knows who oversees co-ordinating rescue operations.

35 A single spokesperson not directly involved in the incident can be valuable in relieving the IC and SMC of this duty.

36 Many entities are involved in a major incident, including ships, aircraft, companies and SAR services. Co-ordination is required to ensure that there is one message with many messengers. Interviews should be live if possible.

37 Prompt establishment of a joint information centre away from the SMC will help to achieve this goal. The centre can establish proper procedures for establishing what messages will be released to the public and how those messages will be released. Since the messages may be sensitive, it is critical that everyone communicates the same information. The centre can be responsible for co-ordinating information made available via the internet and perhaps establishing and maintaining public web site.

38 The media is a 24-hour global market, with news broadcast worldwide around the clock. The media will find a way to get to the scene for firsthand information, pictures and video. By providing transportation to the scene and controlling media access, safety and what is reported can be improved and better controlled.

39 Media outlets may have more resources to mobilize on scene than do SAR authorities, and RCC operating plans should account for how to deal with such situations.

40 Information should be provided to the public on what SAR facilities are being used and, if possible, a web address or list of contact phone numbers should be provided for families, media and others to contact for more information.

41 Preparations should be made so that large numbers of callers can be accommodated without saturating the phone system or crashing the computer server.

42 Advance preparation of standby web pages by transportation companies and SAR authorities can help in responding to floods of requests for information. These pages can be quickly posted to provide general information the media can use. Web information should be timely and accurate. Once posted, these pages can be easily updated with the status of the incident and could also include:

- contact information.
- basic government or industry facts.
- industry and SAR definitions.
- photographs and statistics of aircraft, ships and SAR facilities.
- answers to frequently asked questions.
- links to other key sites.
- information on passenger capacity, crew size, vessel plans and firefighting capabilities; and
- library footage of a vessel inspection or of the crew performing lifesaving drills.

10.4 Follow up actions

1 It is very important to develop and share lessons learned from actual MRO operations and exercises. However, concerns (often excessive) about legal liability may discourage highlighting matters that could have been done better.

2 Since lessons learned can help prevent recurring serious mistakes, agreement should be reached among principal participants on how lessons learned can be depersonalized and made widely available. Lessons learned from MROs should be shared not just locally, but internationally.

3 Careful accounting for survivors after they have been delivered to a place of safety remains important. They need to be kept informed about plans for them and about the ongoing response operations. With large numbers of persons often staying in different places, keeping track of and working with them can be difficult.

4 Transportation companies are often best suited to handle and assist survivors during this time. Crewmembers may be placed at various locations to record passenger names and locations. Another possibility is for airlines or passenger ships to attach plastic cards to life vests to give passengers phone numbers for contacting the company. Some companies use bar coded bracelets to track children who are passengers.

5 Communicating with passengers is more difficult in remote areas, where phone service maybe inadequate or lacking. If phones do exist, calling the airline or shipping company may be the best way to check in and find out information. In more populated

areas, local agencies may have an emergency evacuation or other useful plan that can be implemented.

6 To protect passengers from harassment by interviewers and cameras, survivors might be placed in hotels or other places of refuge. However, triage and landing locations must be established and publicized to all rescue personnel and good Samaritans.

10.5 EXERCISES FOR MASS RESCUE OPERATIONS

Since opportunities to handle actual incidents involving mass rescues are rare and challenging, exercising MRO plans are particularly important. Mass evacuation and rescue operations are difficult and costly, leading to a tendency to use simulation excessively during exercises rather than physically exercising on scene efforts.

MRO exercise objectives need not be addressed in a single large exercise but may be satisfied in part by routine incorporation into multiple drills, some intended mainly to test other systems. However, realistic drills are necessary and costly, and over 1,000 volunteer ship passengers or hundreds of volunteer aircraft passengers will likely be needed to conduct realistic exercise.

Separate rooms can be used to simulate command posts that would normally be in separate locations. RO exercises should ideally achieve the following objectives:

- Account for:
 - Crew and passenger lists
 - Rescued passengers and crew until they can return to their homes
 - All persons associated with the rescue and aftermath operations
 - Lifeboats, including empty boats or rafts
 - High freeboard issues for likely rescue facilities
- Identify and task available resources:
 - Use of Amver
 - Potential resources ashore and afloat
 - Resources from local agencies (medical personnel, hospital facilities, fire department, general community, transportation resources)
 - National and regional military and other resources
- Evaluate notification processes, resource availability, timeliness of initial response, real-time elements, conference capabilities and overall co-ordination
- Ensure all agency roles are sorted out, understood and properly followed
- Test capabilities of potential OSCs and ability to transfer OSC duties

- Evaluate span of control
- Evacuate a ship or aircraft
- Co-ordinate activities and achieve information exchanges
 - Communications (RCC-RCC, government-industry, RCC-OSC, on scene, shore-ship, ground-air, ship-air, SAR facility-survival craft, etc.)
 - Information for all concerned (identify, merge, purge, retrieve and transfer to the right place in the right form at the right time)
 - New communication and information management technologies
 - Media and next-of-kin
- Safely transfer and care for passengers (evacuation, in survival craft, rescue, medical, protection from environment, post-rescue transfers, etc.)
- Test all communication links that may be needed for notification, co-ordination and support
- Conduct medical triage and provide first aid
- Assess ship's safety management system effectiveness
- Exercise co-ordination with local response agencies
- Provide food, water, lifejackets and other protective clothing to survivors
- Test mass rescue plans:
 - SAR services
 - Company (including aircraft and ship plans)
 - Any relevant emergency response organizations, e.g., disaster response, military, firefighting and medical
 - Transportation and accommodations
- Assess how effectively earlier lessons learned have been accounted for in updated plans and how well these lessons were disseminated
- Exercise salvage and pollution abatement capabilities
- Carry out emergency relocation of the disabled craft
- Exercise external affairs, such as international and public relations:
 - Necessary participants involved

- Joint information **centres** established quickly and properly staffed
- Press briefings handled effectively, e.g., consistent information from different sources
- Notification of the next of kin and family briefings
- Staff and equipment capacity to handle incoming requests for information
- Rescued persons tracked, kept informed and needs monitored, and reunited with belongings

The following steps are normally carried out during exercise planning:

- Agree on the exercise scenario, goals and extent
- Assemble a multi-disciplinary planning team and agree on objectives for each aspect of the exercise
- Develop the main events and associated timetables
- Confirm availability of agencies to be involved, including any media representative volunteers
- Confirm availability of transportation, buildings, equipment, aircraft, ships or other needed resources
- Test all communications that will be used, including tests of radio and mobile phones at or near the locations where they will be used
- Identify and brief all participants and people who will facilitate the exercise, and ensure that facilitators have good independent communications with person who will be controlling the exercise
- Ensure that everyone involved knows what to do if an actual emergency should arise during the exercise
- If observers are invited, arrange for their safety, and to keep them informed about the exercise progress
- For longer exercises, arrange for food and toilet facilities
- Use “exercise in progress” signs, advance notifications and other means to help ensure that person not involved in the exercise do not become alarmed
- Schedule times and places for debriefs
- Agree and prepare conclusions and recommendations with the entity responsible for handling each recommendation along with the due date for any actions
- Prepare a clear and concise report and distribute it as appropriate to the participating organizations
- Consider the outcome of this exercise in planning future exercises

10.6 INDUSTRY PLANNING AND RESPONSE FOR MASS RESCUE OPERATIONS

- SAR authorities should co-ordinate MRO plans with companies that operate aircraft and ships designed to carry large numbers of persons. Such companies should share in preparations to minimize the chances that MROs will be needed, and to ensure success if they are. This Appendix provides guidance on industry roles and discusses how companies could arrange for use of company field teams and emergency response centres as possible means of carrying out their MRO responsibilities.
- Early notification of potential or developing MROs is critical, due to the level of effort required to mount a very large-scale response. It is much better to begin the response process and abort it should it become unnecessary, than to begin it later than necessary should the actual need exist. Pilots and masters should be advised and trained to notify SAR services at the earliest indication of a potential distress situation.
- Company response organizations should be able to help SAR services by organizing support, equipment, advice and liaison any of their ships or aircraft.
- Companies should be prepared to provide information to preclude the need for multiple sources attempting communications with the aircraft pilot in command or ship captain for information that is unavailable or available from another source. Receiving and handling requests for information aboard the distressed craft can interfere with the pilot's or master's ability to handle the emergency and handle critical on scene leadership needs.
- Companies operating large aircraft or ships should be advised to be able to field a co-ordinated team that can handle emergency response functions around the clock should the need arise. Such a team might include staff as indicated in the following Table.
 - SAR services
 - Company (including aircraft and ship plans)
 - Any relevant emergency response organizations, e.g., disaster response, military, firefighting and medical
 - Transportation and accommodations
- Assess how effectively earlier lessons learned have been accounted for in updated plans and how well these lessons were disseminated
- Exercise salvage and pollution abatement capabilities
- Carry out emergency relocation of the disabled craft

- Exercise external affairs, such as international and public relations:
 - Necessary participants involved
 - Joint information **centres** established quickly and properly staffed
 - Press briefings handled effectively, e.g., consistent information from different sources
 - Notification of the next of kin and family briefings
 - Staff and equipment capacity to handle incoming requests for information
 - Rescued persons tracked, kept informed and needs monitored, and reunited with belongings

The following steps are normally carried out during exercise planning:

- Agree on the exercise scenario, goals and extent
- Assemble a multi-disciplinary planning team and agree on objectives for each aspect of the exercise
- Develop the main events and associated timetables
- Confirm availability of agencies to be involved, including any media representative volunteers
- Confirm availability of transportation, buildings, equipment, aircraft, ships or other needed resources
- Test all communications that will be used, including tests of radio and mobile phones at or near the locations where they will be used
- Identify and brief all participants and people who will facilitate the exercise, and ensure that facilitators have good independent communications with person who will be controlling the exercise
- Ensure that everyone involved knows what to do if an actual emergency should arise during the exercise
- If observers are invited, arrange for their safety, and to keep them informed about the exercise progress
- For longer exercises, arrange for food and toilet facilities
- Use “exercise in progress” signs, advance notifications and other means to help ensure that person not involved in the exercise do not become alarmed
- Schedule times and places for debriefs
- Agree and prepare conclusions and recommendations with the entity responsible for handling each recommendation along with the due date for any actions

- Prepare a clear and concise report and distribute it as appropriate to the participating organizations

Consider the outcome of this exercise in planning future exercises

::Chapter 11::

::Mass Rescue Operation (MRO)::

11.1 Introduction

A mass rescue operation (MRO) is one that involves the need for immediate assistance to large numbers of persons in distress such that capabilities normally available to search and rescue (SAR) authorities are inadequate. Flooding, earthquakes, terrorism, casualties in the offshore oil industry, accidents involving releases of hazardous materials and major aircraft or ship incidents are examples which, because of their magnitude, may need to use the same resources as would be needed to carry out mass maritime or aeronautical rescue operations.

MROs are relatively low-probability high-consequence events. Effective response to such major incidents typically requires immediate, well-planned and closely co-ordinated large-scale actions and use of resources from multiple organizations. Intense and sustained high priority lifesaving efforts may need to be carried out at the same time and place as major efforts to save the environment and property. Huge amounts of selected information will need to be readily available at the right times and the right places not only to support the response efforts, but to meet the needs of the media, public and families of the persons in distress, which may number in the hundreds or thousands.

11.2 Policy

It is the policy of the signatory agencies to provide a national plan for coordinating Maritime Search and Rescue (M-MAR) services to meet the national needs as well as regional and international commitments. Guidance for implementing this plan is amplified in the National Maritime Search and Rescue (MAR) manual, International Aeronautical and Maritime Search and Rescue (IAMMAR) manual and other relevant directives of the agencies to this plan.

11.3 Purpose

This plan construes by inter-agency agreement, the effective use of all available resources and facilities to assist persons and property in potential or actual distress at sea within the Indian Search and Rescue Region (ISRR) regardless of the nationality or circumstances in which that person is found.

11.4 Objectives

Having known the obligations under several international conventions, agreements and instruments to render assistance to persons in distress at sea and to the establishment of effective MAR services, the participating agencies to this plan recognise the need for cooperation and co-ordination of activities regarding safety on and over the sea and desire to: -

- (a) Provide a national plan for co-ordinating MAR services, effective use of all available resources, mutual assistance and efforts to improve such co-operation and services for greater protection of life and property with economy of effort.
- (b) Support in implementing the provisions of International Maritime MAR

11.5 Terms and Definitions

Following are the terms and definitions based on International Maritime Organization usage for M-MAR: -

- a. **MAR Coordinator.** A person or agency with overall responsibility for establishing and providing MAR services within the SRR and ensuring that planning for those services is properly co-ordinated for which India is obliged under Maritime MAR Convention 1979.
- b. **Search and Rescue Region (SRR).** An area of defined dimensions recognized by International Maritime Organisation (IMO) and International Civil Aviation Organisation (ICAO) or other cognizant international body and associated with a Rescue Co-ordination Centre, within which MAR services are provided.
- c. **Search and Rescue Sub-region (SRS).** A specified area within a SRR associated with a rescue sub-centre.
- d. **MAR Services.** The performance of distress monitoring, communication, coordination and MAR functions, including provision of medical advice, initial medical assistance or medical evacuation, using public and private resources including co-operating aircraft, vessels and other craft and installations.

- e. **Maritime Rescue Co-ordination Centre (MRCC).**
A unit responsible for promoting efficient organisation of MAR services at sea and coordinating the conduct of maritime - MAR operations within a SRR.
- f. **Maritime Rescue Sub-Centre (MRSC).**
A unit subordinate to a MRCC established to complement the latter according to provisions of the responsible authorities.
- g. **Search and Rescue Unit (SRU).**
A unit composed of trained personnel and provided with equipment suitable for the expeditious conduct of search and rescue operations.
- h. **On-scene Co-ordinator (OSC).**
A person designated to co-ordinate MAR operations within a specified area.
- i. **MAR Mission Co-ordinator (SMC).**
An official temporarily assigned to coordinate response to an actual or apparent distress situation.
- j. **Search and Rescue Point of Contact (SPOC).**
Rescue Co-ordination Centres and other established and recognized national points of contact which can accept responsibility to receive COSPAS-MARSAT alert data to enable the rescue of persons in distress.
- k. **Mission Control Centre (MCC).**
Part of the COSPAS-MARSAT System that accepts alert messages from the local user terminal(s) and other mission control centres to distribute to the appropriate Rescue Co- ordination Centres or other search and rescue points of contact.
- l. **Search and Rescue Data Provider (SDP).**
A source for a Rescue Coordination Centre to contact for obtaining data to support search and rescue operations, including emergency information from communications equipment registration databases, ship reporting systems and environmental data systems (e.g. weather or sea current).

11.6 Participating Agencies

The participating agencies to this plan are: -

- a. **Ministry of Shipping.**
Ministry of Shipping carries out broad responsibility w.r.t. Navigation and Port State Control of vessels and transportation safety. The Director General of Shipping, implementing agency for international conventions on maritime matters, shall promulgate all MAR preventive programmes on advice from the National Maritime MAR Board for commercial vessels operating in the Indian waters. They also maintain database of Maritime Mobile Service Identity (MMSI) numbers of all vessels registered with them.

b. Indian Coast Guard.

Indian Coast Guard has been designated as the national coordinator for the conduct of maritime MAR operations on and over the sea areas of the Indian SRR. Towards this, the Indian Coast Guard develops, establishes, maintains and operates MAR facilities for maritime MAR operations. The operation is coordinated through Maritime Rescue Co-ordination Centres (MRCCs) and Maritime Rescue Sub Centres (MRSCs) located in maritime states of India.

c. Indian Navy.

Indian Navy has facilities and resources that are used to support their own operations. These facilities may be used for maritime MAR needs on a ‘not-to-interfere’ basis with military missions.

d. Meteorological Department.

Meteorological Department shall support MAR operations through timely input of weather messages, marine environment forecasts and warnings for the coastal and high seas and provide weather information on demand to co-ordinator and coordinating agency.

e. Department of Space (DoS).

Department of Space (DoS) shall provide satellite “alert” services as per the guidelines of COSPAS-MARSAT, for detection and location of aircraft, ships and individuals in potential distress situation that carry recommended distress beacons. DoS also maintains beacon registration data base, through web-based access, containing unique identity of the beacon, vessel/aircraft type, owner and emergency contact details as provided by the users and also distributes the same to concerned rescue co-ordination centre for MAR mission planning.

f. Chief Hydrographer.

Chief Hydrograph to Govt of India shall assist the maritime MAR agencies by timely promulgation of navigational warnings through NAVAREA and other measures.

g. Customs and Excise.

Customs and Excise provide rescue facility assistance, and equipment clearance during MAR operation involving foreign crew / passengers.

h. Major Ports.

Major Ports provide rescue facility assistance to the MAR agencies during MAR operations occurring near ports and offshore areas. The major ports shall also provide berthing, towing, tug assistance to MAR agencies, when requested.

(a) Department of Telecommunication (DoT).

Department of Telecommunication (DoT) on advice from the coordinating agency, promulgates rules and regulations for non-government use of wireless and radio facilities for promoting safety of life and property and co-operation in MAR operations by relaying inputs obtained from Coast Radio Stations.

(b) Coastal State Government.

Coastal State Government shall provide assets, emergency medical and other facilities that would contribute to the effective MAR operations when requested by the coordinating agencies.

i. Fishing Community.

Fishing Community representing fisher- folk and operating around our coasts shall provide assets to the coordinating agencies, when requested to augment MAR effort.

j. Sailing Vessel Operators.

Sailing vessels operating around our coasts for commercial purposes shall help the coordinating agencies, when requested to augment MAR effort.

k. Director General of Civil Aviation (DGCA).

Director General of Civil Aviation (DGCA) is to provide an updated list of civil aircraft registered in India, coordinate flexi-use of air space by civil and military air traffic and issue air safety notices during a particular MAR operation involving various air units.

l. Bureau of Immigration.

Bureau of Immigration to provide rescue facility by expediting immigration clearance during MAR operation involving foreign crew
/Passengers and provide Regional and Foreign Language Experts whenever requisitioned by MAR agencies.

m. Minor Ports.

Minor Ports to provide rescue facility assistance to the MAR agencies during MAR operations occurring near ports and offshore areas. The minor ports shall also provide priority berthing, towing, and tug assistance to MAR agencies when requested.

n. Private Ports.

Private Ports to provide rescue facility assistance to the MAR agencies during MAR operations occurring near ports and offshore areas. The private ports shall also provide priority berthing, towing, tug assistance to MAR agencies when requisitioned by MAR agencies.

o. Oil Exploration Agencies.

Oil Exploration agencies (Government, PSUs and Private) to provide offshore Supply Vessels, Tugs, helicopters, extend helipad of oil platforms/drill ships, medical facility whenever requisitioned by MAR agencies.

p. Airlines.

Airlines (Government, PSUs and Private) are to extend facilities to maritime MAR agencies whenever requisitioned. The airlines to provide passenger list of the aircraft in distress at sea and diversion of other aircraft, if feasible, to locate vessel/aircraft in distress.

q. Marine Police/Coastal Security Police (CSP).

Marine Police/ Coastal Security Police (CSP) shall provide boats and other assistance to the coordinating agencies, when requested to augment MAR effort.

11.7 Indian Search and Rescue Region (ISRR)

- SRR is established by a country solely to ensure the primary responsibility for coordinating or providing effective MAR services, communication network and routing of distress alerts to MRCC responsible for that geographic area. SRR should, as far as possible, be contiguous and not overlap.
- India's maritime and aeronautical SRR will be harmonised with each other to the extent practicable, recognising that the lines separating SRR must be agreed by the countries having neighbouring SRRs. The delimitation of SRR is not related to and shall not prejudice the delimitation of any maritime boundary between neighbouring countries. The Indian SRR limits need to be resolved with the neighbouring countries for publishing in the documents of the IMO and ICAO.
- SRR may be sub-divided into sub-regions if delimitation coincides with relevant SRR limits. Where this is not practicable, changes to the international limits should be taken up with the appropriate international organisation through proper channel by the maritime MAR Co-ordinator.
- Each SRR is to be associated with a MRCC. The MRCC is responsible for coordinating the conduct of MAR operations within a SRR. The standards and guidance for the MRCCs has been developed by the IMO and can be found in international conventions and IAMMAR manual. They are to be kept in the MRCCs for reference.

11.8 PARTICIPANT RESPONSIBILITIES

❖ Primary Responsibility

MAR coordinator is responsible for arranging MAR services and establishing the MRCCs within the SRR. The system established should meet international standards and to facilitate integration into the global maritime MAR system support outside Indian Search and Rescue Region.

1. MAR co-ordinator may support maritime MAR operations outside the Indian SRR when requested, consistent with the expertise, capabilities and legal authority. This is in keeping with India's concern for safety of life at sea and the humanitarian nature of MAR and the advantages of national and international co-operation.

2. The Rescue Co-ordination Centre compatible with their capabilities and expertise will support maritime MAR operations in the neighbouring States territorial and international waters beyond Indian SRR when requested, in accordance with the international laws. In such cases, MAR operations shall, as far as practicable, be co-ordinated by the MRCC, which has authorised entry, or such other authority designated by the State concerned.
3. In carrying out Maritime MAR support functions with other nations, such as training, exercises, and liaison, each Participant will co-ordinate its activities with other Participants having maritime MAR expertise with respect to the support concerned.
4. While it is appropriate, that the Participants have the authority to do so, to co-operate and maintain liaison with maritime MAR authorities of other nations, such support should be dealt in co-ordination with the maritime MAR Co-ordinator and neighbouring MAR authorities. Such co-ordination will normally include Indian Coast Guard Headquarters, New Delhi, to ensure consistency with India's obligations under international agreements to which India is a Party, and compliance with the IAMMAR Manual and other relevant international guidance relevant to implementing such agreement.
5. Participants should not accept MAR Coordinator or MRCC role for maritime MAR operations of SRRs for which other nations are responsible. However, the Participants may provide and support maritime MAR operations in such areas when:
 - a) Assistance is requested (normally this should be in accordance with MRCC-to-MRCC procedures prescribed in the IAMMAR Manual).
 - b) Indian citizens are involved or Indian facilities become aware of a distress situation to which no other suitable facilities are responding, or where other available MAR services appear to be inadequate.
6. When assisting maritime MAR authorities of other nations, or agencies or organisations supporting these authorities, Participants to this Plan should ensure that:
 - (a) Have expertise and appropriate agreement to do so.
 - (b) Provisions of conventions or agreements to which India is Party are not violated.
 - (c) Relevant procedures set forth in the IAMMAR manual, National Maritime MAR manual and other relevant directives are known and complied.
 - (d) Such efforts are carried out in consultation with Participants to this Plan.

(e) Authorities assisted in that country are responsible for the MAR functions.

7. Policies on rendering assistance in neighbouring States' territorial waters must have the objective of balancing concerns for saving Lives, for sovereignty, and for national security. Provisions for territorial entry should be addressed in international MAR agreements as discussed below, and care should be taken to ensure that such agreements are compatible with the national policies.
8. Participants to this Plan if addressing maritime MAR-related inquiries or proposals from other nations or organisations outside India, or when hosting or attending international meetings on maritime MAR, care should be taken that interested Indian agencies, organizations, or persons are consulted and involved as appropriate.

❖ National Search and Rescue Board

The National Search and Rescue Board is the patron of this Plan. The Board, insistent with applicable laws and executive orders is to: -

- a) Formulate and promulgate National MAR Plan.
 - b) Co-ordinate measures to be adopted by Participating agencies and formulate contingency plan.
 - c) Review and update matters relating to the Plan affecting more than one Participant, including recommendations for Plan revision or amendment.
 - d) Define functions to be performed by participating agencies.
 - e) Attending to matters relating to Maritime MAR as per IMO requirements in consultation with Ministry of Shipping.
9. The Board in particular, is intended to accomplish the following: -
- a) Oversee this Plan and develop and maintain National Maritime MAR Manual. The applicability of the rules for MAR for defence forces should be in conformity with the provisions as enshrined in their respective Acts and practice in vogue.
 - b) Provide a standing national forum for co-ordination of administrative and operational Maritime MAR matters.
 - c) Provide an interface with other national, regional and international organisations involved with providing or supporting m Develop and maintain suitable guidance for implementation of this Plan, such as a National Maritime MAR manual, supplement to the IAMMAR Manual.
 - d) Promote effective use of all available national resources for support of M-MAR.

- e) Promote close co-operation and co-ordination with Armed Forces and other MAR communities for provision of effective maritime MAR services.
- f) Improve co-operation among Maritime and Aeronautical MAR communities for the provision of effective Maritime MAR services.
- g) Determine other ways to enhance the overall effectiveness and efficiency of M-MAR services, and to standardize procedures, equipment, and personnel training where practicable.

❖ **Maritime MAR Services**

- 10. This Plan covers maritime MAR operations such as: -
 - a) Provision of initial assistance at or near the scene of a distress situation. (e.g., initial medical assistance or advice, medical evacuations, provision of needed food or clothing to survivors etc)
 - b) Delivery of survivors to place of safety or where follow up assistance can be provided.
 - c) Saving of property when it can be done in conjunction with saving lives.
- 11. Maritime MAR does not include operations such as: -
 - a) Air ambulance services, which did not result from a rescue or recovery operation.
 - b) Military operations, such as combat MAR or other
 - c) airtime MAR services.
 - d) types of recovery by military operations to remove military or civilian personnel.
 - e) Salvage operations.
 - f) Overall response to natural or man-made disasters or terrorist incidents.

❖ **Mutual Assistance**

- 12. The Participants agree to co-operate: -
 - a) Support each other by pooling relevant facilities and resources as appropriate for M-MAR operations within the SRR
 - b) e, and respond to, requests for operational assistance between the designated MRCCs, MRSCs, of the Participants as capabilities permit.
 - c) Develop procedures, communications, and databases appropriate for coordination of facilities responding to distress incidents, and for co-ordination between the MRCCs, MRSCs of the Participants.

- d) Follow applicable guidance of the IMO or other relevant international laws regarding M-MAR operational procedures and communications.

11.9 PRINCIPLES ACCEPTED BY THE PARTICIPANTS GENERAL

1. Participants coordinating operations should, consistent with applicable laws and executive orders, organise existing agencies and their facilities through suitable agreements into a basic network to assist military and non-military persons and property in actual or potential danger or distress, and to carry out obligations under customary international laws and instruments to which India is or may become a Party.
2. Participants will seek to keep political, economic, jurisdictional, or other such factors as secondary when dealing with lifesaving matters, i.e., where possible, what is best for lifesaving will govern their decisions.
3. Consistency and harmonisation will be fostered wherever practicable among plans, procedures, equipment, agreements, training, terminology, etc., for the various types of lifesaving and recovery operations, considering terms and definitions adopted internationally as much as possible.
4. If a distress situation appears to exist or may exist, rescue or similar recovery efforts will assume that a distress situation does exist until it is known differently.
5. Assistance will always be provided to persons in distress without regard to their nationality, status, or circumstances.
6. Generally, cost-effective safety, regulatory, or diplomatic measures that tend to minimize the need for M-MAR services will be supported.
7. Recognising the importance of reduced response time to the successful rescue and similar recovery efforts, a continual focus will be maintained on developing and implementing measures to reduce the time
 - a) Receiving alerts and information associated with distress situations.
 - b) Planning and coordinating operations.
 - c) Facility transits and searches.
 - d) Rescues or recoveries.
 - e) Providing immediate assistance, such as medical assistance, food and clothing to survivors, as appropriate.

12 Research and Development

8. Research and development efforts for MAR need to be undertaken for improvements in MAR services. The focus of such efforts usually, is to develop data, procedures or equipment which enables MAR services to be more effective. Finding ways to exploit new and emerging technologies for MAR to make it a common focus for research and development.
9. Research and development results should be shared with other maritime nations to reduce the risk of duplicated efforts and to maximize the benefits of the results.

13 Training, Qualification and Certification

10. Training and experience are crucial for effective MAR response and efficient conduct of any operations. Officer-in-charge, MRCCs and MRCC/ MRSC staffs need specialized training in watch keeping, coordination of available resources, search planning and rescue planning. MAR co- Ordinator has the responsibility to ensure an effective overall training programme. It will normally be the responsibility of the Officer-in-Charge (O i/c) of the MRCCs to ensure that personnel manning RCCs/MRCCs are adequately trained for undertaking MAR Operations. Qualification and certification processes are to be ensured, so that, sufficient experience, maturity and judgments are gained. During a qualification process, the individual must, by demonstration of abilities, show mental and physical competence to perform as part of a team. Officer-in-charge, MRCCs/MRSCs need to issue a certificate to all personnel prior independent watch keeping in MRCCs/MRSCs.

14 Validation of National MAR Plan

11. The requirement of a MAR mission is called for without any prior notice or appointment. The agencies likely to be involved in the MAR operations are to be geared up in all respects to be ready to render assistance, if required. Also, the procedures involved in undertaking such an operation with various agencies on the scene are to be very well known to the agencies and to the personnel of every faculty. Therefore, to ensure that everyone is prepared in all respects and work in cohesion, MAR training and exercises involving all the agencies are to be conducted periodically by simulating a MAR scenario. This will enhance the capabilities of the MAR system further and allow every agency to evaluate their capabilities to respond to any actual MAR requirement. The frequency of exercises will be as follows: -
National level exercise - biennially Involving national and international participants
Regional level exercise - annually

15 Inter-Agency Liaison.

12. All personnel involved in the MAR operations should maintain constant liaison with the MRCC and the co-ordinating MRCC should, in turn, maintain constant touch with the military authorities providing SRUs and other MAR agencies involved in the operation to help coordinate the activities, provide briefing and debriefing and keep Search & Rescue Mission Co-ordinator (SMC) informed on the SRU availability. Adequate background information must be provided to develop a picture on, what actions might have been taken by the missing craft and provide expertise about the craft to aid in search planning during all joint operations. This will also enable conduct of co-ordinated studies, review of procedures and equipment and recommendation of better method of operation. Any development in this regard should be informed to the SMC in an ongoing operation.

13. The inter-agency liaison will enable review of MAR matters affecting more than one agency, including recommendations of participating agencies for revision and amendment of the plan. This will also encourage all the agencies involved to develop equipment and procedures to enhance the national MAR capability and promote coordinated development of all national MAR resources.

16 Maritime Search and Rescue (M-MAR)

14. Personnel associated with the MAR activities should be familiar with the International Convention on Maritime Search and Rescue, IAMMAR manual, National maritime MAR manual and other information applicable to M-MAR.
15. MAR principles and procedures of relevant customary international Conventions and IAMMAR Manual will serve as guidelines for co- ordination and conduct of MAR operations especially when dealing with other countries, organisations or jurisdictions. National maritime MAR manual and the MAR plan will be consistent with these international provisions to the extent practicable.

Indian Coast Guard will operate and maintain a ship reporting system (INDMAR) exclusively for maritime MAR operations, which is voluntary for ships transiting the Indian SRR. The information collated would enable identification of potential ship in the area to quickly respond to the distress situation. The ships send their data through the INMARSAT on entering SRR and every 24 hours thereafter and prior exiting the SRR. (This system will be used only for MAR with its information being treated as “commercial proprietary” as promised to the ships reporting).

16. Operational responsibilities for maritime MAR will generally be associated with internationally recognised geographic maritime SRR. Indian Coast Guard has been” assigned the responsibility for co- ordinating M-MAR operations in Indian SRR with other agencies and organisations providing support as appropriate.
17. Distress situations involving airborne aircraft ditching in sea, will be handled by the maritime MAR authorities (i.e. Coast Guard) in co- ordination with the aeronautical MAR authorities.
18. Agencies responsible for MAR operations under this Plan will: -
 - a. Keep information readily available on the status and availability of key facilities or other resources, which may be needed for MAR operations.
 - b. Keep each other fully and promptly informed of operations of mutual interest, or which may involve use of facilities of another Participant.

19. MAR Co-ordinator will delegate to their MRCCs the authority to: -
- a. Request assistance via the MRCC/MRSC of other nations, and to provide all pertinent information on the distress situation and the scope of assistance needed.
 - b. Promptly respond to requests for assistance from other MRCC/MRSC, including those of other nations.
 - c. Grant permission for entry into Indian waters for MAR facilities of other nations if need arises.
 - d. Plan with customs, immigration, health or other authorities to expedite entry of foreign MAR facilities as appropriate.
20. MAR Co-ordinator will authorise the MRCCs to arrange promptly or in advance for entry of foreign rescue units into India should it ever become necessary. Such arrangements should involve appropriate authorities in India as well as proper authorities of the nation or MAR facility involved with the entry. Such entry may include over flight or landing of MAR aircraft, and similar for surface MAR units as circumstances dictate for fuelling, medical, or other appropriate and available operational support, or delivery of survivors. It could also be in response to a request made by the Indian MRCC to the MRCC of another nation for assistance of those facilities.
1. Operations of MAR facilities committed to any MAR mission normally should be coordinated, and directed, by an appropriate MRCC or MRSC consistent with the provisions of this plan.
 2. On-scene co-ordination may be delegated to any appropriate unit participating in a particular incident by the MAR mission coordinator of a MRCC.
 3. No provision of this Plan or any supporting plan is to be construed as an obstruction to prompt an effective action by any agency or individual to relieve distress whenever and wherever found.
 4. MAR Co-ordinator shall arrange for the receipt of distress alerts originating from within SRR for which they are responsible and ensure that every MRCC and MRSC can communicate with persons in distress, with MAR facilities, and with other MRCCs/MRSCs.

11.10 Armed Forces - Civilian Relationships

1. Arrangements between Armed Forces and civilian agencies should provide for co-operation among themselves, consistent with statutory responsibilities and assigned MAR functions.

2. Co-operative arrangements involving Navy, Air Force and Coast Guard commands should provide for the effective use of their facilities for maritime MAR on a not-to interfere basis with military missions, consistent with statutory responsibilities and assigned agency functions.
3. Participants with operational responsibilities should develop plans and procedures for effective use of all available MAR facilities and for contingencies to continue maritime MAR operations if military forces are withdrawn because of another emergency or a change in military missions.
4. Navy and Air force responsibilities under this Plan include support of maritime MAR on a not-to-interfere basis with primary military duties, in accordance with applicable national directives, plans, guidelines, agreements, etc.
5. To optimise delivery of efficient and effective MAR services, and, where practicable and consistent with agency authorities, provide the organisations and persons interested in supporting these services the opportunity to do so, all available resources will be used for maritime MAR. Certain state and local governments, civil and volunteer organisations, and private enterprises have facilities, which contribute to the effectiveness of the over-all MAR network, although they are not participants to this Plan.
6. To help identify, locate and quantify primary MAR facilities, Navy, Air force and Coast Guard commands may designate facilities which meet international standards for equipment and personnel training as MAR units (SRUs). (Such facilities need not be dedicated exclusively to the associated type of operations, and this designation is not intended to preclude use of other resources).
7. Recognising the critical role of communication in receiving information about distress Situations and co-coordinating responses, and noting that such responses sometimes involve multiple organisations and jurisdictions, the participants will work aggressively to develop suitable MAR provisions for.

11.11 Assistance During National Disasters

National Disasters Management (NDM) Policy 2009 also stipulates general responsibilities for the armed forces during a national disaster. The NMMAR Board forms an important part of the Government's response capacity, and the resource agencies are the immediate responders in all serious disaster situations along the

coast and at sea. Because of its vast potential to meet any adverse challenge, speed of operational response and the resources and capabilities, the NMMAR Board through its resource agencies in past, has played a major role in emergency support functions including communication, search and rescue operations, health & medical facilities and transportation, especially in the immediate aftermath of a disaster. NMMAR Board will always remain prepared and will coordinate Search and Rescue (MAR) operation at sea by the resource agencies during national disasters like Tsunami and help neighbouring countries whenever called upon by the Government.

11.12 Mass Rescue Operation (MRO)

1. Mass Rescue Operations (MROs) often need to be carried out and co-ordinated within a broader emergency response context that may involve hazards mitigation, damage control and salvage operations, pollution control, complex traffic management, larger-scale logistics, medical and coroner functions, accident-incident investigation, and intense public and political attention, etc. Efforts must often start immediately at an intense level and be sustainable for days or weeks.
2. MAR Authorities should co-ordinate MRO plans with companies that operate aircraft and ships designed to carry large number of persons. Such companies should share in preparation to prevent MROs and to help ensure success if they become necessary.
3. Since opportunities to handle actual incidents involving mass rescues are rare and challenging, exercising MRO plans is particularly important.

11.13 Suspension or Termination of Operations

1. Maritime MAR operations shall normally continue until all reasonable hope of rescuing survivors or victims has lapsed.
2. The responsible MRCC/MRSC concerned shall decide when to discontinue these operations. If no such centre is involved in coordinating the operations, the OSC may take this decision. If there is no OSC involved, the decision will be made at appropriate level of the chain-of-command of the MAR facility conducting the operations.
3. When a MRCC/MRSC or an appropriate authority considers, based on reliable

information that a rescue or recovery operation has been successful, or that the emergency no longer exists, it shall terminate the MAR operations. The authority terminating should inform the authority, facility or service which has been activated or notified.

4. If an operation on scene becomes impracticable and the MRCC/MRSC or an appropriate authority concludes that survivors might still be alive, it may temporarily suspend the on-scene activities pending further developments. They should promptly inform the authority, facility or service which has been activated or notified. Information subsequently received shall be evaluated and operations resumed when justified based on the information.

❖ Entry into Force Amendment or Termination This Plan: -

- a. Shall enter into force effective from 05 Apr 2013.
- b. May be amended by written agreement among the Participants.
- c. May be terminated or superseded by a new Plan or by written agreement among the Participant.
- d. This Plan will be reviewed after five years.

❖ Some of the important crises are as under

- a. Hostage or terrorist situation requiring specialized handling.
- b. Attempts by terrorists / extremists to create a major scare of poisoning or use of nuclear / biological / chemical weapons.
- c. Assassination or attempted assassination or kidnapping or disappearance of an Indian or Foreign high dignitaries.
- d. Mutiny.
- e. Migration / Exodus / Infiltration.

11.14 **Composition and Function of the various committees**

(1) State crisis management committee: -

To deal with the crisis in the state, Gujarat State Government has constituted the state crisis management committee with the following members.

Sr. No.	Name & Address (Member)	Name & Address (Alternate Member)
1	Chief Secretary, Blook-1, III Floor, Sachivalaya Gandhinagar. T.No.(O) 079- 23250313	Addl. Chief Secretary, Home, Block-2, Ist Floor, Sachivalaya Gandhinagar. T.No.(O) 079- 23250502,3,5

2	Addl. Chief Secretary, Home, Block- 2, Ist Floor, Sachivalaya Gandhinagar. T.No.(O)079-23251501,591,507	Secretary L&O, Block-1 9th Floor, Sachivalay Gandhinagar. T.No.079-232522156
3	Principal Secretary (Revenue) & Rilif Commissioner, Blook- 11 IV Floor, Sachivalay Gandhinagar. T.No.079- 23251509,06	Director of Rilif/Dy.Sec. Rilif, Blook-11 7th Floor, Sachivalay Gandhinagar. T.No. 079- 23251611,12
4	C.E.O., G.S.D.M. A Udhog Bhuvan Gandhinagar. T.No.079- 23259502	Addl. C.E.O. G.S.D.M.A, Udhog Bhavan Gandhinagar.
5	DGP & IGP, Police Bhavan Ist Floor Gandhinagar. T.No.079-23246333, 23259989	Addl. D.G.P. L & O, Police Bhavan Ist Floor, Gandhinagar. T.No.079-23254222
6	The I.G.P. Inte., Police Bhavan Ist Floor, Gandhinagar. T.No.079-23254301	DIGP (Coastal Security), Dafnana Ahmedabad. T.No.079-23254314
7	Joint Director, Central IB, Sagar Appartment, SVP enclave, Bodakdev, Ahmedabad. T.No.079-22685880	Dy. Director, Central IB, Sagar Appartment, SVP enclave, Bodakdev, Ahmedabad. T.No.079-22685880

State level police control room is activated at Gandhinagar whose telephone No is 079-23251914, 23251912, 23251900, 23251916, 23251902 and fax no. is 079-23246329. It could be contacted any time during any type of crisis.

The Nodal department will be mainly responsible for taking all action to deal with a particular crisis. Home Department will be the Nodal Department for the above crisis. Nodal Department will establish a crisis group for dealing with crisis which fall within the ambit of its responsibility. The crisis group will be mainly responsible for dealing with a crisis and for reporting all developments to the state crisis management committee seeking its direction and guidance as and when necessary.

Nodal Department will have a well-equipped Control Room for quick receipt of information and dissemination of command instructions. As soon as a crisis develops and it warrants attention of the state crisis management committee it will be the responsibility of the secretary of the Nodal Department to report it to the state crisis management committee, who in turn will inform to the Internal Crisis Management Committee and the District Crisis Management Committee.

11.15 INCIDENT COMMAND SYSTEM OVERVIEW

For major incidents, crisis management for the overall response may also be needed. The Incident Command System (ICS), one widely used to mean meeting this need but works best with some advance familiarization and exercising within and among the transportation and emergency response communities. Since SAR and transportation authorities are likely to encounter the use of the ICS within emergency response communities, this Appendix provides general information for familiarization with ICS. The following terms are relevant to the ICS:

Incident Commander (IC):

The primary person functioning as a part of the incident command system, usually at or near the scene, responsible for decisions, objectives, strategies and priorities relating to emergency response.

Incident Command Post (ICP):

Location at which primary functions are carried out for the Incident Command System.

Incident Command System (ICS):

On scene emergency management concept that provides an integrated organizational structure adaptable to the complexity and demands of a major incident involving multiple missions, response organizations or jurisdictions.

Unified Command (UC):

The incident commander role of the incident command system expanded to include a team of representatives that manages a major incident by establishing common objectives and strategies and directing their implementation

::District Profile::

❖ General Information of Rajkot District.

Rajkot district, which is the focal point of Saurashtra's, development has strategic importance from all points of view , historically, socially and economically. Rajkot district is located at 70-20 to 71-40 east longitude and 20-58 to 23-18 north latitude. 11203 km There are 595 villages and 11 taluka panchayats in Rajkot district which has 11 talukas , 6 cities and two uninhabited villages. Rajkot district is bounded by Bhavnagar , a small part of Amreli district in the east , Jamnagar in the west and Morbi and Gulf of Kutch and Desert of Kutch in the north and a small part of Junagadh and Amreli district in the south. The eastern part of the district is hilly. Whereas in the western part, the average rainfall of Bhadar river and its tributaries is 540 to 600 mm. The two main rivers of the district are Bhadar and Aji.

According to the census of 2011, the population of the district is 3799770 It includes 51.9% urban area and 48.71% rural area population. The literacy rate is 83.33% for males and 6.8% for females. Among the important agricultural products of the district, the main crops are groundnut , cotton , sorghum , millet , sugarcane , wheat , etc., while cumin , maize , gram , sesame , amaranth , rye , mustard etc. are also produced in large quantities. Major agro-based industries in the district are oil engines and cotton ginning pressing.

If we look at the various economic activities of Rajkot district, there are 1,510 irrigation ponds in the district. Due to which 68 ponds under indirect irrigation scheme in 30,000 hectares of land are used for three season crops in 48 hectares of land. Canals , borewells , wells , ponds and other minor irrigation llas have water bodies as big as Bhadar , Aji , Nyari which provide irrigation to 137 villages and water supply to 134 villages.

The district has continuous availability of electricity which is essential for the development of industry and agriculture. All urban and rural areas are fully electrified. ST covering the cities , villages and inter-state cities of the district. Bus service is available. Air services are also available from Rajkot to Mumbai and Delhi. Long and short distance trains run from Rajkot connecting the states of the country. Rajkot is an important industrial town in Rajkot district. Jetpur , Shapar-Veraval , Metoda , Lodhika etc. are also bustling with industrial activities. Due to infrastructural facilities and government's encouraging policies, industries like oil engine , ginning , pressing have developed rapidly in the district.

More than 30,000 small scale industry units are providing employment to more than one and a half lakh people in the district . Rajkot city has about 4000 industries including foundry , forging , machine tools , bearings , auto components etc. Among the important industries of the district are engineering , ceramics , watches , plastics , solid printing and edible oil. The dye-printing industry of Jetpur is famous in the country.

Thus , Rajkot district is bustling with activities including industrial , economic , tourism and is becoming the focal point of development of entire Saurashtra.

1.1 Geographic Information.

Located in the center of Divyakalpa Saurashtra, this district is bordered by Morbi and Gulf of Kutch in the north, Surendranagar district and Bhavnagar district in the east, Junagadh and Amreli districts in the south and Jamnagar district in the west. In terms of geography, the hilly region in the east direction, while most of the area has flat land except the scattered hills in the south.

The area covering Jasdan and Rajkot of the district is known as Panchal area, which extends up to Babra taluka of Amreli district. Historically, it is also identified as the land of exile of the Pandavas. Dhansia bidos are located in this area with narrow banks and high embankment-like open spaces and rammed wastelands. The land here produces paddy on a large scale. Landholders and farm laborers get employment from this paddy, which mainly grows naturally. Also, due to grazing in this area, a very large business of animal husbandry is going on, which supplies milk to Rajkot Milk Dairy and surrounding areas.

Starting from the northern part of the Jasdan, it covers the headwaters and forms a narrow canal extending all the way to Lodhika and also supplies the drainage line of the district. Near this edge all the rivers to the north flow into the Gulf of Kutch and the rivers that originate in the south meet the Arabian Sea. In the western part of Rajkot district there is fertile land, in which large-scale agricultural production is being done. This part of Bhadar River's riparian areas and tributaries of the river includes parts of Gondal , Jetpur , Jamkandorana , Dhoraji and Upaleta talukas. In this way Rajkot district is associated with various geographical matters.

Rajkot city located at the center of Saurashtra is situated at an altitude of 138 meters above sea level. The temperature of the city remains as high as 43 degrees centigrade and as low as 0.7 degrees centigrade.

1.2 Location of District:

1.3 Administrative Setup:

Subdivision of Rajkot District

➤ Tourism

Mahatma Gandhi Museum , Kabagandhi Delo , Ramakrishna Ashram , Swaminarayan Temple , Bhubaneswari Temple , Swaminarayan Temple-Gondal , Virpur-Jalaram Temple , Dhela Somnath , Shail Caves and Osam Dungar.

➤ Residence.

Rangila and Raliyamana Rajkot city has many cultural activities going on and in order to boost this folk art cultural activity and the city people get its benefits, the beautiful Hemu Garhvi Natyagriha Auditorium has been prepared in the city. Many different cultural activities are taking place in it.

Actor known from Rajkot has achieved a name in Mumbai's Bollywood. Talking about such artists , Manhar Udas , Nirmal Udas and Pankaj Udas, these three brothers studied in Rajkot, moved to Mumbai and entered the world of music and ghazals. One such music in case is two musicians from Rajkot who are well associated with Mumbai and Bollywood are composer Mr. Vijay Davda and Mr. Pankaj Bhattal folk in case artists like Mithabhai Parasana, Jitudan Gadhvi, Bihari Gadhvi, Hemant Chauhan have kept Saurashtra's folk literature alive brave , hardworking and hard working.

In Saurashtra, the amount of rain is less , cold and hot, especially coastal area, but if we look at the vast culture, there are important pillars of culture standing in villages reminding the stories of Virta in the villages. Not only the history of the folk cultures of Paliya but also the concept of virta and khumari. Saurashtra-Kachcha handicrafts , folk art are amazing. There is regional artistry in Bhatigaal embroidery and painting. There is a caste system. Aboti Bharat , Rabari Bharat , Kathi Bharat etc. are well known. Pearlwork art has developed well in the villages of Chotila , Jasdan , Jetpur and Sorath in Saurashtra. Eye catching samples of Bhatigal moti work are found and the fragments of com are found.

Saurashtra-Kachchh is the cradle of saints , mahants and heroes and its adventurous and hardy people are determined to keep its culture alive in the spirit of co-operation and harmony even in the face of adverse natural conditions, to develop its craftsmanship and to further perpetuate the unique talent of Saurashtra-Kachchh. .

The contribution of Rajkot in theater is good. Art directors and artists of Rajkot Mr. Ramesh Mehta , Mr. Mansukh Joshi Late Hemubhai Gadhavi, Mr. Hiralal Trivedi , Mr. Bharat Yagnik , poet Mr. Manilal Pagal , Mr. Gulabbhai Shah , Mr. Amrit Dhayal , Mr. Rushwa Mazlumi etc. have given a good boost to the art. So self Great personalities like Mr. Nirbhaybhai Bhatt , Mr. Arvind Dholakia , Mr. Jayamalbhai Parmar have been providing importance in the field of art education and literature. Jayortidhar Sama of Gujarati literature Mr. Gaurishankar Joshi (Dhoo Maketu) was also a native of Virpur in Rajkot district. Rangilu Rajkot also occupies a leading position culturally. The Lok Mela held every year on the festival of Janmashtami is known throughout Gujarat. The festival is a favorite of the citizens of Rajkot. If you eat the ice cream of this city once, it will remain in your mouth. Tourists visiting this city also enjoy the unique taste of Rajkot ice cream. Markets and traders of Rajkot also have that specialty. Markets generally open at eight o'clock in the morning and close at around one o'clock in the afternoon, then open at four o'clock in the evening and close at eight-thirty at night.

Whether we are talking about Penda of Rajkot or Chevda, Wafer or Kharisingh, or talking about Cheeky or papad, the turnover of the people who are involved in the common business of papad can be imagined that it will be amazingly big. The green chutney of Rajkot has become a center of attraction for Gujaratis living abroad.

Spread over an area of 125.1 square kilometers, this city is progressing with leaps and bounds in terms of development. The first industrial colony of the state was established in Rajkot of Udyognagar and the oil engines of Rajkot have become famous in foreign countries by crossing the borders of the country. Rajkot has gained a place in the national map of Ladhu Udyoksha. Only four

prototype development and training centers are working in the country. One of them is established in Rajkot. About 60% of the engine production in the country is done in Rajkot.

For tourists visiting Rajkot, there are centers of attraction such as Raliyamana Racecourse , Ramakrishna Temple , Rajkumar College , Jubilee Bagh , Watson Museum , Gandhi Smriti , Kabagandhino Delo , National School , Sardar Memorial , Ajidem, Ishwariya Park and Praghuman Park .

Bhubaneswari Temple at Gondal near Rajkot , Akshar Mandir , Jalaram Temple at Virpur are well known among devotees. Rajkot district which is known for tapur saree industry.

The famous Somnath temple is 196 km from Rajkot. So it is another dream to watch Vanraj Savage roaming freely in the only Gir forest in Asia. Sasangir Rajkot is at a distance of 180 km. The legendary town of Riarka is about a kilometer away from Rajkot.

Due to the severe drought situation, an unprecedented water crisis occurred in Rajkot city earlier and for the first time in the state, water was delivered to Rajkot by train, 65 km from Rajkot. Bhadradam based permanent water supply scheme

The population of the city has reached over 19 lakhs today. Municipal Corporation has been functioning in Rajkot since 1974.

➤ **Educational.**

Primary education is a basic requirement. Primary education facilities are managed by Rajkot District Panchayat. There are 38 new primary schools in isolated settlements in primary education facilities in 11 talukas of the district and now there are 490 Private schools, 866 primary schools in which 2,24,670 students are studying .

A total of 19980 school rooms have been planned for primary education. Against this, 206 works have been completed. Repair work of 213 rooms has been completed.

Physical needs and educational equipment of schools have been provided under Operation Black Board scheme of Govt. Children from 6 to 14 years of age who do not come to school are organized and subjected to mass prostitution every year. Class 1 classes have a child friendly section. As many as 1110 children's classes have also been made operational.

To improve the quality of primary education, teachers of all classes are trained according to the new textbooks, so that the teachers are aware of the basic requirements and trends.

In Zilla Panchayat Adajapatra, efforts are made to make basic education possible by providing financial provision for science fair , annual examination , best school , drinking water facility , children's drawing classes , giving administrative literature to primary school teachers etc. 40, 456 more children study in 9 primary schools of under Rajkot Municipal Corporation. In order to raise the level of education, the state government has started the District Education Training Bhawan in Rajkot.

There are 312 district secondary schools and 10 higher secondary schools. 78,065 students study in them. Saurashtra University is headquartered in Rajkot. As many as 105 colleges are associated with this university. Various postgraduate level courses are conducted in the university building. There is also a functioning medical college in Rajkot city. Similarly, A.V.P.T. Technical Institute and VV Engineering College , Pharmacy College etc. are functioning.

➤ **Rajkumar College.**

Rajkot Rajkumar College is an institution of special importance in the state. During the English rule, the princes of the princely states had to be sent to England for study and it took months to go to London in the meter, so that the princes could get an education like Cambridge in the country, an educational institution was started by making contributions from the princely states.

In the year 1968, the Governor of Mumbai, Scott Fenrive, laid the foundation stone of the building of Rajkumar College and since 1871 Rajkumar College had all the Rajkumar students as its students.

Gondal Sir Bhagwatsinhji , Takhatsinhji of Bhavnagar , Shri Bawajiraj of Rajkot , Wadhaji of Morbi , Jam Ranjit of Jamnagar etc. were students of this Rajkumar College. The Jam Ranjit Ranji Trophy cricket tournament is held in Jam Ranjit.

Sir Bhagwat Singh was a civil engineer and did the beautiful town planning of Gondal. The method of underground wiring was implemented in Gondal and he was also the pioneer of Bhagwat Gau Mandal.

It is said that at that time the princes used to come with their rasalas for study purposes and used to have separate rooms for them. In addition to various sports, horse riding was also taught to the students of Rajkumar College.

The first principal of this institution was Mr. McWatton. When Captain of Punjab Regiment Mr. Peter Rogers served in this institution for 42 years, out of which he remained as Principal for 27 years, he contributed a lot in the development of the institution.

Poet Nanalal also served as a teacher in this Rajkumar College. The college has a grand campus , main building , sports grounds, etc. The complex of Rajkumar College is spread over an area of 26 acres. The present Shastrimedani here was also earlier known as Rajkumar College Ground.

The students who have taken education here have reached rich and high positions. Many of them are I.A.S. , I.P.S. , I.F.S. , Aamir , Air Force etc. have reached high rank.

Students from foreign countries also come to study in this institution. Here the overall development of the students is taken care of.

The magnificent and artistic building of Rajkumar College is a sight of Rajkot. Its magnificent Bhavsinghji Hall and the various weapons displayed in it attract everyone's attention.

In 1838, public schools were built at four places in the country for princes. They include Rajkumar College in Raipur , Meryo College in Ajmer , Dali College in Indore and Rajkumar College in Rajkot. Here studies and examinations are conducted as per the Central Board of Secondary Education.

The tattoo program in Rajkumar College is becoming very attractive. In the olden days, there were 20 small and big kingdoms in the state of Saurashtra, when the folk poets , the vigor of the folk writers and the passionate , love and sentimental folk literature compositions used to shake the hearts of the people. Even today, the folklore of Kathiawar continues to attract people.

"O Raj, I like the color of Kasumbi, drink the color of Kasumbi in the heart of Janani, Oh Raj, I like the color of Kasumbi..."

Such works of folk literature that celebrate the day of Manavi have become a heritage of the folk cultures of Saurashtra.

Another such age-old educational institution in the city has celebrated its centenary. This is an institution. Saurashtra High School years ago, dignitaries have been taking education in this institution. The students of the institute have also shone in the board level results. In the technical field AV Parekh Technical Institute popularly known as AVPT.

➤ **Ramakrishna Ashram.**

Spiritual , educational and service activities, the Ramakrishna Ashram attracts the attention of every passerby as it passes over the Rajmarg Sama Yagnik Road of Rajkot. A grand and grand

1.4 Statistics of Rajkot District.

Sr. No.	Office Name	Statistical information
Administrative structure		
1	District Panchayat	1
2	Talukas of the district	11
3	Taluka Panchayats in the district	11
4	Municipal Corporation in the district	1
5	Municipality in the district	6
6	Number of villages in the district	595
7	Industrial estates in the district	13
8	Sub Divisions of the District	6

1.5 History of Rajkot District.

Rajkot is the industrial center of Saurashtra. Bhakitnagar, the first industrial colony of the country and established in Udyognagar Rajkot, Rajkot is very big in the field of diesel engine production in the country. The same is the case with Sonachandi Bazar of Rajkot. Rajkot gold and silver craftsmanship is famous abroad. The name of the city of Rajkot is known throughout Saurashtra in the field of small industry. Rajkot is bustling with industrial activities, Rajkot is the center of Saurashtra, which is constantly working with cultural arts and sports activities Strongly pushed forward.

As mentioned in poet Mr.Narsinh Mehta's poem that kathiawad be a land of God, holy saints, which is importantly a part of Mahatma Gandhi's nation, is a famous place for the king of the jungle as well in Gir throughout Asia, whose giant roar brings a thrill to anyone who listens to it.

Rajkot city was founded by ThakorjiVibhaji in the year of 1610, and he ruled about 282 square miles area with 64 villages throughout. In 1720 the deputy subehdar Masum Khan belonging to Sorath regiment defeated the ruler and the name of Rajkot was changed to Masumabad. After that in the year of 1732 the son of the deafeated ruler Meramanji took the revenge of his father's defeat by defeating Masum Khan again and kept its name Rajkot again

In the year of 1822 the British rule established an agency and kept its name Kathiawad agency. The present Kothi area which houses the customs and railway offices used to house the officials of that british agency during that period. During various changes there was a change in the leadership and again the whole area belonged to the agency which is at present the Sadar area Rajkot was linked with Wankaner through railways in the year 1889. In 1893 rail link was established between Rajkot and Jetalsar. During that time mostly meter gauge trains were used, and which formed the main lifeline of the transport within the areas.

Due to meet the water needs of the Rajkot city which is built on the shore of the river Aaji a new lake called Lalpari was established in the year of 1895. In 1921 the political leadership of the Kathiawad first met in Rajkot. And during this time Lakhaji Raj represented the first meet and established the first settlement of the political leadership in the area. In 1925 Mahatma Gandhi for the first time visited the city and thereby established the first educational activities. Today it is a well-established centre for rural industries.

In 1937 Vadhera started a wide agitation again the atrocities of Diwan Viravada and thereby started the first satyagrah. And this was finally resolved by Sardar Vallabh bhai Patel. This resolution was finally let down at a later stage and with this development Mahatma Gandhi started the hunger strike to denounce this move. 1942 quit India movement was also a major contributor for Rajkot to become a major hub for the developments as well.

The city's Jubilee Bagh and its grand edifice houses artefacts and artefacts reminiscent of the 100-year-old Leng Liabrary kingdoms on the one hand. There are many other things that attract the attention of Watson Museum visitors.

Today the building has a large hall at the front, which was earlier known as Connaught Hall and is now known as Arvindbhai Maniyar Hall. Many different programs are held in this hall every day. The hall in the heart of the city suits everyone.

The Saurashtra state assembly once sat in this hall. At the rear of this building are the regional information office of the Saurashtra-Kachchh division and the offices of the archeology department.

A place known as Kothi Compound near Jubilee Bagh was once called an Agency Station during the British Government and the Political Agent for Kathiawar used to live in a huge bungalow in the Kothi Compound. Today, the divisional office of the railway sits there and there are railway quarters in addition to the railway offices in the Kothi compound.

© Racecourse

Racecourse is sweet. People come out every morning, evening or even night to round this race course. This is the daily routine of conscious citizens of the city for physical fitness. A beautiful garden has been created in front of the multi-storied building in 4 thousand square meters. Along with the underground cable, 4 light poles have been installed with advanced lighting system. A stop garden has been constructed in front of the racecourse. Children and advanced children playgrounds are created.

Happy Saurashtra Dharani

Hinddevi, the Atari of Central Asia in the west, leaning on the mighty Indus

She was like a sharp dagger shining at her waist

Dhanya Ho Dhana Saurashtra Dharani

- Poet Tribhuvan Vyas

Before independence Bedinaka , Ramanathapara , Bhicharinaka , Sardhar's Nakku , Kotharianaka , Gundawadi i.e. Dhebar Road was known as Old Rajkot and the western side area after Dhebar Road is New Rajkot i.e. later developed area. On the Dhebar road, where today there is a constant flow of vehicles, once a railway train used to take tea on that road and Bhakitnagar station did not exist.

The city improved with systematic town planning , water tanks , modern pump houses , electricity, grand entrance gates , grand school buildings. Panchayat Dharko , Filter Plant , Bhurgab Sewerage Schemes , Under Ground Street Light , Darbargarh , Wide and Magnificent Four Roads , Sports Grounds, Railway Lawns and Railway Stations , Gardens , Pavements , Highways , Footpaths , Town Zoning , Check Dam , bring it , Bridges and culverts on rivers , flood protection walls on rivers , lined wells , MS of water distribution. All aspects of public life, including pipeline networks , telephone lines , books, are developed with the vision of Benmoon architecture.

© First railway in Saurashtra.

Before science had yet touched the land of Saurashtra, the mare of Khakiyawad were known for their speed and strength. Earlier, there were no paved roads and motor railways or airships were not known since then, people's business was carried on by horse carriage and seal.

There was a traffic situation at that time when the tappa was running between Rajkot and Wadwan. There was always a fear of to rob by thieves , bandits and outlaws on the way, so there was a need for armed guards in the forts and Shidharams. Those who were unequipped traveled on foot, but at the risk of their lives, in those days time was unlimited and distance was limited. First railway

in Hindustan between Mumbai-Thana in 1853 and B.B. And C.I. The railway line came up to Viramgam in 1871. Exactly 20 years after the first railway line was laid in Hindustan, the railway line was laid on the land of Kathiawar and Viramgam became the nose of Kathiawar. Railways started in Kathiawar in 1879. Bhavnagar Darbar took the initiative in this matter and laid the track from Bhavnagar to Vivan. In the same year, the Gondal Darbar built a 74-mile railway from Dhasa to Dhoraji, Junagadh and Porbandar Rayo also in 1885 and in 1889, the Darbar built a small-gauge railway, initially between Rajkot Wadwan and later converted to meter gauge. In this way, it was a big stretch from Viramgam to Vadwan to provide continuous meter gauge to the meter gauge railway from Saurashtra to Delhi. It was converted into meter gauge thus connecting Saurashtra with Delhi and North India by rail. At the beginning of the twentieth century, Kathiawar had 360 miles of medium and narrow gauge railways, including the Vadodara State Railway in Kathiawar. During the next 30 years there was rapid progress and as a result the railway extended to 1041 miles. In 1948, when more than 200 states of Kathiawar were united and the united state of Kathiad came into existence. Then the five separate railways of Kathiawar were merged and the government took over the business of the railway on 1st April 1950. After this, Saurashtra Railway started mail trains which can be reached quickly to provide more convenience to passengers which include Okha Mail , Rakirthi Mail , Somnath Mail etc.

The road now known as Sariwalisherhi came to be known as Sidwalisherhi as people walked to the street from the railway bridge.

During the British rule, Rajkot was the headquarters of the agency, and the kingdoms of Kathiawar were located in the city of Rajkot. Like Junagadh , Bhavnagar , Vadwan , Palitana , Jamnagar , Saila , Mengani etc. Guest houses of different states were in Rajkot city.

Rashtriyashala in Rajkot city became an important institution during the struggle for independence. Father of the nation Mahatma Gandhi did a historic fast here. Rajkot's royal Sir Lakhajiraj Prajavatsal was a royal named after his name. Rajkumar College for education of the sons of kings-maharajas is located in the heart of the city. Cricketers like Jam Ranjitsinhji also took education in this educational institution.

Gold and silver ornaments have also made the name of Rajkot city famous across the country. The gold and silver ornaments made here and the artistry here have put four moons. Be it Mumbai or Delhi , Indore or Bangalore, the art of Rajkot has enhanced the beauty of the big showrooms of ornaments across the country.

Ornaments of the State To see the ornate reality of the golden dream of a Navli woman, famous in the country and abroad, one has to see the gold market of Rajkot. The city of Rajkot is world famous for gold and Silver weaving and artistry. In addition to Soni Samaj of the city, 15 Jetal Yehubar schools have contributed significantly in giving Rajkot this award.

Fifteen decades ago, there was a gold market from Kotharia Naka to Darbargarh in the city. Fifty-six stores of Sony were in this market. Mattresses used to be sold in these shops. There was a trunk inside. It used to stay between the trunks. In which work was done to melt the gold. With the tools like anvil , hammer , pen , saw , tongs and jatda, the goldsmith himself used to make jewelry from the edge to the bottom, the bones of fifty years ago are not seen today. Sony bazaar shines with opulent showrooms in keeping with the times. There are about 450 small and big shops in the city.

According to an estimate, about 60,000 gold and other artisans are engaged in making gold and silver jewelry today. Gas has now taken the place of Bagheti. Equipment also changes with time. These artisans prepare artistic ornaments by pounding more than two hundred kilos of gold and more than two thousand kilos of silver. According to an estimate, the artisans pound gold and silver jewelry worth more than 15 crores daily. The bow of design is important in jewellery. The gold and silver artefacts produced in Rajkot are famous in the country and abroad.

The racecourse in the heart of the city is full of laughing, playing and jumping children who draw their parents here. There is also a swimming pool for swimmers. So a painter or an artist to exhibit his art and also an open air theatre. There is a regional folk science center for science activities. Pujit Rupani Trust is doing many different types of child development activities in the city.

Today, international cricket matches like Racecourse ODI are also held and facilities have been created where thousands of spectators can watch these matches. Coaching is also held at Racecourse Cricket Play Grand to prepare future cricketers. Overlooking the city, the Swaminarayan Temple is becoming a center of gold attraction on Kalavad Road in the city. Spiritual and religious activities are constantly taking place in this temple. Thus, Kalavad Road is the education zone of the city. There are many schools in this area, apart from the colleges, there are also national universities. There is also a huge campus. So there are important hospitals providing medical treatment like Satyasai Heart Hospital , Gondhia (Wockhardt) Hospital , Rustling Hospital on this route. In this way, the city of Rajkot has created a distinguished reputation in many different fields and is gradually climbing the peaks of progress. Rajkot was once the capital of Saurashtra state. On November 1, 1956, Saurashtra State was merged and Mumbai State was divided and Gujarat State was formed and even today Rajkot continues to be an important district of Gujarat State.

➤ **Dhoraji**

The area of the old Gondal state was spread over 8 mahals. Dhoraji Mahal was 51 km away from Gondal. This city was the name of Dhoraji Ness from Gaekwad time. Dholiben Rabari's Ness was on the banks of Shakranadi. The shaping city was built.

(Old Entry Gate of Dhoraji(Tin Darwaja)

Osam area is located at a distance of 1 km from Patnawav village of taluka in the south direction. The area is known as Olam. The remains of the village show how important this area was after Gaikwad times.

This taluka mainly belongs to Leua and Kadwa Patel , Kharedi Brahmin , Jain and Memon communities. At a distance of 5 km from Dhoraji is Fareni village , where Bhagwana Swaminarayan's guru Ramananda

Swamishri took place. There is a Deri at this place as well as a temple of Lord Hanuman. There are shrines of the great Saints of the city like Sammohiuddinchisti and Lalsarapir. A night fair is held at this place every year.

The Darbargarh of Dhoraji was built by Bhakubhaji, the erstwhile Gondal royal, which is a monument protected by the state government gate. Entering this Darbargarh. A finely carved Yukat building is seen. Sculptures of lions, elephants etc. are carved on the chhaja. Both of the following manalas are punishable by fine. The windows and windows of both the floors are decorated with various full vines and Jalar Bhats. 18 m. This one of the finest examples of the century's heritage is today protected by the Dhoraji government.

Dhoraji city and taluk have a good reputation in agriculture. Groundnut production is considered good in this area. Dhoraji is at a distance of 89 km from Rajkot city. Bhagwatsinhji High School in Dhoraji town is old. A technical high school is also functioning here. Plastic industry is also developing in Dhoraji since some time. A total of 24 trains are working in Dhoraji, including 17 nationalized trains and 7 cooperative trains.

Dhoraji Fort and Durbargarh.

At the time when Dhoraji was achieved, there was a lot of fear of looting and raids by robbers. So, for the safety of the people, Darbar Shri Haloji and Kumar Shri Bhakumbhaji started building a fort around Gondal in Samvat 1803, but before that fort was completed, Bhakumbhaji found it necessary to build the fort of Dhoraji. So, in Samvat 1805 AD, the fort of Dhoraji was deeded and the work of building the fort of Gondal was postponed.

The construction work started in full swing. Halaji was very diligent in building this fort. So he settled in Dhoraji. He always started the labor himself. He should be present himself when the work starts in

the morning. He used to start the work by picking up a stone himself and placing it with the craftsman. Thus, the work begins. The craftsman would break the stone and immediately start all the hard work. In this way, for three-four years in a row, Darbar himself started the daily work. Durbar Haloji passed

away in Samvat 1809. At that time the work of the fort was almost completed. The height of the fort was kept at 20 to 100 feet above ground level. This wall was built eight-nine feet wide from the base. On the way up, a two-foot wide wall was raised to a height of one metre, and the rest of the width was kept for a road that could be turned around the village. A two-foot-wide wall housed Sindha and Trasa cannons for firing and large square niches for firing cannonballs. At the base of the fort, there were also turrets where guns could be pointed at the attackers. A barrage was also placed in order to stop them from breaking down the main gate. A door-post was placed diagonally across the outer side wall of each door and was built over one end of the door. Its secret is worth knowing.

Each door has thick plank reinforced doors, sharp nails are embedded in the door, the edge of the nail comes out in a sudden jet like this nail is called a spear, it takes the strength of an elephant to break a door with a spear. If the elephant bangs its head on the door, the door locks will come out and the door will fall and the way will be opened. But because there is a spear in the door, the elephant

is pierced by hitting its head. So the assailant makes such a trick that the camel is standing with the door horizontal and the elephant runs and hits the camel's head, then the camel is pierced with a spear and the door opens due to the push of the elephant. But the elephant's head must run first. The more it runs, the more it can hit its head. The door was carved horizontally so that the elephant could always run in a straight line and therefore the elephant's run could not be long.

There were wonklas to the east and west of the fort. To the north was the river. A trench was dug adjacent to the fort towards the south. Thus , the entire fort was built with a warlike defense in mind.

The upper wall of the fort is on the bank of the river , so the wall was slightly rounded like a seed moon to prevent the flood water from hitting the fort. In the fort, trenches were made everywhere and round kothas were built everywhere. Kotha was used to keep supplies for the soldiers who were on the line and to arrange their food and rest.

© New competitors.

After the tower of the fort was built , people started coming from outside as well. Vadhasiya ,

Inner steps of Dhoriwav on Junagadh Road

Kanbi came first. His family was rich , so he was given 1000 acres of agricultural land along Fareni and Torania roads. Therefore, a new window of Vadhasinya was placed in the fort to facilitate access to that side. When the woolen

bales were pressed for tying and later this cotton was ginned. Then a new door was installed. When

it was decided to bring the railway to Dhoraji and

the railway station was built. Then a road was built up to the station for the convenience of commuting. The gate of Junagadh has been re-opened. At that time the management was ongoing and the state administration was in the hands of the administrator.

After the gate of Junagadh, the gate of Sorath became useless. So he was still forever renting that door. In Samvat 2019, the city of Sudhraiya built a town hall in the outer part adjacent to the fort. Then this door was thrown down.

When new Aline were planned to be built to the east and south of the fort , after AD 1984 to connect the Aline settlement roads with the village road, the fort was razed and its stone was cut to pieces and reused or sold.

Cement was not even invented when the fort was built. However, the construction of the fort became so strong that even after one and a half years, it takes a lot of effort to break it down. It is said that all the stone of the fort is from the same quarry. A large stone slab was found on the Bhadar bank. A mine was dug there , it was called Dhankeda mine. Now that mine is closed.

© Shri Bhagwatsinhji Hari School.

Volunteers Union High School was initially housed in Jean Darwaza Dak Bungalow. But later turned from there and was run by Kuber Pari for some time. When the government took over the volunteer school, then the middle school run by the state government and this school were merged and the building of the middle school was increased and this school was given the name of Shri Bhagwatsinhji High School.

First this high school was located near the new association building, with time the number of students started to increase, Maharaja Sir Bhagwatsinhji and Bhakumbhaji aligned a new school building was planned to meet the influx of future students but after the death of Sir Bhagwatsinhji, the plan was thwarted. Bhagwatsinhji dug the foundation of this magnificent building and built black stone chairs. After the independence of India, the government of our people started the work of building this high school for ten years. At present Shri Bhagwatsinhji High School is running in both old and new buildings and almost as many students as S.S.C. Sits in the new class of In the third five-year plan, this high school was converted into a technical high school.

© Muslim High School and Muslim Middle School.

Seth Haji Wali Mamad, Haji Hasan Dada Kunda took a huge plot on Station Road and spent a huge amount of money in it and built the present Muslim High School. This high school has started from AD 1988. Only Muslim students study in higher standard. Currently, the number of students has increased to over 400. Classes from class 8 to 11 are taught in this high school.

The Muslim Middle School has been started since 1932 AD by the efforts of two other Muslim householders, Seth Ahmad Nagaria and Seth Haji Mammad Tarmamad Teli. This middle school is currently running opposite the girls school. About 400 to 500 Muslim students study in the school.

© Girl Education.

Maharaja Sir Shri Bhagwatsinhji started standard education for girls. In 1887 AD, the foundation of a girls' school was laid outside the gates of Junagadh by Governor Lord Ray of Mumbai. After the construction of this building named "Lady Ray Girls' School", independent studies were provided for the girls and in 1919, a decree was passed to make girls' education free and compulsory in the entire state. Since then, teaching of girls started strongly in Dhora, gradually this school turned into High School and now S.S.C in Girls High School. Classes run up to Apart from this, a separate school for girls is run by the Education Department of Gujarat Government in the old association building and runs up to standard seven. Apart from this, co-education of girls and boys in the taluka school and all the branch schools under it continues till standard seven.

➤ Gondal

Gondal State, located 35 km from Rajkot, was a thriving and progressive state before independence. At the end of the 19th century and the 20th century. At the turn of the century, Maharaja Bhagwat Singhji made the state a progressive state. Gondal brought railways to the state. The very first tram in Saurashtra built such good routes in Gondalas. Things like schools drainage system, irrigation were given importance in the state. Besides, free education was made compulsory. Took special interest in girl child education. Bhagavad Gomandal Granth was also produced at that time.

Gondal is a model city for well organized town planning. The architecture here is fascinating. Gondal's Veri Lake is an excellent example of public construction. The development of the city of Gondal shows a beautiful blend of ancient and archaic times. The city of Gondal has progressed with the times. Gondal taluk is providing well in the field of agriculture, cooperation, business industry etc.

Many people come here to visit Yogi Smriti Temple, Akshar Temple and Puran Swaminarayan Temple as well as Bhubaneswari Temple, Ashapura Temple. Gondal's marketing yard is located on the Rajkot - Junagadh highway. Khambhalida is seven kilometers from Virpur on the banks of the Bhadar river. There are five caves here dating back to the 2nd-3rd century AD and these are believed to be the caves of the Buddha period.

In Gondal there are Srinathgarh, Shail Caves, Rajkot Government Protected Building Monument at Rozdi, a Harappan village settlement. Rozdi Timbo is situated on the right bank of Bhadar Nandi. This settlement is north-south Rs. long and east-west 150 m. It has a width of 4 m. has a height of Timbo is a rural settlement with a small town. A protective wall around the village is constructed of large rocks. A large entrance gate has been planned in the north-east with a large fort. Internal fortifications have also been made separately. The rooms of the building are large in size. Some of them also contain grain sugar rolls. The Harappan pottery from the settlement is similar to other contemporary settlements of Saurashtra with a regional sheen. One karakara bears letters in the Harappan script. Among the vessels found are kothis, matlas, vadvkas, large saucers, dishes-on-stands, vadas with handles and characteristic perforated ware of the Harappan period. Apart from this, beads like agate, jasper, shell and carnelian have been found. Shell beads, bangles, copper tools etc. have also been found. Apart from farming and animal husbandry, the people here probably also traded. The earliest settlement dates from c. P.O. 1000 to 1600 BC and the period of late settlement in AD. P.O. 1800 to 2000 is considered.

A typical rock-cut cave architecture is situated on the banks of a flowing spring near Khambhalida village. The group of Shailotkirna caves are in five clusters, the most important of the caves in the second cluster is the middle cave of the complex. The kind of sculpture seen in these caves is not seen in any other cave in Gujarat.

Minalvav built by Minaldevi, the mother of Solanki king Sigdharaj Jaisingh at Virpur village of Gondal taluka is one of the protected building by government. The Nanda type entrance is from one side and a series of steps directly leads to the water. This vav has three kuts, in the wall of each kut there is a shrine, in which idols of gods and goddesses are installed.

➤ **Jasdan**

The area around Jasdan in Rajkot district is known as Panchal region. Jasdan is 63 km from Rajkot. is at a distance of Here the diamond industry , Patara and handicraft industry has developed. The area of ancient temple Ghela Somnath , Bileswar Mahadev , Higolgarh near Jasdan is attractive for environment lovers.

© **Hingol Garh Nature Education Sanctuary**

10 km from Jasdan in Rajkot district. Distance 6.54 km. Higolgarh Nature Education Sanctuary scattered in the area is a must for environmentalists. It is in Motisar VD area. Hummingbirds , large geese and other migratory birds are found in this sanctuary. This sanctuary has been established to impart nature education to school children by conducting nature camps.

The ancient forts of the erstwhile native kingdoms of Jasdana become the main attraction for these camps. November to March is the best season to visit this sanctuary.

➤ **Jetpur**

Jetpur city is known for saree industry. Vaselua city on the banks of river Bhadar is the main center of dyeing and printing of sarees. About 35 thousand people are getting employment from this industry. 20 lakh meters are produced in a day in 850 units. About 70 percent of the finished goods are exported. 400 KV power substation near Dhareshwar temple is available in most areas of Saurashtra. Power is distributed. Navagarh is on the railway line. 3 km from Jetpur there is a temple of the legendary Keralashwara Mahadev on the banks of Bhadar , Hemendri and Sakario rivers. Here the Pandavas made a state visit. It is also popularly believed that Bhima died from this place for Hidamba's marriage.

Kamleswar , Someshwar Mahadev and Surya Mandir , Rambhakta Hanuman Mandir , Gayatri Mandir etc are on Rajkot Road. Bhidbhanjan Mahadev Temple is also ancient. British Political Agent W. Anderson built a bridge over Bhadar River in 1874.

There are two separate routes from Jetpur to Porbandar and Junagadh. Along the route to Porbandar, Dhoraji and Upleta towns are known for agricultural cooperation and plastic industry. Groundnuts are produced well in this area. 13 m in the old Shakli village in Jetpur taluka of Rajkot district which reflects the splendor of the Solanki period. A century-old monument is the temple of Sankleshwar Mahadev. The entrance hall of the sanctum sanctorum in this temple is three-branched. This temple is decorated with sculptures of various forms of Shiva , digpalas and apsaras and sages.

© **Virpur (Jalaram)**

On the way from Godnal to Jetpur is Veerpurjalaram Bapa's shrine. Every day a large number of devotees and tourists come here to visit the Jalaram temple. The special feature here is that instructions have been placed requesting no donation or gift in the temple. Pujay Jalaram Bapa's life mantra was public service. Prominent Gujarati writer Dhumketu was from Veerpur. Here is an archeologically important mine.

➤ **Upleta**

Three cities were in existence under the rule of Gondal kingdom. Among them were Gondal , Dhoraji and Upleta and the main cities. The then long-sighted royal Sir Bhagwatsinhji ruled for a long

time and did fundamental welfare works for the people of the state with the best administration. Sarbhagwat Singh ji's regime maintained the inner image of folk culture and carried out many development works with long-term planning. He gave clear and concise administrative laws and strictly gave public oriented administration. During the celebration of 50 years of his reign, as part of the Golden Jubilee Festival, many works were inaugurated and the buildings prioritized the well-being of the people were opened which are still in use. The city improved with systematic town planning , water tanks , modern pump houses , electricity, grand entrance gates , grand school buildings. Panchayat Dharko , Filter Plant , Bhurgab Sewerage Schemes , Under Ground Street Light , Darbargarh , Wide and Magnificent Four Roads , Sports Grounds, Railway Lawns and Railway Stations , Gardens , Pavements , Highways , Footpaths , Town Zoning , Check Dam , bring it , Bridges and culverts on rivers , flood protection walls on rivers , lined wells , MS of water distribution. All aspects of public life, including pipeline networks , telephone lines , books, are developed with the vision of Benmoonarchitecture.

1.6 Rainfall

During the Monsoon season rain is brought by seasonal winds. Rain lashes it in June's last week till September's last week. Taking into account the statistics of rainfall in the district during 2015 to 2025 , the average rainfall of these 10 years and the details of rainfall during rainy season - 2025 are as follows.

No	Name of Taluka	Average rainfall in last 10 year (mm)	Rainfall (mm) during Monsoon- 2025

❖ List of Chemicals and Their Antidotes

Sr.	Chemicals	Antidotes
1	Acid & Sulphur Oxide	Sodium Hydro- Carbonate (4% Conc.) Milk, Lime Juice, Milk of Magnesia.
2	Ammonia	Skin: Wash with Lactic Acid, Apply soframycin. Eye: Benoxynate Novacin-0.4% Conc. Throat: Smelling Ethanol or Ether
3	Benzene, Zylene, Toluen	Wash the skin area plenty of water if affected. Fresh air / Oxygen, 0.1 mg/kg slowly through injection rest in bed. Don't apply Epinefrin, Ifridin etc. Don't apply milk, vegetable oil or alcohol.
4	Bleaching Solution	Milk, Ice cream, eggs, milk of magnesia, aluminium hydroxide gel. Do not give acid antidotes.
5	Boric acid and boron deritives	Epicake solution and activated charcoal. If vomited, give 5% dextrose through injection.
6	Bromates or Cosmetics	Sodium thio sulphate 1ml/ kg 10% solution through injection.
7	Cadmium	Calcium dysodium editate through injection.
8	Carbon monoxide	Pure oxygen through a mask. 20% mennytole (1gm/ kg) prednisolon 1 mg/kg through injection.
9	Cyanides and thio cynates insecticides	Methelene blue or kelocynere injection. If go through respiration smelling amaile nitrite (3% solution) and sodium thio sulphate (25% solution) through injection.
10	DDT (Halogenated Insecticides)	Epicake syrup, activated charcoal, saline cathartic diazepam (10 mg slowly through injection, wash the skin through water and soap). Give pure oxygen if there is a problem in respiration.
11	Di- chloro methane	Hydrocortisone (200mg at every 4 hrs.) Aspirin and if pneumonia gives antibiotics.
12	Ethanol	2 gm sodium bi carbonate in 250ml water. Diazepam 10mg through injection. I injury in eye or skin washed plenty of water.
13	Heavy metal compounds	Activated carbon.
14	Hydrogen sulphide, other sulphides and Marcaptans.	Put the patients at clean air or pure oxygen. Smelling the drops or Ether or Ethanol. Amyl nitrite or Sodium Nitrite, pyridoxine 25mg/ kg or 10% Urea 1 gm/ kg through injection.
15	Iodine & its compounds	Milk, epinefin, 1% sodium Thio sulphate solution 100ml by oral.
16	Irons salts	Concentrative deferoxamine therapy.
17	Magnesium Salts	Calcium gluconate 10% solution 1ml/kg through injection.
18	Manganese	Calcium editate
19	Naphthalene	Keep the urinal Alkaline by giving the Sodium bicarbonate at every four hours. Furosemide 1 ml/ kg in liquid.
20	Nitrogen Oxide	Prednisone or prednisolon 5 mg at every 6 hours.
21	Phosphours, Phosgene and phophide	Calcium gluconate 10% of 10 ml through injection, 5% glucose in water, and travesty (10% inverted sugar) through injection.
22	Potassium permanganate	Hot milk, methelene blue (1% solution), ascorbic acid (5% solution)
23	Silica and asbestoses dust	Dust levels should be minimized, use airline respirator, dust collector and local ventilation.
24	Tobacco and Nicotine	Do vomiting, Etropin (full dose), if problem in respiration give pure oxygen.

56. Action Plan for Earthquake:

Action Plan for Earthquake covers all phases of earthquake management right from mitigation, preparedness, emergency response, relief to recovery.

➤ **Earthquake**

An earthquake is a series of vibrations on the earth's surface caused by the generation of elastic (seismic) waves due to sudden rupture within the earth during the release of accumulated strain energy. The point on the fault where slip starts is the Focus or Hypocenter and the point vertically above this on the surface of the Earth is the Epicenter. The depth of focus from the epicenter, called Focal Depth, is an important parameter in determining the damaging potential of an earthquake. Distance from epicenter to any point of interest is called epicenter distance.

➤ **Earthquake Measurement**

Magnitude is a measure of the amount of energy released in an earthquake. It is mostly measured on a Richter scale. The earthquake magnitude is determined using a seismograph, an instrument that continuously records ground vibrations. An increase of one unit represents an increase of ground shaking by ten times and energy released by thirty two times. Generally, earthquakes of magnitude greater than 5 cause damage while major earthquakes measure 7 or more on Richter scale.

➤ **Earthquake Preparedness & Capacity Building:**

1. Ensure an updated database of critical resources (equipment, lifesaving facilities, trained personnel, etc.) available in the district is in place.
2. Ensure that local authorities in the district are involved in developing their own earthquake management plans.
3. Ensure that District EOC is fully functional, and communication systems are in order.
4. Ensure that open and safe places in the district are identified for mass evacuation.
5. Ensure that site for helipad is identified at key locations in the district.

➤ **Earthquake Recovery**

Detailed Damage and Need Assessment must be conducted before commencing reconstruction and rehabilitation activities. The primary objective of post-earthquake damage assessment and need analysis is to provide a clear, concise picture of post disaster situation, to identify damage caused to different sectors and to develop strategies for rehabilitation, reconstruction and recovery.

➤ **Repair and Restoration**

Respective departments should carry out timely repair and restoration of the related infrastructure, facilities, services, etc. This shall aid in quickly reducing the essential services they provide. GoG shall coordinate with national and international NGOs, donor agencies and other government bodies to prioritize restoration of critical infrastructure.

➤ **Activation of District and Local Level Control Rooms**

At district level, nodal center for coordination and communication is District Emergency Operation Centre (DEOC). DEOC and TEOCs will get fully activated in case of L1 emergency.

57. Action Plan for Heatwave:

Heat-wave is a condition of atmospheric temperature that leads to physiological stress, which sometimes can claim human life. Heat-wave is defined as the condition where maximum temperature at a grid point is 3°C or more than the normal temperature, consecutively for 3 days or more. World Meteorological Organization defines a heat wave as five or more consecutive days during which the daily maximum temperature exceeds the average maximum temperature by five degrees Celsius. If the maximum temperature of any place continues to be more than 45° C consecutively for two days, it is called a heat wave condition.

➤ **Key strategies**

The heat-wave action plan is intended to mobilize individuals and communities to help protect their neighbors, friends, relatives, and themselves against avoidable health problems during the spells of very hot weather. Broadcast media and alerting agencies may also find this plan useful. Severe and extended heatwaves can also cause disruption to general, social and economic services. For this reason, Government agencies will have a critical role to play in preparing and responding to heatwaves at a local level, working closely with health and other related departments on long term strategic plan.

- Establish Early Warning System and Inter-Agency Coordination to alert residents on predicted high and extreme temperatures. Who will do what, when, and how is made clear to individuals and units of key departments, especially for health.
- Capacity building / training programme for health care professionals at local level to recognize and respond to heat-related illnesses, particularly during extreme heat events. These training programmes should focus on medical officers, paramedical staff and community health staff so that they can effectively prevent and manage heat-related medical issues to reduce mortality and morbidity.
- Public Awareness and community outreach Disseminating public awareness messages on how to protect against the extreme heatwave through print, electronic and social media and Information, Education and Communication (IEC) materials such as pamphlets, posters and advertisements and Television Commercials (TVCs) on Do's and Don'ts and treatment measures for heat related illnesses.
- Collaboration with non-government and civil society: Collaboration with non-governmental organizations and civil society organizations to improve bus stands, building temporary shelters, wherever necessary, improved water delivery systems in public areas and other innovative measures to tackle Heat wave conditions.

➤ **Identification of Color Signals for Heat Alert:**

Red Alert (Severe Condition)	Extreme Heat Alert for the Day	Normal Maximum Temp increase 6° C to more
Orange Alert (Moderate Condition)	Heat Alert Day	Normal Maximum Temp increase 4° C to 5° C
Yellow Alert (Heat-wave Warning)	Hot Day	Nearby Normal Maximum Temp.
White (Normal)	Normal Day	Below Normal Maximum Temp.

58. Action Plan for Cyclone:

A long coastline of about 1600 km of flat coastal terrain, shallow continental shelves, high population density, geographical location and physiological features of its coastal areas make Gujarat extremely vulnerable to cyclones and its associated hazards like storm, high velocity wind and heavy rains.

Cyclones are huge revolving storms caused by winds blowing around a central area of low atmospheric pressure. In the northern hemisphere, cyclones are called hurricanes or typhoons, and their winds blow in an anticlockwise circle. In the southern hemisphere, these tropical storms are known as cyclones, whose winds blow in a clockwise circle.

➤ **Familiarization with terminology – cyclone**

Sr.	Types	Wind speed in the center (km/hour)
1	Low pressure area	Less than 31 kmph
2	Depression	31-51 kmph
3	Deep Depression	52-62 kmph
4	Cyclonic storm	63-87 kmph
5	Severe Cyclonic storm	88-117 kmph
6	Very severe Cyclonic storm	118-221 kmph
7	Super Cyclonic storm	More than 222 kmph

➤ **Cyclone Forecasting and Warning**

In case of cyclones, 72 hours advance warning of various levels of certainty are provided by the IMD. This system is well established and the Gujarat State EOC and ERCs gear up emergency operations soon after the first warning is received.

➤ **Cyclone Alert**

It is issued at least 48 hours before the commencement of the bad weather when the cyclone is located 500 km from the coast. It is issued every three hours.

➤ **Cyclone Warning**

It is issued at least 24 hours before the commencement of the bad weather when the cyclone is located within 500 km of the coast. Information about the most likely time/place of landfall is indicated in the bulletin. Confidence in estimation increases as the cyclone comes closer to the coast

➤ **Cyclone Response**

Response includes not only those activities that directly address immediate needs, such as rescue, first aid and shelters, but also includes systems developed to coordinate and support such efforts. For effective response, all the stakeholders need to have a clear perception/vision about hazards, its consequences and actions that need to be taken in the event of it.

The Revenue Department of the State is the Nodal Department for controlling, monitoring and directing measures for organizing rescue, relief and rehabilitation. All other line departments concerned should extend full cooperation in all matters pertaining to the response management of the disaster whenever it occurs.

59. Action Plan for Fire:

The primary role of fire services has been to deal with fire incidents. Besides firefighting, fire departments also attend to other emergencies such as building collapse, road traffic accidents, human and animal rescue etc., and other special service calls. Some fire services also attend medical emergencies for transportation of casualties through ambulances maintained by them.

Fire Starts when a flammable/combustible material is exposed to a source of heat in collaboration with enough oxygen. Fire can be extinguished by removing any one of the elements of the fire triangle. Fire can be natural or man-made.

➤ TYPES OF FIRES – A, B, & C:

Type A - Cloth, paper and wood that produce Ash

Type B - Gasoline, oil, and other combustible/flammable material placed in a barrel.

Type C - Electrically energized fires involving equipment and Circuits or Current

There are many reasons which cause fire such as accidents, electrical short-circuit, carelessness, etc. Further, Gujarat is a highly industrialized State which increases vulnerability. Fire causes huge losses of life and property every year. And yet, with some precaution, most fires can be prevented and damage minimized.

➤ TYPES OF EXTINGUISHERS:

- **Pressurized Water (P/W)-**
These are normally found in residence halls where cloth, paper, and wood are the most common hazards. They are metallic colored and hold approximately 2 ½ gallons of water. They can discharge 25' – 30' for approximately 1 minute.
- **Dry Chemical (ABC) or (BC) -**
These are normally found in cars, laboratories, and other places where gasoline, oil, and other combustible/flammable liquids are used. They are usually red in color and are capable of spraying 10' – 15' for approximately 30 seconds.
- **Carbon Dioxide (CO2) -**
These are normally found only in electrical or mechanical rooms where electricity is the hazard. They are used to putting out electrical fires while the equipment is still energized. The carbon dioxide extinguishers are red in color, have no gauge to indicate number of contents, and are limited to a spray distance of 5' – 10' for about 10 seconds.
- **Halon -**
These extinguishers were used for computer room fires in the past, but their use now is questionable because of health risks associated with the halon agents in a fire situation. Amherst College no longer uses this type of extinguisher or extinguishing agent.
Fire Services in Gujarat are under the respective municipal corporations concerned.

60. Action Plan for Flood & Flash Flood:

Gujarat has seen many damaging floods. Almost all major rivers in the state pass through a wide stretch of very flat terrain (often more than 50 km) before reaching the sea. These flat lowlands of lower river basins are prone to flooding.

The one-day Probable Maximum Precipitation (PMP) is often higher than the average annual rainfall in most parts of Saurashtra and Kachchh. Occasional cyclones and depressions also cause heavy rainfall in large parts of Saurashtra, Kachchh, central and northern Gujarat.

The cities of Ahmedabad, Surat and Bharuch are also located on the flat alluvial plains of large rivers and are prone to flooding.

The Figure shows that almost all parts of Gujarat are flood prone, irrespective of the size of the catchment. It has to be noted that the flood prone villages classified by Flood control Cell is based on the settlements affected.

The Flood risks in Saurashtra are lower than the flood risks in the South Gujarat plains. The relatively flat plains in the lower basin areas with hilly catchments in the upper parts of South Gujarat accentuate flood risks.

The flood prone river sections were identified by the flood prone village map. The Flood prone river sections in Saurashtra extend to the upper basins. This is due to the presence of dams in the upper basins, which must resort to emergency discharge during heavy rainstorms. Flood prone river sections presented in picture

In Saurashtra, the valley areas are the only arable lands due to the presence of shallow rock in higher elevations of the basin. Even small valleys are used for agriculture and hence any flooding in these zones impacts the residents and settlements.

➤ Flood Prevention, Preparedness and Mitigation

Floods, being the most common natural disaster, people have, out of experience, devised many ways of coping with them. However, encroachments into the flood plains over the years have aggravated the flood problem and a need to take effective and sustained measures has been felt. Various measures, structural and non-structural, have been taken by the central and state governments and as a result, considerable protection has been provided to the people.

However, more efforts are required in this direction and there is a need to put in place a techno- legal regime to make flood-proof structures and regulate the activities in the flood plains of the rivers. Flood forecasting and warning and Decision Support System (DSS) will be established on a scientific basis considering the latest technological developments in the world.

61. Action Plan for Lightning and Thunderstorm:

Thunderstorm and Lightning are hazardous and cause risk to life and public property. These are potentially hazardous for the aviation sector as well in addition to transport, power, communication and other socio-economic sectors. Lightning being the flow of electric charges, any electrically conductive body can be affected by lightning. Hence the electrical appliances if operated during lightning period can be affected by lightning. Similarly, the living beings encountering lightning directly or indirectly through electrical conductors can be affected, often leading to death.

In India every year more than 2500 people die due to lightning. Mostly Rural and forest areas are vulnerable with tall trees and water bodies. Majority of the lightning victims are the people working on the field in rural areas. Lightning is also a major cause of electrical power breakdowns, and forest fires. It can also cause damage to communication and computer equipment, and aircraft.

Thunderstorms are a small-scale phenomenon and has a life cycle of up to only three hours. It has a dimension of 2 km to 20 km, and therefore, its detection is difficult. Automatic weather stations (AWS) provide some basic parameters such as wind speed, wind direction, relative humidity temperature, pressure etc.

➤ Preparedness and Mitigation Measures

The lessons learnt from various thunderstorm and squall events in India, particular regarding rescue and relief works and the shortcomings experienced in the process should be carefully and honestly. Lack of communication and transportation, undue delays in clearing the roads and or streets blocked due to the falling of trees, electricity poles and hoardings that further delays in the immediate transportation of the injured to the nearby hospital. The hierarchical structure for execution needs to be formalized so that all efforts are properly coordinated. Coordination of all relief distribution is as important as its quantity and timely delivery; otherwise, some places may receive it in duplicate and triplicate and some places remain completely starved.

➤ Vulnerability assessment of buildings, structure/infrastructure, lifelines, economy and people should be undertaken:

The occurrence of thunderstorm and or squall is a natural hazard over which man has no control at present. Its prediction with respect to precise time, place or intensity of occurrence is still not feasible. But this natural hazard gets converted into a disaster to society. Enough experience has been gained worldwide and research carried out in India which gives us confidence to minimize the damages human casualties and loss of cattle heads due the onslaught of thunderstorm and or squall.

➤ Protection against Lightning — Lightning Shields

Lightning shields are the most employed structural protection measures for buildings and other structures. The lightning shield consists of installation of a lightning conductor at a suitably high location at the top of the structure. The conductor is grounded using a metal strip of suitable conductance. The grounding of the conductor is also specially designed to ensure rapid dissipation of the electrical charge of lightning strike into the ground.

62. Action Plan for CBRN:

Chemical, Biological, Radiological and Nuclear (CBRN) Threats. 'CBRN' is the abbreviation commonly used to describe the malicious use of Chemical, Biological, Radiological and Nuclear materials or weapons with the intention to cause significant harm or disruption. A CBRN incident differs from a hazardous material incident in both scope and intent.

➤ **Chemical**

The main types of chemical weapons are:

- Nerve agents, which attack the central nervous system. Examples include types of pesticides called organophosphates; sarin; and VX.
- Blister agents, which cause burns and blisters both inside and outside of the body. Examples include the mustard gases.
- Incapacitating agents, which are designed to hurt a large number of people, and make it impossible for them to fight back, but without killing them. Examples include tear gas and pepper spray.

➤ **Biological**

The goal of biological weapons is to get as many people sick with infectious diseases as possible. Types of biological weapons include:

- Bacteria, like the bacteria that cause anthrax and plague
- Viruses, like the ones that cause smallpox, Ebola, and the flu
- Toxins (poisons made by living things), like ricin, botulism toxin, and aflatoxin

➤ **Radiological**

A radiological weapon is any kind of weapon that spreads radiation. For example:

- A dirty bomb (a regular bomb which spreads radioactive material)
- Poisoning food or water supplies with radioactive contamination

➤ **Nuclear**

A nuclear weapon releases a huge amount of energy in a nuclear explosion. Nuclear weapons can kill everyone in a city and make many other people who survive sick with radiation poisoning.

Line of Communication and Responsibility for the State

- For metropolitan areas, the Incident Commander for all nuclear hazards shall be the Commissioner of Police. For other areas it will be the District Magistrate (DM). DEOC / District Magistrate/ Commissioner of Police shall inform the State Emergency Operation Center (SEOC), the Commissioner of Relief (COR) and GSDMA.
- The COR or GSDMA shall convene an immediate meeting of the Crisis Management Group under the Chief Secretary.
- COR shall inform National Emergency Operation Center (NEOC) and if required coordinate with Bhabha Atomic Research Center (BARC) for specialized support.
- The Commissioner of Police in a metropolitan area and the District Magistrate in others shall review the situation and activate coordination, command and control.
- Commissioner of Health (COH) shall place medical and para-medical teams if required at the disposal of the Incident Commander.
- The Fire Brigade as well as personnel/vehicles/equipments from GSDMA's Emergency Response Centers (ERCs) will report to the Incident Commander.
- Commissioner of Relief (COR) shall also coordinate immediate evacuation of
- potentially affected civilians with the CP, Municipal Commissioner and Collector.
- Chemical Biological Nuclear and Radiological team (CBRN) shall be formed and deployed to ground zero by the incident commander.

63. Action Plan for Epidemics:

District crisis group is a multi-sectoral group and comprises of different government departments, the group is headed by District Collector and senior/ junior factory inspector is a member secretary.

Chief district medical officers {CDMO} and Chief District health officers {CDHO} are members of this group. As per the guidance from the Commissionerate of Health, Medical Services and Medical Education, CDMO and CDHO of each district are to prepare a Contingency Plan for Medical Relief in Disaster to meet any adverse event in future limit immediate and delayed consequences of such a Disaster.

Activities to be carried out on strikes of any Disasters in District:

- PHC team will rush to affected village and start curative services as well as preventive and control measure of an outbreak.
- At the site team will carry out house to house surveillance.
- Team will guide and give health education regarding disease, and for prepare dispose of night soil, household garbage etc.
- Along with curative and control Measure team will carry out focal spray of insecticide and disinfectant in affected family and surrounding 50 House.
- Team will carry out super dose chlorination of all pre identified sources of potable water in the affected village also distribute chlorine tablet for domestic use.
- Team will prepare program for regular chlorination through Health worker and Panchayat Machinery.
- Male Health supervisor made responsible for checking the chlorination He is instructed to maintain register of R.C. test and asked to report regular.
- To maintain sanitary condition, Retail shop of food and food preparation, Fruit shop, Ice- cream and Cold drink shop must be check-up.
- Team will take water sample, food sample, blood, urine, stool as per necessity and if possible, carry out laboratory analysis on the spot or will send the sample to Baroda laboratory with special Messenger.
- If it is necessary, team will carry out vaccine immunization.
- with the help of Panchayat machinery Health Worker / supervisor make it possible to dispose, spoil food.
- Medical officers are instructed to take active support of youth forums, Mahila Mandal, Gram Panchayat and other NGO in their jurisdiction.
- Male supervisor made responsible for reporting of all activity carried out to the district health officer.
- If it is necessary other medical team and logistic will deputed from non-affected area.

64. Evacuation plan:

Based on assessment of the severity of the disaster, the State Relief Commissioner shall issue appropriate instructions on actions to be taken including evacuation to the District Collector, who will then supervise evacuation.

The District Collector will give directions to the Liaison Officers, Dy. Collector and all concerned departments for evacuation based on situation. This will be carried out by the Revenue department, Local police & District Panchayat department.

At the village level, members of the VDMCs and DMTs or village level will coordinate the evacuation procedures to the pre-designated relief centers, taking special care of the vulnerable groups of women, children, old people etc.

➤ Types of evacuation:

To plan, all evacuations may be one of two generic types:

- (a) Immediate evacuation, which allows little or no warning and limited preparation time as in the case of earthquakes and air accident.
- (b) Pre-warned evacuation resulting from an event that provides adequate warning and does not unduly limit preparation time as in the case of flood and cyclones.

Evacuation Team Members are mainly responsible for evacuating and carry out search and rescue operation during the time of emergency. The members of this team are mainly young men and women of the village, ex-service men, swimmers, etc. Rescue kits necessary to carry out the activities of this team would be ideally made locally with indigenous materials available. These members are trained with the help of Civil Defense, Police, Fire services etc.

- In cases where the approach road is clear, people will be evacuated by local tractor/trolley, ST bus & other big vehicles. The people trapped in areas surrounded by water will be rescued by the Mamlatdar, local police & local swimmers through boats.
- RTO Office will be directed to arrange and supply vehicle for evacuation & rescue operation.
- Make transport arrangement for mobilization of all emergency response teams.
- Ensure that the arrangement for basic amenities (shown below) at evacuation/relief centres are made by the respective departments:
 - o Drinking water, o Food, o Sanitation and hygiene, o Lighting, o Health Care
- Ensure that law and order is maintained at evacuation centres and in the affected areas as well.
- Maintain the records of area-wise population, shelter centres in your area for effective emergency evacuation.

All evacuations will be ordered only by the Collector/Mamlatdar or by the SP or Fire Brigade, after consultation with the District Collector. SP should ensure appropriate security and maintenance of law and order during evacuation process and render all possible assistance to the Village level Task Force members. All voluntary evacuations should be immediately reported to the Collector.

All Primary Schools and Higher Secondary Schools and Community Centers will be utilized for Evacuation. Collector-Rajkot had ordered DEO/DPEO to hand over schools to Taluka authority for shelter as and when Evacuation took place.

65. Media Management Plan:

Media can play a crucial role during response time. Media management will ensure precise communication of the impact of disaster and relief measures being taken and generate goodwill among community and other stakeholders.

Timely mass media communication about impending disasters can lead to appropriate individual and community action, which is the key to implementing effective prevention strategies including evacuation and survival of people. Such communications can educate, warn, inform, and empower people to take practical steps to protect themselves from natural hazards.

Rajkot Collectorate office has established an effective system of collaborating with the media during emergencies. Both print and electronic media are regularly briefed at predetermined time intervals about the events as they occur and the prevailing situation on ground. A similar set up is also active in the Taluka Control room (i.e. Mamlatdar office).

Dy. Director, Information will establish media management / information cell for public information, guidance and rumor control and will assure the following activities...

➤ For Preparedness:

- Broadcast programs to raise people's awareness of disaster prevention measures
- Develop news sources in emergency
- Place broadcast equipment, microphone, tape/CD, transmitter, antennae in safety.

➤ For Mitigation:

- Develop networks with DEOC/TEOC, NGOs, local government offices & stakeholders.

➤ For Response:

- Broadcast pre-prepared announcements
- Broadcast emergency public meetings
- Broadcast emergency evacuation announcements
- All announcements broadcast in a reassuring and calm manner
- Dispel myths and rumours and provide timely and accurate updates
- Broadcast updates on damage situation
- Produce programs in which victims can express themselves
- Establish contact with the meteorological office and broadcast weather information

DEOC must be ensured that the interaction with media is a two-way process through which not only the DEOC provides the information / updates to the media but the media too, through their own sources / resources draws the attention of the DEOC officials to the need and requirement of the affected people.

66. Relief and Rehabilitation Norms (Standards):

REVISED LIST OF ITEMS AND NORMS OF ASSISTANCE FROM STATE DISASTER RESPONSE FUNDS (SDRF) AND NATIONAL DISASTER RESPONSE FUND (NDRF)

(Period 2015-20, MHA Letter No. 32-7/2014-NDM-I Dated 8th April 2015)

Sl. No.	Items	NORMS OF ASSISTANCE
1	2	3
1.	Gratuitous Relief	
	a) Ex-Gratia payment to families of deceased persons.	Rs.4.00 lakh per deceased person including those involved in relief operations or associated in preparedness activities, subject to certification regarding cause of death from appropriate authority.
	b) Ex-Gratia payment for loss of a limb or eye(s).	Rs. 59100/- per person, when the disability is between 40% and 60%. Rs. 2.00 lakh per person, when the disability is more than 60%. Subject to certification by a doctor from a hospital or dispensary of Government, regarding extent and cause of disability.
	c) Grievous injury requiring hospitalization	Rs. 12,700/- per person requiring hospitalization for more than a week. Rs. 4,300/- per person requiring hospitalization for less than a week.
	d) Clothing and utensils/ house-hold goods for families whose houses have been washed away/ fully damaged/severely inundated for more than two days due to a natural calamity.	Rs.1,800/- per family, for loss of clothing. Rs.2,000/- per family, for loss of utensils/ household goods.
	e) Gratuitous relief for families whose livelihood is seriously affected.	Rs. 60/- per adult and Rs. 45/- per child, not housed in relief camps. State Govt. will certify that identified beneficiaries are not housed in relief camps. Further State Government will provide the basis and process for arriving at such beneficiaries district-wise. Period for providing gratuitous relief will be as per assessment of the State Executive Committee (SEC) and the Central Team (in case of NDRF). The default period of assistance will upto to 30 days, which may be extended upto 60 days in the first instance, if required, and subsequently upto 90 days in case of drought/ pest attack. Depending on the ground situation, the State Executive Committee can extend the time period beyond the prescribed limit subject to that expenditure on this account should not exceed 25% of SDRF allocation for the year.
2.	SEARCH & RESCUE OPERATIONS	
	(a) Cost of search and rescue measures/ evacuation of people affected/ likely to be affected	As per actual cost incurred, assessed by SEC and recommended by the Central Team (in case of NDRF).

		- By the time the Central Team visits the affected area, these activities are already over. Therefore, the State Level Committee and the Central Team can recommend actual/ near-actual costs.
	(b) Hiring of boats for carrying immediate relief and saving lives.	As per actual cost incurred, assessed by SEC and recommended by the Central Team (in case of NDRF). The quantum of assistance will be limited to the actual expenditure incurred on hiring boats and essential equipment required for rescuing stranded people and thereby saving human lives during a notified natural calamity.
3	RELIEF MEASURES	
	a) Provision for temporary accommodation, food, clothing, medical care, etc. for people affected/ evacuated and sheltered in relief camps.	As per assessment of need by SEC and recommendation of the Central Team (in case of NDRF), for a period up to 30 days. The SEC would need to specify the number of camps, their duration and the number of persons in camps. In case of continuation of a calamity like drought, or widespread devastation caused by earthquake or flood etc., this period may be extended to 60 days, and upto 90 days in cases of severe drought. Depending on the ground situation, the State Executive Committee can extend the time period beyond the prescribed limit subject to that expenditure on this account should not exceed 25% of SDRF allocation for the year. Medical care may be provided from National Rural Health Mission (NRHM).
	b) Air dropping of essential supplies	As per actual, based on assessment of need by SEC and recommendation of the Central Team (in case of NDRF). - The quantum of assistance will be limited to actual amount raised in the bills by the Ministry of Defence for airdropping of essential supplies and rescue operations only.
	c) Provision of emergency supply of drinking water in rural areas and urban areas	As per actual cost, based on assessment of need by SEC and recommended by the Central Team (in case of NDRF), up to 30 days and may be extended upto 90 days in case of drought. Depending on the ground situation, the State Executive Committee can extend the time period beyond the prescribed limit subject to that expenditure on this account should not exceed 25% of SDRF allocation for the year.
4.	CLEARANCE OF AFFECTED AREAS	
	a) Clearance of debris in public areas.	As per actual cost within 30 days from the date of start of the work based on assessment of need by SEC for the assistance to be provided under SDRF and as per assessment of the Central team for assistance to be provided under NDRF.
	b) Draining off flood water in affected areas	As per actual cost within 30 days from the date of start of the work based on assessment of need by SEC for the assistance to be provided under SDRF and as per assessment of the Central team (in case of NDRF).
	c) Disposal of dead bodies/ Carcases	As per actuals, based on assessment of need by SEC and

		recommendation of the Central Team (in case of NDRF).
	AGRICULTURE	
(i)	<i>Assistance farmers having landholding upto 2 ha</i>	
A.	Assistance for land and other loss	
	a). De-silting of agricultural land (where thickness of sand/ silt deposit is more than 3", to be certified by the competent authority of the State Government.)	Rs. 12,200/- per hectare for each item. (Subject to the condition that no other assistance/ subsidy has been availed of by/ is eligible to the beneficiary under any other Government Scheme)
	b) Removal of debris on agricultural land in hilly areas	
	c) De-silting/ Restoration/ Repair of fish farms	
	d) Loss of substantial portion of land caused by landslide, avalanche, change of course of rivers.	Rs. 37,500/- per hectare to only those small and marginal farmers whose ownership of the land is legitimate as per the revenue records.
B.	Input subsidy (where crop loss is 33% and above)	
	a) For agriculture crops, horticulture crops and annual plantation crops	Rs. 6,800/- per ha. in rainfed areas and restricted to sown areas. Rs. 13,500/- per ha. in assured irrigated areas, subject to minimum assistance not less than Rs.1000 and restricted to sown areas.
	b) Perennial crops	Rs. 18,000/- ha. for all types of perennial crops subject to minimum assistance not less than Rs. 2000/- and restricted to sown areas.
	c) Sericulture	Rs. 4,800/- per ha. for Eri, Mulberry, Tussar Rs. 6,000/- per ha. for Muga.
(ii)	<i>Input subsidy to farmers having more than 2 Ha of landholding</i>	Rs. 6,800/- per hectare in rainfed areas and restricted to sown areas. Rs.13,500/- per hectare for areas under assured irrigation and restricted to sown areas. Rs. 18,000/- per hectare for all types of perennial crops and restricted to sown areas. Assistance may be provided where crop loss is 33% and above, subject to a ceiling of 2 ha. per farmer.
6	ANIMAL HUSBANDRY ASSISTANCE TO SMALL AND MARGINAL FARMERS	
	i) Replacement of milch animals, draught animals or animals used for haulage.	<i>Milch animals -</i> Rs. 30,000/- Buffalo/ cow/ camel/ yak/ Mithun etc. Rs. 3,000/- Sheep/ Goat/ Pig <i>Draught animals -</i> Rs. 25000/- Camel/ horse/ bullock, etc. Rs. 16,000/- Calf/ Donkey/ Pony/ Mule - The assistance may be restricted for the actual loss of economically productive animals and will be subject to a

		ceiling of 3 large milch animals or 30 small milch animals or 3 large draught animals or 6 small draught animals per household irrespective of whether a household has lost a larger number of animals. (The loss is to be certified by the Competent Authority designated by the State Government). Poultry:- Poultry @ 50/- per bird subject to a ceiling of assistance of Rs 5000/- per beneficiary household. The death of the poultry birds should be on account of a natural calamity. Note:- Relief under these norms is not eligible if the assistance is available from any other Government Scheme, e.g. loss of birds due to Avian Influenza or any other diseases for which the Department of Animal Husbandry has a separate scheme for compensating the poultry owners.
	ii) Provision of fodder / feed concentrate including water supply and medicines in cattle camps.	Large animals- Rs. 70/- per day. Small animals- Rs. 35/- per day. Period for providing relief will be as per assessment of the State Executive Committee (SEC) and the Central Team (in case of NDRF). The default period for assistance will be upto 30 days, which may be extended upto 60 days in the first instance and in case of severe drought up to 90 days. Depending on the ground situation, the State Executive Committee can extend the time period beyond the prescribed limit, subject to the stipulation that expenditure on this account should not exceed 25% of SDRF allocation for the year. Based on assessment of need by SEC and recommendation of the Central Team, (in case of NDRF) consistent with estimates of cattle as per Livestock Census and subject to the certificate by the competent authority about the requirement of medicine and vaccine being calamity related.
	iii) Transport of fodder to cattle outside cattle camps	As per actual cost of transport, based on assessment of need by SEC and recommendation of the Central Team (in case of NDRF) consistent with estimates of cattle as per Livestock Census.
7	FISHERY	
	i) Assistance to Fisherman for repair / replacement of boats, nets – damaged or lost -- Boat -- Dugout-Canoe -- Catamaran -- net (This assistance will not be provided if the beneficiary is eligible or has availed of any subsidy/ assistance, for the instant calamity, under any other Government Scheme.)	Rs. 4,100/- for repair of partially damaged boats only Rs. 2,100/- for repair of partially damaged net Rs. 9,600/- for replacement of fully damaged boats Rs. 2,600/- for replacement of fully damaged net
	ii) Input subsidy for fish seed farm	Rs. 8,200 per hectare.

		(This assistance will not be provided if the beneficiary is eligible or has availed of any subsidy/ assistance, for the instant calamity, under any other Government Scheme, except the one time subsidy provided under the Scheme of Department of Animal; Husbandry, Dairying and Fisheries, Ministry of Agriculture.)
8	HANDICRAFTS/HANDLOOM ASSISTANCE TO ARTISANS	
	i) For replacement of damaged tools/ equipment	Rs. 4,100 per artisan for equipments. - Subject to certification by the competent authority designated by the Government about damage and its replacement.
	ii) For loss of raw material/ goods in process/ finished goods	Rs. 4,100 per artisan for raw material. - Subject to certification by Competent Authority designated by the State Government about loss and its replacement.
9	HOUSING	
	a) Fully damaged/ destroyed houses	
	i) Pucca house	
	ii) Kutcha House	Rs. 95,100/- per house, in plain areas.
	b) Severely damaged houses	
	i) Pucca House	Rs. 1,01,900/- per house, in hilly areas including Integrated Action Plan (IAP) districts.
	ii) Kutcha House	
	(c) Partially Damaged Houses -	
	(i) Pucca (other than huts) where the damage is at least 15 %	Rs. 5,200/- per house
	(ii) Kutcha (other than huts) where the damage is at least 15 %	Rs. 3,200/- per house
	d) Damaged / destroyed huts:	Rs. 4,100/- per hut, (Hut means temporary, make shift unit, inferior to Kutcha house, made of thatch, mud, plastic sheets etc. traditionally recognized as hut by the State/ District authorities.) Note: -The damaged house should be an authorized construction duly certified by the Competent Authority of the State Government.
	e) Cattle shed attached with house	Rs. 2,100/- per shed.

67. Formats (Reports, Damage and Loss Assessment):

❖ Format of Primary Situation Report:

Emergency Operation Center – City/ Taluka / District..... Address..... Phone No..... Fax No.
--

No. Disa/...../Pri. Rep./2022

Date: - / /

Primary Situation Report of Calamity / Accident

1	Type of Calamity	
2	Name, Address details of a person/s injured/ death in Calamity/ Disaster (If Available)	
3	Place of Calamity (Place/Village/Taluka/District)	
4	Date / Time	
5	Reason of Accident / Calamity	
6	Description of Accident, Calamity, Disaster	
7	Activity / Process done at Village / Taluka / City / District Place	

This is the Primary Situation Report sent to you. Detail Report will be sent to your office later on.

Designation,
Office of the..... ,
(District / Taluka / City)

To,
Hon. Collector sir,
DEOC, Collector office, Rajkot,
Ph. - 0285-2633446, Fax. - 0285-2633449

Copy to...
Director of
Relief,
New Sachivalay, Gandhinagar.

68. SOPs (Standard Operating Procedures):

The SOPs are intended to be used by people who are unfamiliar with disaster management topics but are intended to be task specific and not as replacements for full plans. Through Standard Operating Procedures (SOPs) of Line Departments detailing how specific disaster response actions will be accomplished.

➤ Each Department and Govt. agency involved in Disaster Mgmt. and Mitigation will:

- Designate a Nodal officer for emergency response and will act as the contact person for that department/agency.
- Ensure establishment of fail-safe two-way communication with the state, district and other emergency control rooms and within the organisation.
- Emphasis on communication systems used regularly during L-0 with more focus on the use of VHF's with automatic repeaters, mobile phones with publicised numbers, HF radio sets etc. It should be remembered that SAT phones fail during prolonged emergencies and electric failure if the phones cannot be re-charged.
- Work under the overall supervision of the IC / the District Collectors during emergencies.

➤ SOPs (Standard Operating Procedures) of Line Departments:

1. Agriculture

⊙ Prevention Activities:

- Awareness generation regarding various plant diseases, alternate cropping practices in disaster-prone areas, Crop Insurance, provision of credit facilities, proper storage of seeds, etc.
- Hazard area mapping (identification of areas pandemic to pest, drought, flood & hazards).
- Develop database village-wise, crop-wise, irrigation source wise, insurance details, credit etc.
- Regular monitoring at taluka level; the distribution and variation in rainfall. Prepare the farmers and department officers to adopt contingency measures and take up appropriate course of action corresponding to the different emerging conditions.
- Detail response manuals to be drawn up for advising the farmers for different types of disasters, e.g., rain failure in July or September & development of a dynamic response plan considering weekly rainfall patterns.
- Develop IEC materials to advise the farming communities on cropping practices and precautionary measures to be undertaken during various disasters.
- Improving irrigation facilities, watershed management, soil conservation and other soil, water and fertility management
- Measures keeping in mind the local agro climatic conditions and the proneness of the area to specific hazards.
- Promotion of alternative crop species and cropping patterns keeping in mind the vulnerability of areas to specific hazards.
- Surveillance for pests and crop diseases and encourage early reporting.
- Encourage promotion of agro service outlets/enterprise for common facilities, seed and agro input store and crop insurance.

- Preparedness Activities before disaster seasons
- Review and update precautionary measures and procedures, especially ascertain that adequate stock of seeds and other agro inputs are available in areas prone to natural calamities.
- Review the proper functioning of rain gauge stations, have stock for immediate replacement of broken / non-functioning gadgets/equipment, record on a daily basis rainfall data, evaluate the variation from the average rainfall and match it with the rainfall needs of existing crops to ensure early prediction of droughts.
- Response Activities:
- Management of control activities following crop damage, pest infestation and crop disease to minimise losses.
- Collection, laboratory testing and analysis of viruses to ensure their control and eradication.
- Pre-positioning of seeds and other agro inputs in strategic points so that stocks are readily available to replace damage caused by natural calamities.
- Rapid assessment of damage to soil, crop, plantation, irrigation systems, drainage, embankment, other water bodies and storage facilities and the requirements to salvage, re- plant, or to compensate and report the same for ensuring early supply of seeds and other agro inputs necessary for re-initiating agricultural activities where crops have been damaged.
- Establishment of public information centres with appropriate and modern means of communication, to assist farmers in providing information regarding insurance, compensation, repair of agro equipment and restarting of agricultural activities at the earliest.

© **Recovery Activities**

- Arrange for early payment of compensation and crop insurance dues.
- Facilitate provision of seeds and other agro inputs.
- Promotion of drought and flood tolerant seed varieties.
- Review with the community, the identified vulnerabilities and risks for crops, specific species, areas, which are vulnerable to repetitive floods, droughts, other natural hazards, water logging, increase in salinity, pest attacks etc. and draw up alternative cropping plans to minimise impacts to various risks.
- Facilitate sanctioning of soft loans for farm implements.
- Establishment of a larger network of soil and water testing laboratories.
- Establishment of pests and disease monitoring system.
- Training in alternative cropping techniques, mixed cropping and other agricultural practices which will minimise crop losses during future disasters.

2. Health Department

⊙ Prevention Activities:

- Assess preparedness levels at State, District and Taluka levels.
- Identification of areas endemic to epidemics and natural disasters.
- Identification of appropriate locations for testing laboratories.
- Listing and networking with private health facilities.
- Developing a network of volunteers for blood donation with blood grouping data.
- Strengthening of disease surveillance, ensuring regular reporting from the field level workers (ANMs/LHV etc) and its compilation and analysis at the PHC and District levels, on a weekly basis (daily basis in case of an epidemic or during natural disasters), forwarding the same to the State Disease Surveillance Cell and monthly feedback from the State to the district and from the District to the PHC.
- Formation of adequate number of mobile units with trained personnel, testing facilities, communication systems and emergency treatment facilities.
- Identification of locations in probable disaster sites for emergency operation camps.
- Awareness generation about various infectious diseases and their prevention.
- Training and IEC activities
- Training of field personnel, Traditional Birth Attendants, community leaders, volunteers, NGOs and CBOs in first aid, measures to be taken to control outbreak of epidemics during and after a disaster, etc.
- Arrangement of standby generators for every hospital.
- Listing of vehicles, repair of departmental vehicles that will be requisitioned during emergencies for transport of injured.
- Preparedness Activities before Disaster Seasons

⊙ For heat wave:

- Preparation and distribution of IEC materials, distribution of ORS and other life-saving drugs, training of field personnel on measures to be taken for management of patients suspected to be suffering from heatstroke.
- For flood and cyclone: Assessment and stock piling of essential medicines, anti- snake venom, halogen tablets, bleaching powders. ORS tablets, Pre-positioning of mobile units at vulnerable and strategic points.

⊙ Response activities:

- Stock piling of life-saving drugs, detoxicants, anaesthesia, Halogen tablets in vulnerable areas.
- Strengthening of drug supply system with powers for local purchase during Level 0.
- Situational assessment and reviewing the response mechanisms in known vulnerable pockets.
- Ensure adequate availability of personnel in disaster sites.
- Review and update precautionary measures and procedures.

⊙ Sanitation

- Dispensing with post-mortem activities during L1, L2 and L3 when the relatives and/or the competent authority are satisfied about cause of death.
- Disinfections of water bodies and drinking water sources.
- Immunization against infectious diseases.

- Ensure continuous flow of information.

☉ **Recovery Activities**

- Continuation of disease surveillance and monitoring.
- Continuation of treatment, monitoring and other epidemic control activities till the situation is brought under control and the epidemic eradicated.
- Trauma counselling.
- Treatment and socio-medical rehabilitation of injured or disabled persons.
- Immunisation and nutritional surveillance.
- Long term plans to progressively reduce various factors that contribute to high level of vulnerability to diseases of population affected by disasters.

3. Epidemics

☉ **Preventive Activities:**

- Supply of safe drinking water, water quality monitoring and improved sanitation.
- Vector Control programme as a part of overall community sanitation activities.
- Promotion of personal and community latrines.
- Sanitation of sewage and drainage systems.
- Development of proper solid waste management systems.
- Surveillance and spraying of water bodies for control of malaria.
- Promoting and strengthening Primary Health Centres with network of paraprofessionals to improve the capacity of surveillance and control of epidemics.
- Establishing testing laboratories at appropriate locations to reduce the time taken for early diagnosis and subsequent warning.
- Establishing procedures and methods of coordination with the Health Department, other local authorities/departments and NGOs to ensure that adequate prevention and preparedness measures have been taken to prevent and / or minimise the probable outbreak of epidemics.
- Identification of areas prone to certain epidemics and assessment of requirements to control and ultimately eradicate the epidemic.
- Identification of appropriate locations and setting up of site operation camps for combating epidemics.
- Listing and identification of vehicles to be requisitioned for transport of injured animals.
- Vaccination of the animals and identification of campsites in the probable areas.
- Promotion of animal insurance.
- Tagging of animals
- Arrangement of standby generators for veterinary hospitals.
- Provision in each hospital for receiving large number of livestock at a time.
- Training of community members in carcasses disposal.
- Preparedness activities before disaster seasons
- Stock piling of water, fodder and animal feed.

- Pre-arrangements for tie-up with fodder supply units.
- Stock-piling of surgical packets.
- Construction of mounds for safe shelter of animals.
- Identification of various water sources to be used by animals in case of prolonged hot and dry spells.
- Training of volunteers & creation of local units for carcass disposal.
- Municipalities / Gram Panchayats to be given responsibility for removing animals likely to become health hazards.
- Response Activities:
 - Control of animal diseases, treatment of injured animals, Protection of lost cattle.
 - Supply of medicines and fodder to affected areas.
 - Ensure adequate availability of personnel and mobile team.
 - Disposal of carcasses ensuring proper sanitation to avoid outbreak of epidemics.
 - Establishment of public information centre with a means of communication, to assist in providing an organised source of information.
 - Mobilising community participation for carcass disposal.
- Recovery Activities:
 - Assess losses of animal's assets and needs of persons and communities.
 - Play a facilitating role for early approval of soft loans for buying animals and ensuring insurance coverage and disaster proof housing or alternative shelters/ mounds for animals for future emergencies.
- Establishment of animal disease surveillance system.

4. Water Supplies and Sanitation (GWSSB)

⊙ Prevention Activities:

- Provision of safe water to all habitats.
- Clearance of drains and sewerage systems, particularly in the urban areas.
- Preparedness Activities for disaster seasons
- Prior arrangement of water tankers and other means of distribution and storage of water.
- Prior arrangement of stand-by generators.
- Adequate prior arrangements to provide water and halogen tablets at identified sites to use as relief camps or in areas with high probability to be affected by natural calamities.
- Raising of tube-well platforms, improvement in sanitation structures and other infrastructural measures to ensure least damages during future disasters.
- Riser pipes to be given to villagers.

⊙ Response Activities:

- Disinfections and continuous monitoring of water bodies.
- Ensuring provision of water to hospitals and other vital installations.
- Provision to acquire tankers & other temporary means of distribute water on emergency base.

- Arrangement and distribution of emergency tool kits for equipment required for dismantling and assembling tube wells, etc.
- Carrying out emergency repairs of damaged water supply systems.
- Disinfection of hand pumps to be done by the communities through prior awareness activities & supply of inputs.

⊙ **Recovery Activities:**

- Strengthening of infrastructure.
- Sharing of experiences and lessons learnt.
- Training to staff, Review and documentation.
- Development of checklists and contingency plans.

5. Police:

⊙ **Prevention Activities:**

- Keep the force in general and the RAF in particular fighting fit for search, rescue, evacuation and other emergency operations always through regular drills.
- Procurement and deployment of modern emergency equipment while modernising existing infrastructure and equipment for disaster response along with regular training and drills for effective handling of these equipment.
- Focus on better training and equipments for RAF for all types of disasters.
- Rotation of members of GSDRAF so that the force remains fighting fit.
- Ensure that all communication equipments including wireless are regularly functioning and deployment of extra wireless units in vulnerable pockets.
- Ensure interchangeability of VHF communication sets of police and GSDMA supplied units.
- Keeping close contact with the District Administration & Emergency Officer.
- Superintendent of Police be made Vice Chairperson of District Natural Calamity Committee.
- Involvement of the local army units in response planning activities and during the preparation of the contingency plans, ensure logistics & other support to armed forces during emergencies.

⊙ **Response Plan:**

- Security arrangements for relief materials in transit and in camps etc.
- Senior police officers to be deployed in control rooms at State & district levels.
- Deploy personnel to guard vulnerable embankments and at other risk points.
- Arrangement for the safety.
- Coordinate search, rescue and evacuation operations in coordination with the administration
- Emergency traffic management.
- Maintenance of law and order in the affected areas.
- Assist administration in taking necessary action against hoarders, black marketers etc.

6. Civil Defence

⊙ Prevention Activities

- Organise training programmes on first-aid, search, rescue and evacuation.
- Preparation & implementation first aid, search and rescue service plans for major public events.
- Remain fit and always prepared through regular drills and exercises.

⊙ Response Activities

- Act as Support agency for provision of first aid, search and rescue services to other emergency service agencies and the public.
- Act as support agency for movement of relief.
- Triage of casualties and provision of first aid and treatment.
- Work in co-ordination with medical assistance team.
- Help the Police for traffic management and law and order.

7. Fire Services:

⊙ Prevention Activities:

- Develop relevant legislations and regulations to enhance adoption of fire safety measures.
- Modernisation of firefighting equipment and strengthening infrastructure.
- Identify pockets, industry, etc. which highly susceptible to fire accidents or areas, events which might lead to fires, building collapse, etc. educate people to adopt safety measures.
- Building awareness in use of various fire protection and preventive systems.
- Conduct training and drills to ensure higher level of prevention and preparedness.
- VHF network for fire services linked with revenue & police networks.
- Training of masons & engineers in fireproof techniques.
- Making clearance of building plans by fire services mandatory.
- Response Activities:
- Rescue of persons trapped in burning, collapsed or damaged buildings, damaged vehicles, including motor vehicles, trains and aircrafts, industries, boilers, trenches & tunnels.
- Control of fires and minimising damages due to explosions.
- Control of dangerous or hazardous situations such as oil, gas and hazardous materials spill.
- Protection of property and the environment from fire damage.
- Support to other agencies in the response to emergencies.
- Investigation into the causes of fire and assist in damage assessment

8. Civil Supplies:

⊙ Preventive Activities

- Construction and maintenance of storage godowns at strategic locations.
- Stock piling of food and essential commodities in anticipation of disaster.
- Take appropriate preservative methods to ensure that food and other relief stock are not damaged

during storage, especially precautions against moisture, rodents and fungus infestation.

☉ **Response Activities**

- Management of procurement
- Management of material movement
- Inventory management

☉ **Recovery Activities**

- Conversion of stored, unutilised relief stocks automatically into other schemes like Food for Work. Wherever, it is not done leading to damage of stock, it should be viewed seriously.

9. Public Works/ Rural Development Departments

☉ **Prevention Activities :**

- Keep a list of earth moving and clearing vehicles / equipments (available with Govt. Departments, PSUs, and private contractors, etc.) and formulate a plan to mobilise those at the earliest.
- Inspection and emergency repair of roads/ bridges, public utilities and buildings.

☉ **Response Activities**

- Clearing of roads and establish connectivity. Restore roads, bridges and where necessary make alternate arrangements to open the roads to traffic at the earliest.
- Mobilisation of community assistance for clearing blocked roads.
- Facilitate movement of heavy vehicles carrying equipment and materials.
- Identification and notification of alternative routes to strategic locations.
- Filling of ditches, disposal of debris, and cutting of uprooted trees along the road.
- Arrangement of emergency tool kit for every section at the divisional levels for activities like clearance (power saws), debris clearance (fork lifter) and other tools for repair and maintenance of all disaster response equipment.

☉ **Recovery Activities:**

- Strengthening and restoration of infrastructure with an objective to eliminate the factor(s) which caused the damage.
- Sharing of experiences and lessons learnt.
- Training to staff, Review and documentation.
- Development of checklists and contingency plans.

10. Energy:

☉ **Prevention Activities:**

- Identification of materials/tool kits required for emergency response.
- Ensure and educate the minimum safety standards to be adopted for electrical installation and equipment and organise training of electricians accordingly.
- Develop and administer regulations to ensure safety of electrical accessories and electrical installations.
- Train and have a contingency plan to ensure early electricity supply to essential services during

emergencies and restoration of electric supply at an early date.

- Develop and administer code of practice for power line clearance to avoid electrocution due to broken / fallen wires.
- Strengthen high-tension cable towers to withstand high wind speed, flooding and earthquake, modernise electric installation, strengthen electric distribution system to ensure minimum damages during natural calamities.
- Conduct public/industry awareness campaigns to prevent electric accidents during normal times and during and after a natural disaster.

⊙ **Response Activities:**

- Disconnect electricity after receipt of warning.
- Attend sites of electrical accidents and assist in undertaking damage assessment.
- Stand-by arrangements to ensure temporary electricity supply.
- Prior planning & necessary arrangements for tapping private power plants during emergencies to ensure uninterrupted power supply to vital emergency response agencies.
- Inspection and repair of high-tension lines /substations/transformers/poles etc.
- Ensure the public and other agencies are safeguarded from any hazards, which may have occurred because of damage to electricity distribution systems.
- Restore electricity to the affected area as quickly as possible.
- Replace / restore of damaged poles/ salvaging of conductors and insulators.

11. GWSSB -Water Supply Department:

⊙ **Prevention Activities:**

- Assess preparedness level.
- Annual assessment of danger levels & wide publicity of those levels.
- Identify flood prone rivers and areas and activate flood monitoring mechanisms.
- Provide water level gauge at critical points along the rivers, dams and tanks.
- Identify and maintain of materials/tool kits required for emergency response.
- Stock-pile of sandbags and other necessary items for breach closure at the Panchayat level.

⊙ **Response Activities:**

- Monitoring flood situation.
- Dissemination of flood warning.
- Ensure accurate dissemination of warning messages to GPs & Taluka with details of flow.
- Monitoring and protection of irrigation infrastructures.
- Inspection of bunds of dams, irrigation channels, bridges, culverts, control gates and overflow channels.
- Inspection and repair of pumps, generator, motor equipments, station buildings.
- Community mobilisation in breach closure

⊙ **Recovery Activities:**

- Strengthening of infrastructure and human resources.

- Review and documentation.
- Sharing of experiences and lessons learnt.
- Training of staff.
- Development of checklists and contingency plans.

12. Fisheries Department

⊙ Prevention Activities

- Registration of boats and fishermen.
- Building community awareness on weather phenomena and warning system especially on Do's and Don'ts on receipt of weather-related warnings.
- Assist in providing lifesaving items like life jackets, hand radios, etc.
- Certifying the usability of all boats and notifying their carrying capacities.
- Capacity building of traditional fishermen and improvisation of traditional boats which can be used during emergencies.
- Train up young fishermen in search & rescue operation and hire their services during emergency.

⊙ Response Activities

- Ensure warning dissemination to fishing communities living in vulnerable pockets.
- Responsible for mobilising boats during emergencies and for payment of wages to boatmen hired during emergencies.
- Support in mobilisation and additional deployment of boats during emergencies.
- Assess the losses of fisheries and aquaculture assets and the needs of persons and communities affected by emergency.

⊙ Recovery Activities

- Provide compensations and advice to affected individuals, community.

13. Forest Department

⊙ Prevention activities

- Promotion of shelter belt plantation.
- Publishing for public knowledge details of forest cover, use of land under the forest department, the rate of depletion and its causes.
- Keep saws (both power and manual) in working conditions.
- Provision of seedling to the community and encouraging plantation activities, promoting nurseries for providing seedlings in case of destruction of trees during natural disasters.

14. Transport Department:

⊙ **Prevention Activities**

- Listing of vehicles which can be used for emergency operation.
- Safety accreditation, enforcement and compliance.
- Ensuring vehicles follow accepted safety standards.
- Build awareness on road safety and traffic rules through awareness campaign, use of different IEC strategies and training to school children.
- Ensure proper enforcement of safety regulations Response Activities.
- Requisition vehicles, trucks, and other means of transport to help in the emergency operations.
- Participate in post impact assessment of emergency situation.
- Support in search, rescue and first aid.
- Cooperate and appropriation of relief materials.

⊙ **Recovery Activities**

- Provision of personal support services e.g. Counselling.
- Repair/restoration of infrastructure e.g. roads, bridges, public amenities.
- Supporting the GPs in development of storage and in playing a key role and in the coordination of management and distribution of relief and rehabilitation materials.
- The G.P. members to be trained to act as an effective interface between the community, NGOs, and other developmental organisations.
- Provide training so that the elected representatives can act as effective supportive agencies for reconstruction and recovery activities.

15. Panchayati Raj Department:

⊙ **Preventive Activities**

- Develop prevention/mitigation strategies for risk reduction at community level.
- Training of elected representatives on various aspects of disaster management.
- Public awareness on various aspects of disaster management.
- Organise mock drills.
- Promote and support community-based disaster management plans.
- Support strengthening response mechanisms at the G.P. level (e.g., better communication, local storage, search & rescue equipment, etc.).
- Clean drainage channels, trimming of branches before cyclone season.
- Ensure alternative routes/means of communication for movement of relief materials and personnel to marooned areas or areas likely to be marooned.
- Assist all the government departments to plan and prioritise prevention and preparedness activities while ensuring active community participation.

⊙ **Response Activities**

- Train up the G.P. Members and Support for timely and appropriate delivery of warning to the community.

- Clearance of blocked drains and roads, including tree removal in the villages.
- Construct alternative temporary roads to restore communication to the villages.
- PRIs to be a part of the damage survey and relief distribution teams to ensure popular participation.
- Operationalise emergency relief centres and emergency shelter.
- Sanitation, drinking water and medical aid arrangements.
- IEC activities for greater awareness regarding the role of trees and forests for protection during emergencies and also to minimise environmental impact which results owing to deforestation like climate change, soil erosion, etc.
- Increasing involvement of the community, NGOs and CBOs in plantation, protection and other forest protection, rejuvenation and restoration activities.
- Plan for reducing the incidence and minimise the impact of forest fire.

⊙ **Response Activities:**

- Assist in road clearance.
- Provision of tree cutting equipment.
- Units for tree cutting and disposal to be put under the control of GSDMA, SRC, Collector during L1.
- Provision of building materials such as bamboos etc for construction of shelters.

⊙ **Recovery Activities:**

- Take up plantation to make good the damage caused to tree cover.

16. Information & Public Relations Department

⊙ **Prevention Activities**

- Creation of public awareness regarding various types of disasters through media campaigns.
- Dissemination of information to public and others concerned regarding do's and don'ts of various disasters.
- Regular liaising with the media.

⊙ **Response Activities**

- Setting up of a control room to provide authentic information to public regarding impending emergencies.
- Daily press briefings at fixed times at district level to provide official version.
- Media report & feedback to field officials daily from L1 onwards.
- Keep the public informed about the latest emergency (area affected, lives lost, etc).
- Keep the public informed about various post-disaster assistances and recovery programmes.

17. Revenue Department

- Co-ordination with Govt. of Gujarat Secretariat and Officers of Govt. of India
- Overall control & supervision

- Damage assessment, finalisation of reports and declaration of L1/L2 disasters
- Mobilisation of finance

18.Home Department

- Requisition, deployment and providing necessary logistic support to the armed forces.
- Provide maps for air dropping, etc.

19.Gujarat Disaster Rapid Action Force

⊙ Response

- To be trained and equipped as an elite force within the Police Department and have the capacity to immediately respond to any emergency.
- Unit to be equipped with lifesaving, search & rescue equipment, medical supplies, security arrangements, communication facilities and emergency rations and be self-sufficient.
- Trained in latest techniques of search, rescue and communication in collaboration with international agencies.
- Co-opt doctors into the team.

69. Projects for prevention of disasters:

1. DRM (Disaster Risk Management) Programme:

DRM (Disaster Risk Management Program) is one of the major initiatives of Gujarat State Disaster Management Authority to build/strengthen capacity of various stakeholders for an effective response during disasters. The DRM Program is formulated with a goal of sustainable reduction in disaster risk in most hazard prone districts in Gujarat state.

2. NCRMP (National Cyclone Risk Management Program):

Gujarat being prone to cyclones, is the topmost priority of the State Government to reduce the effect of cyclone and minimize the loss to property and lives in the coastal regions of the State through creation of suitable infrastructure. Gujarat has therefore been included in the NCRMP initiated by the National Disaster Management Authority and funded by the World Bank. Two important components, i.e. construction of Multi- Purpose Cyclone Shelters (MPCS) and construction and repair of missing roads will be implemented as part of NCRMP.

3. School Safety Programme:

Gujarat School Safety Initiative (GSSI) is the pilot program designed for promoting a culture of disaster safety in schools and reducing risk through structural and non-structural measures in the schools. GSDMA develops Information, Education and Communication material for the purpose of dissemination of information among school students and teaching. Gujarat State Disaster Management Authority has successfully celebrated Gujarat School Safety Week 2023 in all the Government Primary Schools. As a preparatory activity for School Safety Week 2017, 257 master trainers were trained at state level. 53,206 principals and teachers at all government primary schools were trained for preparation for the School Disaster Management Plan of their respective schools and for conducting mock drills in schools.

4. Special Flood Rescue Training Programme:

GSDMA has tied up with a local agency and initiated a Special Flood Rescue Training Program to train volunteers and other stakeholders in flood rescue. The stakeholders include firemen, fire officers, home guards, police, etc.

5. Masons Training / Certification Programme:

GSDMA is reinitiating Mason Training/Certification Program for masons in Gujarat State so that the quality of construction in rural and semi-urban areas could be improved. In this regard GSDMA has signed a MoU with L&T for masons training program. The course is basically designed to improve and impart training in confined masonry construction including earthquake resistant construction in rural areas. The main construction sector targeted is housing schemes running under state and central government.

6. Aapda Mitra:

As part of capacity building measures, GSDMA is now initiating a project - 'Aapda Mitra' on training of community volunteers in conducting basic search & rescue operations and to assist the district administration for effective disaster response. For successful implementation of this program, it is planned that 300 Aapda Mitra would be trained from District and Taluka. The full residential training would be conducted at the 11 designated training centers of SDRF/SRPF. The duration of the training will be 2 weeks. At the end of the training, they would be certified as 'Aapda Mitra' by GSDMA and provided with an identity card for the same. The 'Aapda Mitra' shall remain present for assistance during any emergency.
