Road connectivity System Map based on Google Map over ADI Division

Ahmedabad Division has developed a Google Map based application (Plug-in) for Road Connectivity for use in Disaster Management Plan.

This Road Map guides a user to find out the critical path to reach a particular location like Level Crossings/ROBs/RUBs etc. The plug-in to Google map application is compatible to work on smart phone/PC/Laptop and with all prevalent operating platforms like Android/Windows/IOS etc. This plug-in provides navigation from our location to the desired location.

PREAMBLE

The Disaster Management Act, 2005 marked a shift from a relief-centric approach to proactive disaster risk reduction, preparedness, and effective response. In line with Railway Board directives, the Ahmedabad Division has prepared its Disaster Management Plan to address both natural and man-made disasters.

I am pleased to present the Seventh Edition of the Disaster Management Plan, aligned with Western Railway guidelines. The Third World Conference on Disaster Risk Reduction framework, and National Disaster Management Authority (NDMA) guidelines. Updated resources, contact details, and clearly defined roles ensure better coordination and readiness.

This plan will enable a prompt, efficient, and coordinated response to disasters. All officers and staff must familiarize themselves with their roles and remain prepared to act with dedication.

Congratulations to team Safety for their efforts in preparing this comprehensive plan.

Chapter 10: Road Connectivity Diagrams:

Road connectivity System Map based on Google Map Over ADI Division

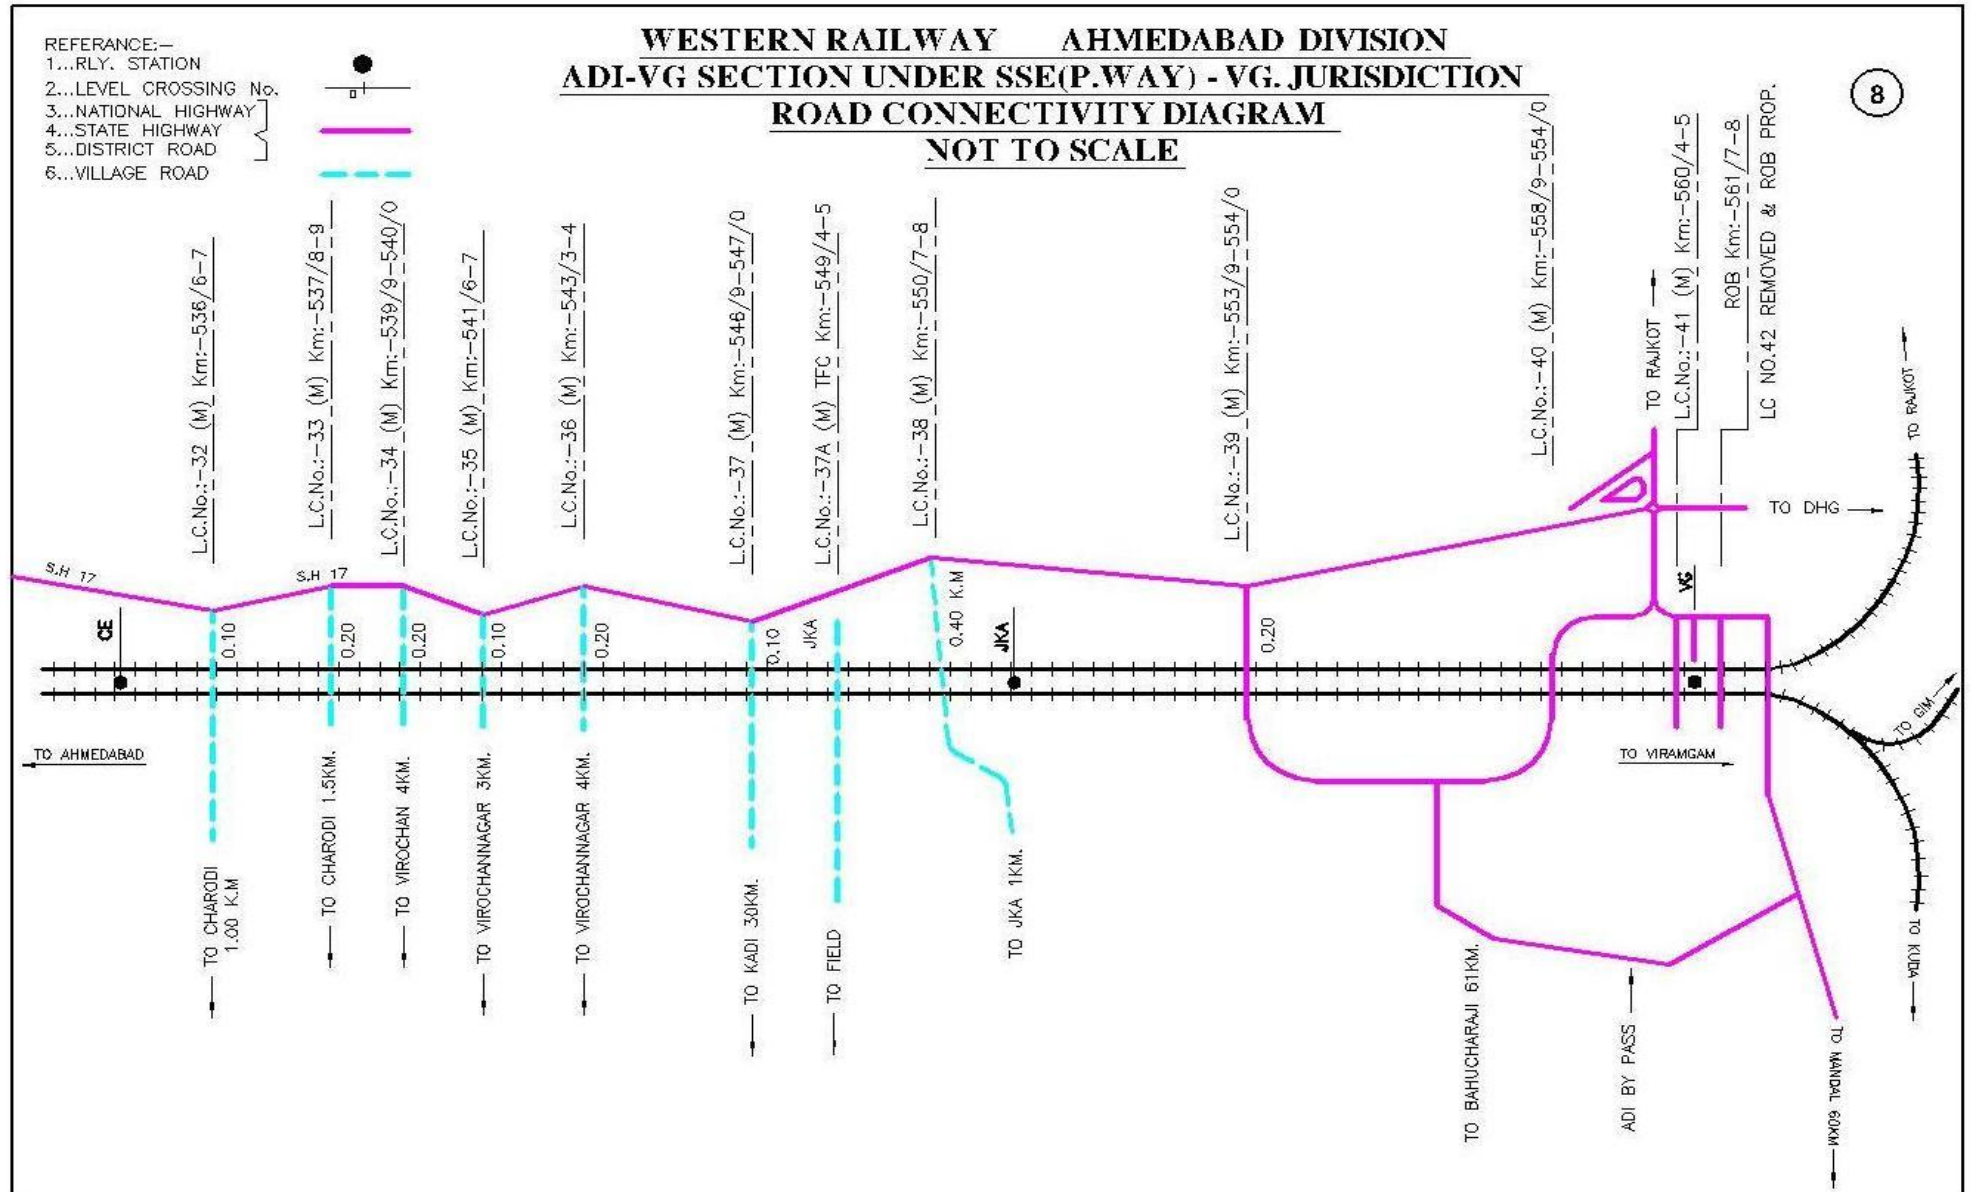

Ahmedabad Division has developed a Google Map based application (Plug-in) for Road Connectivity for use in Disaster Management Plan. This Road Map guides a user to find out the critical path to reach a particular location like Level Crossings/ROBs/RUBs etc. The plug-in to Google map application is compatible to work on smart phone/PC/Laptop and with all prevalent operating platforms like Android/Windows/IOS etc. This plug-in provides navigation from our location to the desired location.
